At the 7:30 hour the history of one or more hymns will be given. A question box will also be opened at that time.

The chorus meets this Friday evening at home of Mr. and Mrs. Geo. Drake.

Life is made up of habits. Let form good ones. Therefore go to church every Sunday.

Grace Church Notes

The Right Rev. Geo. A. Beecher, D. D., Bishop of Western Nebraska, will preach at a special service of Evening Prayer to be held on Friday evening next at 7:30 p. m., in the church.

On Sunday next which is the Twenty-second Sunday after Trinity, the services will be as follows:

Sunday School at 10 a. m.

Morning Service at 11 a. m.

Evening Service at 7:30 p. m.

We had anticipated having the Bishop with us over Sunday, but that is not possible at this time. However, the Bishop has promised us a Sunday early in the new year.

Congregational Church Notes

Sunday School 10 a. m.

Preaching service 11 a. m.

Rev. J. H. Beitel of Franklin will occupy the pulpit. Come and hear him.

English Lutheran Church

Regular services every first and third Sunday in the month in the Adventist church.

O. R. Heinitz, Pastor.

Queen Disliked Long Sermons.

Visitors to the Savoy chapel, off the Strand, are often asked to look at the "old hour-glass" on the pulpit. It is not "old" for it was not placed there until Queen Victoria restored the chapel in 1867: it is not an "hour-glass," for the sand runs for 18 minutes only. That period is said to have been chosen by the queen as a protest against long sermons.—Christian Science Monitor.

FARM BUREAU NOTES

(By County Agent H. R. Fausch) NEBRASKA BREEDER OF RHODE ISLAND REDS ACHIEVES SUCCESS

When Mrs. A. Arnold of Inavale purchased Walter Hogan's book several years ago, entitled "The Call of the Hen" and began to study it thoroughly and also read every article on chickens that she could get hold of, she little realized that her name would appear in the honor rolls of the National Egg Laying Contest conducted by the University of Nebraska and that her trusty single comb Rhode Island Reds would make records stamping them as real egg producers. The honors in egg production won by the Arnold flock simply illustrates the fact that the men and women who achieve success along various lines are the ones who study their business and that the use of books, newspapers and farm papers are all a real help, in fact a necessity in achieving success.

REAL RECORDS ACHIEVED

We have spoken in these columns before of the National Egg Laying contest held under the auspices of the poultry department of the University of Nebraska. This contest is an annual affair, the year beginning on November 1. An entry in the contest consists of a pen of 10 fowls. These fowls are all leg banded and an individual record is kept of each individual. Several states besides Nebraska are represented in the contest. On September 1 the contest having been on for 10 months, the reports showed that during that 10 months two of Mrs. Arnold's pen of Rhode Island Reds were among the 10 leading egg producers in the contest. One of these occupied sixth place with 216 eggs and the other was seventh place with 215 eggs. The August records of this year also show that her bird leg banded C-11 laid 29 eggs for the month which is an exceptional record.

One of her birds known as C-605 achieved real honors in the 1920-1921 contest, laying 286 eggs in 365 days. From the 30th of April to the 10th of July this hen only missed five days and was the only hen in the contest to lay 30 eggs in one month, this month being June.

GETTING STARTED IN POULTRY

"I had no very good reason for choosing the Reds," writes Mrs. Arnold, "I thought them a very pretty chicken and they were just beginning to be a popular breed here. I could have gotten some eggs of those yellow Reds with dark necks, then I saw some of the real Reds, so I hunted until I found 15 pure dark red pullets. I also secured two cockerels and that was my start. I got Hogan's book, "The Call of the Hen", and studied it and began to cull, reading every chicken article that I could find. I do this yet and try everything that seems reasonable."

"In selecting pullets for breeding I keep only those with three finger capacity and thin straight lay bones. Usually I commence selecting and banding the earliest maturing and best looking pullets in September. By the month of November there are quite a number of the seemingly best. Then the culling and testing begins and the handling with different colored leg bands. I band the 1-year-olds and the 2-year-olds, using a different colored leg band for each year. I can thus tell at a glance just how old any chicken is in my flock. If one goes broody in January or February, she is sold, or if by the middle of the summer she has wanted to set three times, she is marketed."

DISTINGUISHING THE PRODUCERS

"I put a green band on the leg above the year band every time a hen proves to be a good layer. If a good layer, she is kept the third year, for she will produce good layers. Now by sending pullets to the egg laying contest, I can be more certain and get cockerels for breeding from the high producing hens who will produce high egg production pullets."

Mrs. Arnold states that for scratch feed, she uses the formula advised by the extension division of the state university; two parts of cracked corn sifted, one part of oats, one of barley and one of wheat for the flock and all of the older chickens. For the younger chickens, she uses less of the oats and barley and more of the wheat. In handling the baby chicks, Mrs. Arnold starts with sand and sour milk. Then the chicks are given rolled oats, fine commercial feed, then the coarser commercial feed and then her own mixture. They are also given all of the milk that they will drink. By the time they are a week old, they are eating mash which is kept before them at all times.

THE POULTRY HOUSE

"My houses are all of the shed type," says Mrs. Arnold, "they face the south and have the whole front open in summer. In winter, glass windows are used and muslin, more muslin being used than glass. The inside equipment consists of dropping boards on the north side with removable 2x2 roosts a shelf for drinking vessels and self feeders at the ends of the rooms and a cement floor covered with a deep straw litter. When it comes to controlling disease, I do not seem to be very successful and so I generally kill and bury every one that looks or acts sick, both old and young. I have had no experience at poultry shows never having shown any birds except one at the Farmers' Institute. Showing does not appeal to me although won two first and one second premium."

Your Winter Trip

to California will be surprisingly more enjoyable and far more satisfactory if your hotel or bungalow accommodations are arranged for well in advance and proper consideration is given to the selection of your route to take you there. Naturally, you want to see the most of the best scenery in America en route. The logical route is the Burlington (in connection with the Denver & Rio Grande Western and Western Pacific) because it takes you right through Denver, the Pike's Peak Region, Royal Gorge, scenic Colorado, Salt Lake City and the Grand Canyon of the Feather River in the beautiful Sierra Nevada range. Then if you return by way of the great Pacific Northwest (Yellowstone or Glacier Park line), Minneapolis-St. Paul and the Burlington's Mississippi River Scenic Line, you put a ring around the Golden West—the most wonderful trip in America. Rail rates are the same via all Western lines. Therefore, you have something to gain and nothing to lose by investigating before completing your plans. Let me tell you more about the Burlington's more-travel-comfort-at-the-same-cost service.
