BRIDGING THE LAST GAP Between the Farm and the Market

HAVE you ever stopped to figure what makes the difference between the value of two farms—one which is located 5 to 10 miles from town and the other only one mile? The land may have the same productive qualities yet the farm nearer town will command a higher price per acre.

THE PRINCIPAL REASON is that it will COST MORE to DELIVER its products TO THE MARKETS. Long Hauls require more time.

You can CUT THIS DISTANCE one half or one third by adopting the RIGHT kind of TRANSPORTATION. Besides deriving yearly profits you increase the value of your farm.

The motor adopted must be of a type SUITABLE FOR THE FARM. A cumbersome, slow moving truck is little better than the old team and wagon. Thousands of farmers have found the IDEAL TRUCK for their purpose is the

REO 'SPEED WAGON'

There are nearly 25,000 in use today—more "REOS" than any other truck. The "SPEED WAGON" meets the demands of the farmer because it enables one man to do the work of several men and teams. As we more about "REOS"
