NEBRASKA LEADS
In a statement issued by the state department of agriculture it is said that Nebraska has so far made the best showing in the number of farms on which purebred beef cattle are found, and the total number in the state.

The statement follows: "The total number of purebreds and the number of each breed in the state is information that is very much desired by breeders, extension workers and livestock fanciers. The Census Bureau is now compiling such data for each state and when completed will be of inestimable value. The Bureau of Markets, State Department of Agriculture has just received an announcement of the number of each breed of purebred beef cattle in Nebraska. Shorthorns are found on the largest number of farms and the total number of Shorthorns is 5,359 in excess of any other breed in the state. A summary of the report follows:

Breed	Farm Reporting Number	Total
Shorthorns	6,647	32,777
Herefords	4,430	27,418
Polled Shorthorns	1,415	3,420
Angus	622	4,640
Galloway	92	411
All Others	1,258	5,508

Of the twenty-three states for which reports are complete, Nebraska makes by far the best showing in the number of farms on which purebred beef cattle are found and on the total number in the state. The Newly Married.

Nothing is to me more distasteful than that entire complacency and satisfaction which beam in the countenances of a newly married couple in that of the lady particularly; it tells you that she is disposed of in this world; that you can have no hopes of her. It is true I have none, nor wishes either, perhaps, but this is one of those truths which ought, as I said before, to be taken for granted, not expressed.—Charles Lamb.
