The Vacation of a Thousand Marvels

Yellowstone National Park in Gardiner, out Cody

Roosevelt said: "The geysers, the extraordinary hot springs, the lakes, the mountains, the canyons, the cataraacts unite to make this region something not wholly paralleled elsewhere on the globe."

These and a thousand other wonders found nowhere else on earth, plus the thrilling grandeur of the Cody Road through the Buffalo Bill country—the land you will never forget—

That is Yellowstone Park on a Burlington-Planned Vacation.

The ideal and complete tour of Yellowstone Park is—in Gardiner, out Cody—because in no other way can the visitor gain the advantage of viewing the thrilling scenes between these rail gateways and the Park proper, or see the wonders within the Park in the order of their increasing importance. Nature's grand climax comes where it belongs. Ask anyone who has made the trip.

This unforgettable ninety-mile motor trip is included in your Burlington tour without side trip, extra transportation cost or bother.

Via the Burlington, on a round trip ticket to Yellowstone alone, you can, without extra rail cost, visit Denver and the Colorado Spring-Manitou-Pikes Peak region. You can, at small cost, visit peaceful and beautiful Rocky Mountain National-Estes Park, Colorado Glaciers, Clear Creek, and Platte Canyon resort regions, the world-renowned Royal Gorge and other delightful Colorado pleasure spots. Two weeks, if that is your limit, is ample time for a glorious vacation, but three would be better, in the land of Eternal Wonder.

The low cost of the trip will surprise you.

If you are going farther West, you can conveniently visit Glacier or other National Parks en route. No matter where you want to go—West—the Burlington can take you there—its service is at your service throughout the entire West.

Let me help you plan your trip.

CONQUEST OF WHEAT RUST

Hope for a substantial reduction in the amount of loss which the farmers of this region annually suffer from the black wheat rust is held out by Dr. E. C. Stakman. This promise, however, has only limited application. The barberry campaign is not completed. There are localities where the bush still thrives and still menaces the crops. But in those districts where the eradication has been complete, there should be a distinct gain at the next harvest, other things being equal. The campaign will not have covered the Northwest until the 1924 season, and there remains enough barberry, particularly in North and South Dakota, to cause one of the dread epidemics if weather conditions are from the point of view of the hungry rust fungus, right.

ly as do the plant pathologists on the merits of the strategy which has been adopted against the black rust. The relation between the barberry bush and the black stem rust has been positively established, and, if science did not have all the proofs it needs in the laboratory, the experience of the European sections where eradication of the bush has been followed by a complete elimination of the disease, would be positive proof that the state and Federal governments are on the right track.

It cannot be promised that when the last bush is uprooted in this territory, the black stem rust will be no more, for the southern winds certainly do carry the disease north from the fields where the life cycle of the destructive fungus is not dependent upon the same barberry phase as here, but the danger of serious loss will have been dissipated.

Mr. and Mrs. Wm. Thomas spent Wednesday with their daughter, Mrs. J. E. Jarboe, who is in a hospital at Hastings. They report that she is improving and will probably be brought to their home next week.
