GOVERNMENT MAN HERE MAKING SOIL SURVEY

The state and government men are now working in this county on a very detailed soil survey which, when completed, will have many important uses for the citizens. The work is being done by the Conservation and Survey Division of the University of Nebraska in cooperation with the U. S. Bureau of Soils. Dr. G. E. Conrad, director, is in general charge but the field work is being directed by Mr. L. A. Wolfanger.

The first part of the survey will be directed towards the classification and mapping of all of the various kinds of soil in the county. Many borings will be made and numerous samples will be taken for physical and chemical analysis. When completed, the report will be available for every citizen of the county. It will include a comprehensive discussion of the soil resources and their best utilization and will, by means of a large colored map, show soils, drainage, towns and the locations of all roads, houses, churches, schools, cemeteries etc., in the county. Such reports have been made on 47 of the 93 counties of the state and when the whole of the survey is completed, Nebraska will have valuable information for farmers and realtors and for use in farm loaning road building and in agricultural instruction in the schools.

The director of the survey requests that the citizens of the county do not take up the time of the field men in asking numerous questions, not because the men could not answer them but because all of the information worked out will be available later and because the strenuous effort required in this survey will demand all the energy and time of the surveyors. This survey is made at the request of many citizens of the county and at the urgent request of Representative Garber. In fact, the request has been in for quite a while but not granted until this year. The kindly interest and cooperation of the citizens of the county is highly appreciated by the survey. The work is done at state and federal expense but the results will be for the benefit of all.

A Royal Outing Place Rocky Mountain National Park

The Low Cost of the Trip Will Surprise You

There's no denying the fact, the best investment many folks make is their vacation.

To enjoy the best of health and make the most of life, one must, of necessity, have an occasional change of environment, altitude, climate and method of everyday living.

So named because it represents the typical scenery of the higher Rockies—than which there is probably no mountain range more majestic—a rest-and-play-land, a natural, wild, beautiful and healthful outdoors—this Park is a refuge of peaceful grandeur and a haven of quietness which has remade many a tired soul.

Here, hid away for a time, one leaves "nerves" behind while doing as one likes. The sportsman may hunt or fish, the worn out loaf or ramble, the more energetic ride, drive, climb mountains or play golf or tennis. Kiddies scamper and grown-ups forget dignity and indigestion. All can be out every day in the pine-scented air and enjoy the up-building sleep which only the air of the mountains can induce.

An agreeable feature of this mountain paradise is its unrivaled variety of hotel accommodations, which range all the way from the "million-dollar" hostelry and broadspreading rustic inn to the modest cottage and out-post tent.

Easy to reach and to see—hit the trail there this summer. Let me tell you more about it and let your hometown railroad take you there.

Through the untiring efforts of the different men on the committees everything points that the celebration will be a success and a big bration will be a success and a big crowd here.

MUCH ENTHUSIASM DISPLAYED AT OIL MEETING SATURDAY

A get-together meeting of the oil men, who are intending to operate in this state, was held in Hastings on Saturday night and the first of the week Messrs. C. A. Lewis of Billings, Montana, and James O'Hara of Houston, Texas and Miss G. M. Watson of this city, formerly of Billings, Montana, in company with Mr. Hursch, made a tour of inspection of the company's property. Much enthusiasm resulted from the trip and it was unanimously agreed that the structures were here and all that was needed was test wells to prove this territory to be an oil field.

An Enterprise that Merits Your Support

Notwithstanding the amount of shipping that is now lying idle in the harbors and at the docks of the United States, ocean travelers are still obliged to pay high rate for trans-Atlantic travel, and an unparalleled opportunity to build up the American Merchant Marine is being lost. Recognizing this fact, and realizing that the time was opportune for an undertaking of this nature, the organizers of the Great Northern S. S. Co formed their Corporation, which received its charter from the State of Massachusetts, October 11, 1922.

They visualized a new ocean steamship line, plying between Boston and European ports, which would offer to these same people a chance for ocean travel on comfortable commodious ships, at a price within the reach of all, but large enough to allow a profit for the investor and a sufficient margin to allow for the carrying on and enlarging of the enterprise.

This was their threefold purpose—to render a genuine service to the people,—to help build up American shipping,—and to bring business and trade to the port of Boston.

In spite of the failure of the Ship Subsidy Bill, in spite of the opposition which each new competitor in an established field encounters, this Company is bringing its plans to maturity and expects that very soon it will be able to offer definite sailing dates to the public.

This, surely is an enterprise that merits your support.
