| FULLERTON | WAHOO |
| GOTHENBURG | YORK |

THE most tangible evidence of a company's pride in its community and confidence in its business future are the real estate investments of that company. The consistency of our efforts to build and build well, benefiting the community automatically as we benefit ourselves, has led to the completion of a new home for the Standard Oil Company of

Nebraska, at 18th and Howard streets, Omaha. Other evidence of our faith in Nebraska is the continued building of the most up-to-date Service Stations throughout the State. We hope that our investments in these properties will benefit other enterprises. We acknowledge with gratitude the patronage of those firms and individuals who have made this building program possible.
