**"You Can't Beat That Route for Scenery"**

said a much-traveled man, referring to the Burlington Denver & Rio Grande and Western Pacific — that great central, scenic highway through Colorado and Salt Lake to California.

Folks just naturally want to see all they can when they travel. This service offers the biggest possible travel treat. The schedule was planned so that all the best scenery is passed in daylight. It takes a little longer, but it costs no more. It is the ideal route—going, returning, or both

**CONDENSED HIGH PRICED STOCK FOODS**

**PROMINENT HOG RAISER SAYS PRICES CHARGED ARE UNWARRANTED—MAKES HIS OWN HOG FOOD, WITH BETTER RESULTS**

"That he is through paying fancy prices for stock foods and hog remedies and that he is raising some of the best hogs placed on the market" was the statement made recently by E. H. Beckstead, well-known hog raiser and authority on live stock.

Mr. Beckstead's hogs are the envy of his neighbors, and have "topped the market" for several years in Iowa. He states that for years he bought high-priced hog foods and hog remedies, but he is all through paying extravagant prices for what he can make for himself. He states that what the hogs need are minerals, and tells the secret of his wonderful success by explaining that he takes about five pounds of ordinary mineraline (which is pure concentrated minerals and cost only a couple of dollars) and mixes same with enough bran or filler to make a hundred pounds. All hogs, and especially brood sows require minerals as they keep them free from worms, and in the pink of condition, and are essential to the hogs growth and a well balanced ration. This inexpensive mixture placed in a sheltered box where the hogs can get at it when they need it, will produce far better results than any high priced so-called stock foods.

Send two dollars to The Mineraline Chemical Co., 1638 North Wells St., Chicago, Ill., and they will forward you by prepaid parcel post, enough mineraline to make a full hundred pounds. (Adv.)

**Sea Gulls.**

There are more than 60 kinds of gulls to be found all over the world. Most of these are marine or sea-dwelling birds, though several species are found near lakes of fresh water, like the Great Lakes and other inland seas. As there are many kinds of gulls, so, too, they have many names, some of which possess real charm and interest. Among them are the arctic gull, the goose gull, the herring or silvery gull, the Iceland gull, the kittiwake, the laughing gull, and the seamew.

The Astrologer in China. From the earliest times astrology has been one of the arts surrounded by mystery. But in China it is a very perky profession. When a so-called prophet predicts an event which does not occur, he loses his head.
