Spur Cigarettes

HERE is the topmost cigarette—the highest point of smoking enjoyment and satisfaction—the SPUR CIGARETTE. Studied “from the ground up”—in seed, soil, plant and culture. Studied in blending, studied in making, studied in packing. Spurs are blended in a new way from American and Oriental tobaccos, bringing out to the full that good old-time tobacco taste. The satiny imported paper is crimped, not pasted, making an easier-drawing, slower-burning cigarette.

You'll approve of the smart brown and silver packet, three-fold, that preserves Spur's taste and fragrance.

Ford

THE UNIVERSAL CAR

There are more than 3,000,000 Ford cars in daily service throughout the world, and fully eighty per cent of these are Ford Touring Cars. There are many reasons for this, not the least of which is the simplicity in the design of the car, so easy to understand; likewise it is easy to operate, and mighty inexpensive, compared to other motor cars. The maintenance expense is low, and it has won an unparalleled reputation for satisfactory service during the past sixteen years. On the farm, in the city, for business and for family pleasure, it is the car of the people, and the demand is increasing every day. Let us have your order promptly if you want one. We can supply you with most everything in motor car accessories, and we assure you genuine Ford Parts and skilled workmen in our repair service. Be fair with your car and it will give you full value.

PUBLIC ROADS

FUEL SAVED BY GOOD ROADS

Wear and Tear on Trucks and Amount of Gasoline Consumed Shown in Recent Ohio Test.

A test conducted in Ohio recently to determine the saving in gasoline from running over a good road as compared with gas consumption over bad and medium-grade roads, disclosed a surprising difference. Five new army standard "A" trucks with seven different types of road service, showed a gain of six miles per gallon of fuel between the best and worst types of roads. All the trucks were empty during the test.

The trucks loaded showed that the poor road took seven times as much gasoline per mile as the good one.

The test results showed an average of 5.78 miles per gallon over a dirt road in good condition, 7.19 over fair gravel, 9.39 over good gravel, about the same over fair bituminous macadam and good brick roads, 11.44 over extra smooth brick and 11.78 over good concrete.

The saving to the motoring public in gasoline alone would amount to millions of dollars annually. Perhaps equal to this would be the saving in tires, which is considered as important an item of car upkeep as is gasoline. Calculating the saving in wear and tear on the mechanism of cars and trucks and also the item of time lost by poor roads, adequate highways are undoubtedly a sane investment.

CULVERT IS EASILY CLEANED

Much Trouble Obviated by Invention of Grate or Iron Bars, Resting in Notches.

Often culverts under roads and paths become clogged with debris and frequently give trouble because they cannot be readily cleaned. The device illustrated obviates all this difficulty. It consists of a grate of iron bars supported by crosspieces which rest in notches or upon the surface of stonework or concrete, says American Agriculturist. The bars and the crosspieces should be of heavy enough material to support any load that will be driven across the grating.

The one from which this drawing was made is in a footpath, so the bars

Grating Easily Lifted.

were only 1 1/2 inches wide and a quarter of an inch thick. The crosspieces are of the same material, bent at the ends and riveted to the bars. All that is necessary to clean such a culvert is to lift the grating and do the work with a spade or a hoe.

HIGHWAYS IN SOUTH DAKOTA

State Has 6,000 Miles of Improved Roads—Only Ten Other States Exceed in Mileage.

South Dakota has 6,000 miles of main highways, out of a total of 203,523 in the United States. Definite road systems have been established in 44 states, either through legislative action or through state and local officials. North Dakota has 4,000 miles and Minnesota 12,700. Only ten states exceed South Dakota in mileage, while several of them have less than 1,000 miles of main highway.

BIG HIGHWAY APPROPRIATION

State of Wyoming Has Let Contracts for Improvements to Cost \$3,000,000 in 1920.

The total estimated cost of highway improvements for which the Wyoming state highway department has let contracts, and which will be completed during the present year, exceeds \$3,000,000. This total represents \$15 for each inhabitant of the state.

Moroccan Road Traffic. Traffic on the (French) Moroccan highways is very large. In addition to the transport of passengers by private or public automobiles, the roads permit an important movement of merchandise by motortrucks.

Cities Could Not Survive. Without roads, cities could not survive, and country-folk would be without many of the present necessities, comforts, and luxuries of life, which they are now able to enjoy.

A Hot Weather Necessity

No wicks to clean, trim or adjust. Always ready. No valves to worry about. It does not require generating. Burns ordinary kerosene.

Standing the strain

WHEN you give the playclothes problem the careful consideration it deserves—you invariably buy only such garments you believe will stand the strain of strenuous play.

At each step in the making of "Bread Winner" playclothes this strain is considered. Each garment is reinforced where there is any considerable strain upon it, each garment is finished to the last detail of buttons, buttonholes and seams with the necessary care to withstand this strain.

You can buy our playclothes bearing the label "Bread Winner" with the positive assurance that you have purchased a garment that will absolutely satisfy. Made under the most sanitary conditions, for tiny tots in creepers up to boys of eight and girls of six.

Come into our children's washwear department and let us show you our full line of sturdy garments.
