

Girls Hold Show, Send Money to Bee Milk Fund

"We Planned to Buy Fireworks," Write Fairbury Children, "But We Read About Poor Babies."

The world will never go to the bow-wows so long as there are children in it like "Archie Freeman, Mary McDonnell, Muriel Hawes and Dorothy Smith of Fairbury, Neb.

These little girls gave an amateur show Wednesday night which netted them \$5.25.

"We planned to buy fireworks for the Fourth of July with our money, but when we read about the babies in Omaha who would die without milk this summer we decided we would much rather send it to the Bee Milk and Ice fund," they wrote.

None of these girls who evidence such a noble, self-sacrificing spirit, is over 10 years old.

The Fifth Grade Citizenship club of Saunders school, Omaha, also made a gift of \$2 to the needy little ones.

To date the fund stands as follows:

Previously acknowledged	\$141.35
Summers school	2.50
Fairbury girls	2.75
W. D. Taylor, Powell, Wyo.	2.00
Mrs. D. Leonard	2.00
Mrs. Carl Kramer	2.00
Joseph H. Holbeck, Schuyler, Neb.	2.00
Will Dierker	2.50
Total	\$157.10

Summer Army Training Camps Over U. S. Open

Washington, June 15.—Summer training camps were opened over the country today under Army supervision for youths of the reserve officers training corps, part of the machinery of the new defensive military policy set up in the national defense act of 1920.

The corps includes approximately 100,000 young men under training to become members of the reserve corps of officers of the national guard, and of these it is estimated that approximately 7,000 began today the summer work of intensive field training.

It has been calculated that the camps this year will result in at least 2,000 potential officers being added to the reserve corps for assignment to organized reserve units or to be commissioned in national guard regiments. Ultimately it is planned to expand the work so that an annual corps of 10,000 new reserve officers will be forthcoming.

By corps areas the attendance at the training camps is expected to aggregate as follows:

First corps, 721; Second corps, 605; Third corps, 986; Fourth corps, 1,330; Fifth corps, 777; Sixth corps, 733; Seventh corps, 944; Eighth corps, 557; Ninth corps, 691.

Tom Hall Pays Filing Fee for Railway Commission

Lincoln, June 15.—Advises received at the office of D. M. Amsberry, secretary of state, declare that Tom Hall of Richardson county has paid a filing fee at Falls City, indicating that he is a candidate for the nomination as railway commissioner to succeed Harry L. Cook, present member.

Hall was railway commissioner from 1910 to 1920 when he became a candidate for governor. Cook and David Robinson of Chadron also are candidates for the nomination.

F. L. Bollen of Lincoln has filed for the progressive nomination for attorney general. Grant L. Shumway is filed both as a progressive and a democratic candidate for state auditor.

Rockford Man Files

Beatrice, Neb., June 15.—(Special).—Fred Van Liew, democrat, has filed as a candidate for supervisor from the Fourth district. He resides near the town of Rockford and is an old resident of the county.

Road Conditions

Furnished by the Omaha Auto Club. Lincoln highway, east: Roads good to Cedar Rapids, with exception of a stretch from Le Grand to Quarry. Detour east of Cedar Rapids due to road construction.

Lincoln highway, west: Roads good to Grand Island.

O. L. D. highway: Roads good to Hastings and west.

Highland cutoff: Roads good. Cornhusker highway: Roads good. Meridian highway: Good.

S. Y. A. Good. O Street road: Good. Omaha-Tulsa highway: Good. Omaha-Topska highway: Good to state line.

King of Trails, north: Roads good to Sioux City.

King of Trails, south: Roads good to Hiawatha; fair south.

Center Battlefield highway: Roads reported good everywhere.

River-to-River road: Fair to good to Des Moines.

Chicago-Omaha shortline: Roads good to Des Moines. East of Des Moines watch for detour signs. Roads reported clear through to Chicago. Quite dusty.

I. O. A. shortline: Roads good. Blue Grass road: Good clear through to Burlington. Very dusty.

Weather reported clear everywhere.

Norfolk Woman Given Honor by Music Club

Norfolk, Neb., June 15.—(Special).—Mrs. Cora Beels of Norfolk, Neb., was recently elected president of the Norfolk Music club during the convention of music clubs held at Davenport, Ia., Rock Island and Moline.

Mrs. Beels is a prominent member of the Woman's Club of Nebraska and was president of the Norfolk club last year.

Weather Favors Growing Crops

Weekly Review Shows Unfavorable Conditions in Spots—Outlook Bright.

Washington, June 15.—Favorable conditions for the growth of crops during the week ending Tuesday was reported yesterday by the weather bureau in its weekly weather and crop review.

Warm weather with light to moderate rainfall caused winter wheat to ripen rapidly in all the principal producing states, the review said, adding that some reports of premature ripening had come from Kansas.

Rainfall in the northwestern states, with the exception of the central portion of Washington, proved beneficial.

The drought that had hindered the growth of spring wheat in the Dakotas was broken, the review said, and the crop generally was favorably affected, especially in Montana.

Oats were reported as heading short in Illinois, in poor condition in west central and northwestern Iowa and affected by dry weather in many parts of Nebraska.

Warm weather, which is greatly to the liking of corn, prevailed in most of the corn-growing states, except Texas, during the week, the review said. More moisture is needed in west central and northwestern Iowa and parts of Indiana, but sufficient moisture is reported from most sections of the corn belt.

Rangers Trail Bear That Slew Trapper

Livingston, Mont., June 15.—Yellowstone National park rangers are trailing a huge grizzly bear that recently killed and partly devoured Joseph Duret, 60, an old time mountain trapper. Duret's body was found yesterday on Slough Creek, near the park, with an arm and a leg partly chewed off. Signs indicated the bear had been caught in one of Duret's traps but had broken loose when the trapper came by on his rounds.

Horace M. Albright, superintendent of the park, said there were evidences of a terrific battle and a rifle, clawed and chewed, were found near broken trap. One shot had been fired from the rifle and a bloody trail showed that the man had crept a mile and a half after receiving his injuries.

The body was so badly mutilated that it was thought necessary by the rangers to bury it where it was found.

The death struggle took place in one of Theodore Roosevelt's favorite hunting grounds.

Beatrice Names Delegates for Elks State Meeting

Beatrice, Neb., June 15.—(Special).—The following members of the local lodge of Elks have been selected to represent Beatrice at the state convention of Elks to be held at Columbus next week: C. T. Fowble, Dr. C. P. Fall, Louis Graff, Frank Klein, Dudley Scott, John L. Schiek, Mack Webb, E. T. Weekes, F. E. Lenhart and R. A. Phelps.

Hitchcock Plea for Nomination Backs Dry Laws

Senator Who Opposed Woman Suffrage and Prohibition Says He Will Support Enforcement.

Senator Gilbert M. Hitchcock issued a statement through his Omaha office yesterday beseeching the support of Nebraska voters for his candidacy for the democratic renomination. He reviewed public events during his 12 years as a senator and said:

"Four great amendments to the constitution have been achieved: The election of senators by the people, the income tax, woman suffrage and prohibition. Each of these four must be accepted as settled issues—as questions that the people have decided.

"Prohibition, however, differs from the other three in this respect, that it requires enforcement legislation and annual appropriations. From now on the question is chiefly one of enforcement.

"Six years ago, during the election, I said I was against prohibition, but if I carried I would help enforce it. This I have done by supporting all appropriations and all legislation needed for the purpose, including my vote November 18 of last year for the bill amending and strengthening the enforcement act. I shall continue to support enforcement legislation and appropriations.

Senator Hitchcock further declared himself in favor of amendments of the Esch-Cummins railroad act and the federal farm loan act. He favored a soldier bonus, but refrained from endorsement of any particular measure. He opposed the tariff and the ship subsidy legislation now pending.

Beatrice Judge Declines to Run for Representative

Beatrice, Neb., June 15.—(Special).—Judge A. D. McCandless of Wyoming, whose friends filed a petition asking that his name be placed on the primary ballot as a republican candidate for representative, announced yesterday that he had decided not to enter the race.

Lightning Destroys Church Edifice at Sioux Falls

Sioux Falls, S. D., June 15.—Lightning early this morning struck the steeple of the Lutheran church at Brandon, nine miles east of here, during a heavy wind and rain storm, setting it afire and destroying it.

RADIO

Radio Great Aid to Sea Commerce

Ship Owners May Keep in Touch of Vessels; Medical Advice Sent by Wireless.

By JOHN E. KENNEBECK. (This is the eleventh installment of The Bee's story of radio.)

Radio is not simply an aid to safety at sea—though that is its greatest asset.

What part wireless plays in maritime commerce is of tremendous importance. Mercantile marine companies are able to keep in touch with their vessels by radio so that they may be directed to various ports without waiting days for instructions through the mail from the ship owners.

Nor does the captain of a ship have to make wild guesses about the weather he is going to experience in midocean. Every day he can obtain the weather reports from the powerful government station at Arlington. This value cannot be overestimated. He may likewise receive information by radio concerning wrecks, obstructions to navigation, derelicts and ice bergs.

Medical Advice by Radio. A business man on a vessel anywhere between Liverpool and New York may learn the happenings of the world by radio.

There have been cases where lives of men have been saved by medical advice sent by radio. Any vessel sending forth the signal "HDKE," "HDKE," which means "Help wanted for an individual," will be immediately answered. This call is given preference over any other message except "SOS."

Arctic and antarctic explorers may also find good use for radio, as will be tried by Captain Amundsen who is en route to the northland on an exploring trip.

A system has also been devised to determine a ship's position at sea by radio.

A person in any part of the country where a telegraph station is located may file a radiogram to a person on a transoceanic vessel. The ship merely has to be designated.

The message is telegraphed to a powerful broadcasting station, thence to the ship at sea. Nor is this method costly.

The value of radio as a family entertainer will be treated in an article in the radio columns of The Bee tomorrow.

SPARKS

"Ware the Wash!" East Side, West Side, All Around the Town, might now refer to the sky line of any city now. In large cities where roof space is limited and radio popularity is unlimited the week's wash may be seen any day twisted in unseparable tangles about net works of aerials. Wash lines seem to be an interference even greater than static and much harder to eliminate.

Care of Crystals. Crystals should be kept in a closed box when not in use for considerable period of time, and when picked up should be handled carefully with tweezers or a cloth, so that they will not come in contact with the fingers. Repeated contact with the fingers may almost entirely destroy the sensitivity of a good specimen of galena. A galena detector will become much less sensitive after a few months' exposure to the air, whether in service or not. Iron pyrites will usually retain its sensitivity much longer when exposed to the air than galena. Carborundum and silicon are also not so seriously affected by exposure.

On the surface of a given sensitive crystal of most kinds different points will vary greatly in sensitivity. This is particularly true of galena and iron pyrites, and to some extent of carborundum. Good specimens of fused metallic silicon usually have sensitive spots all over their surface, which vary comparatively little in sensitivity. A sensitive spot on a galena crystal may entirely lose its sensitivity if acted upon by an unusually strong signal, caused for instance, by strong static. When this occurs it is necessary to move the fine-wire contact around until a new sensitive spot is found. The most sensitive spots on carborundum are often found deep in the spaces between the faces of the crystals which form the usual specimen.

Chadron Man Seeks Place on R. R. Body

Lincoln, June 15.—David Robinson, republican of Chadron, filed last evening with the secretary of state as a candidate for railway commissioner.

Grant L. Shumway of Scottsbluff completed his filing as a democratic candidate for state auditor today. Other filings today were: Edward L. Houtz, Albion, democratic candidate for state senator from the Twenty-first district; H. L. Swanson, High Springs, progressive candidate for state senator from the Thirty-first district; Thomas C. Osborne, Bayard, progressive candidate for the state senate from the Thirty-third district; Michael O'Conner, Greeley, active from the Sixty-fifth district.

Petitions were filed asking that the names of Dr. H. B. Cummins of Seward be placed on both the progressive and democratic ballots as a candidate for congress from the Fourth district. Acceptance of the filing has not been announced.

How to Make Perfect Strawberry Jam in 10 Minutes

New Certo Process Astonishes Housewives

Never Fails, Requires Only One Minute's Boiling, Retains All the Color and Flavor and Makes More Jam from Same Amount of Fruit

Strawberries are now plentiful at a low price, sugar is cheap and housewives are putting up strawberry jam as never before. Best of all, the brand new and never-failing Certo process for making jams and jellies has eliminated every reason why any housewife should hesitate to make such a delicious conserve. Anyone can now make perfect strawberry jam in 10 minutes, at a very low cost, with all the flavor and color of the fruit retained.

Crush well in single layers about 2 quarts ripe berries, using wooden masher, crushing each berry and discarding all green parts. Add juice of 1 lemon. Measure 4 level cups (2 lbs.) crushed berries, including lemon juice, into large kettle. Add 7 1/2 leveled cups (3 1/2 lbs.) sugar and mix well. Stir hard and constantly and bring to a vigorous boil over the hottest fire. Boil hard for one full minute with continual stirring. Remove from fire and add 1/2 bottle (scant half cup) CERTO, stirring it in well. From the time jam is taken off fire allow to stand 5 minutes only, by the clock, before pouring. In the meantime skim, and stir occasionally to cool slightly. Then pour quickly. Use same recipe with raspberries, blackberries, dewberries and loganberries.

The former guess work and worry of making jam or jelly is now past. The Certo Process is endorsed by government authorities and cooking experts; it insures perfect results with every batch. It is also very economical, requiring only one minute's boiling and therefore makes two-thirds more jam or jelly than the old method. It also makes all kinds of jam or jelly, such as you have never tasted before, like pineapple and rhubarb jelly, or combinations like strawberry and pineapple, etc. Many housewives with no little pride are exhibiting the new flavors and better quality of jams and jellies made with Certo.

Certo is absolutely pure—contains no gelatine or preservative. Housewives have received it with open arms because it is so certain, so economical, so simple and so useful. They are recommending it to all their friends. Get a bottle of Certo with Certo Book of Recipes containing the above and nearly 100 other recipes, from your grocer or druggist at once. Extra copies sent free if you write to the Pectin Sales Company, Inc., 112 East Avenue, Rochester, N. Y. Try Certo right away with fresh fruit like strawberry or pineapple. Then you will do all your preserving the new and modern way—the easy, economical and better Certo Process. Fine keeping qualities.

CERTO (Sure-Jell) "MOTHER NATURE'S YEAR ROUND JELL-MAKER"

Certo Process: 1 minute's boiling of 2 pounds of fruit with 3 pounds of sugar plus 4 ounces of Certo makes 5 pounds of jam

Old Method: 15 minutes boiling of least a half dozen 2 pounds of fruit with 2 pounds of sugar makes 3 pounds of jam

Bargains that will be as lingering as the birthday of a child in a mother's mind, mark the opening of the ninth day of Omaha's most sensational selling event!
