Yank Tourists Flock to Venice to Look at Queen

No Jazz Bands, Shimmy Dancers or Wild Cabarets to Mar "City of Silence."

Venice, June 17 .- Cats, though permitted, may have no pleasure in looking at a king, but American tourists are flocking to look at the queen. Venice, the Queen of the Adriatic, today is filling with folks who speak the English language, who have all their lives heard of this remarkable city and who are coming remarkable city and who are coming to see if their dreams were justi-

The other day the new flag of the city was raised and loud were the markable how many comments were followed it out. Then they decoratpassed in the American language and how many pairs of pointed shoes filled St. Marks square. The season of must have bewildered themselves sunshine had begun, from every di- with the wealth and variety of color. rection the tourists were concentrat- This was the work of the kings, but

Most everybody found that Venice was about the only place in Europe which comes up to the imagination. Or to one's preconceived ideas. One American woman liked St. Marks because the colors were soft and not as postcardly pictured; another declared that riot of color was the thing that pleased an eye accustomed to gray cities and brownstone fronts. But all found that it was the uniqueness of Venice that was its main attraction.

"You actually must take a gondola to get to your hotel from the railroad station," exclaimed the new visitor, uttering at once the commonest yet almost interesting observa-tion the station has heard in a million times. It is only after you have been in the hotel a while that you learn that you can get almost every-where on land-provided you want to take a chance in a labyrinth with blind alleys bringing you to blind waterways. The gondola, however, remains the most romantic of vehicles - it is romantic all the way from its graceful lines to the folk songs and the guitar and mandolin playing, the moonlight and the faint swish swish of the gondolier's oar.
A room on the Grand canal -

which, by the way, comes to less than a room in a hotel Unter den Linden in Berlin, where things are supposed to be cheap but aren't-is a continual joy. From red sunshine to red sunset Venice goes through of the primary ones are capable of, and the passing of tiny lights on dimly seen gondolas under your hotel window has its own enchantment. Certainly for the visitor from the lands this port of the Ad-

riatic is the best sight of all. For the American city dweller Venice is the haven of rest—if he chooses to make it so. While it is

Gobs Put Missing Link Show Out of Business

Constantinople, June 17.—"The missing link, ladies and gentlemen, the missing link, captured in the wilds of Africa after a long and exhaustive research, half monkey, half man. Ten pi-i-asters, don't crowd, one at a time."

The ballyhoo was holding forth in

the Champs de Mars, an imitation of Coney Island. Two American sailors paid their 10 piasters and were regaled inside the exhibition tent with a scene of a woman, covered with matted hair. She spoke Greek.
"I'm half monkey and half human," she told the spectators. "My father was a baboon and my mother was an American.'

It was Greek, but the girl with the sailors understood. She told her American friends. The show ended then and there. The next day the two American sailors made an official report to the Constantinople post of the American Legion, and the show temporarily wrecked the night before, was permanently put out of business by the allied police on the complaint of the Legion.
