

Auto Band Raids Roundhouse at Orroville, Cal.

Numerous Strikebreakers and Guards Clubbed by 75 Men—Four Guards Believed Kidnaped.

Orroville, Cal., July 13.—Numerous strike breakers and guards were injured, several seriously and one perhaps fatally, when about 75 men, speeding into town early today in automobiles, charged the Western Pacific roundhouse here.

Fifty Shots Fired. They fired about 50 shots, but apparently aimed them only at the windows of the roundhouse, which were shattered. All of the injured had been clubbed; none had been shot.

Reports indicated that in the surprise of the attack there was no appreciable resistance. The roundhouse was badly damaged.

Later in the morning the sheriff of Butte county conferred with the local police over the situation. The town was quiet by the time the authorities had been notified.

Stripped of Clothes. Donald Stevenson of San Francisco, employed at the roundhouse, was severely beaten, chased to a point a mile away and then stripped of his clothes.

Masked men appeared at the roundhouse without warning and the guards and employes, overwhelmed and beaten, were forced into the open. They fled in every direction.

Feature Transactions on Livestock Exchange

A load of choice Angus steers averaging 1,121 pounds, was marketed yesterday by Harry P. Weyerich of Randolph, who not only topped the marketed price of \$10.25 per cwt. but received the highest price paid this year.

There were 22 head in the shipment. They were bought on the local market in January at \$5.85 a hundred when they averaged 720 pounds, and had made a gain in weight of an average of 401 pounds and of \$4.40 a hundred after six months of feeding.

A shipment of three loads of choice Hereford cattle was brought to the local market by Jens Silasen of Keystone, who made a gain in weight of 1,050 pounds and sold for \$10.10 a hundred.

Mr. Silasen has had several loads of cattle on the local market this season and was the first shipper to get \$9.25 a hundred for his cattle.

According to advices received at the stockyards, heavy snow in the mountains and in the foothills of Wyoming has greatly interfered with the movement of sheep in that state.

Mr. Silasen has had several loads of cattle on the local market this season and was the first shipper to get \$9.25 a hundred for his cattle.

RADIO High Frequency for Transmitting

Oscillation Generator Radiates Many Cycles for Modulation of Voice Over Transmitter.

Each transmitting station is made of a transmitter, oscillation generator, modulator and necessary antenna. The functions of the sending apparatus are described as follows:

The oscillation generator produces alternating currents of the high frequency necessary to start the radio waves from the antenna. Before the waves are radiated, however, the modulator acts on the alternating current which produces the waves, and molds this current into the shape of the sound of the speech or music.

In controlling the output of the oscillation generator by means of the modulator, it has been found that most of the sounds of the human voice in speech lie between about 200 and 2,000 cycles per second in frequency, and that musical sounds cover a range extending downward to several hundred cycles and upward to somewhat higher frequencies.

Quality of Voice. Thus for a broadcasting station working on 360 meters wave length, corresponding to a frequency of 833,000 cycles, there will be 833 cycles of the electromagnetic wave included in one cycle of a 1,000-cycle note which has been sung against the transmitter.

Thus for a broadcasting station working on 360 meters wave length, corresponding to a frequency of 833,000 cycles, there will be 833 cycles of the electromagnetic wave included in one cycle of a 1,000-cycle note which has been sung against the transmitter.

It is not necessary to have the speaker or singer whose voice is to be broadcasted from a radio telephone transmitter actually at the transmitting station. The voice currents can be sent over wire telephone lines from some distant studio to the transmitting station and can there be amplified automatically to control the outgoing wave.

WAAW Friday

There'll be a variety of talent in the ether Friday night when The Omaha Bee broadcasts another radio program from the Omaha Grain exchange station, WAAW.

Miss Grace Sorenson, editor of Children's Magazine and whose original stories have won popularity throughout the country, will read two of her favorite compositions for children. Miss Sorenson has won fame for her method of narrating original stories.

Mrs. H. A. Wendland, soprano singer, pupil of Prof. James E. Caroll, will entertain radio audiences with two classics, "Spring Time Is Song Time," by Polk, and "Dawn Light and Bird Song," by Speaks.

Miss Marguerite Carnal will accompany Mrs. Wendland on a piano furnished through the courtesy of the Schmolzer & Mueller company.

Another entertaining feature of The Omaha Bee's radio program Friday night will be two election numbers by Miss Francis Pearson, pupil of the Misner School of the Spoken Word.

The election program will begin sharply at 8:15 immediately following announcement of the market reports.

Hear Musical Comedy Melodies by Radio

San Francisco, Cal., July 13.—Piloted by Wallace B. Blood and O. E. Heinz, both of Detroit, two automobiles, one equipped as a radio receiving station and the other a supply car, arrived here today from the trip from Detroit.

The trip from Detroit was sponsored by the Detroit Board of Commerce, the Detroit Automobile club and the Lincoln Highway association. The automobiles were equipped with a radio receiving station and a supply car.

Bleeding Gums Made Well

New Antiseptic Brings Quick Relief

Amazing results in stopping gum bleedings are reported by those who have used Lykolene, the new antiseptic, as a daily mouth wash. The gums not only cease to bleed but become firm and healthy and a tendency to pyorrhea is reduced.

An Unfailing Way To Banish Hairs

Ugly hairy growths can be removed in the privacy of your own home if you get a small original package of delatone and mix into a paste enough of the powder and water to cover the hairy surface.

Canadians Would Make Armament Pact Permanent

Premier King Discusses With Secretary Hughes Agreement Limiting Defense on Great Lakes.

By ARTHUR SEARS HENNING. Washington, July 13.—A proposal to modernize and make permanent the century old Rush-Bagot agreement limiting the defensive armament of Great Britain and the United States on the Great Lakes and other boundary waters was made to Secretary of State Hughes Wednesday by Premier Mackenzie King of Canada.

Mr. King, accompanied by the Canadian minister of national defence, George P. Graham, called on the secretary of state and discussed not only this proposal, which was hospitably received, but controversies between the American and Canadian governments over fisheries and boundary waters on which there has been much diplomatic correspondence.

The St. Lawrence seaway also was discussed. Mr. King's position on this question was set forth in the following formal statement: "Though not the subject of formal discussion, it is understood that the St. Lawrence waterways project was mentioned in the conference. The position taken by the Canadian ministers is that as stated by the Canadian prime minister in the house of commons some weeks ago; it is an attitude neither of acceptance nor rejection of the project, but of postponement of its consideration."

Having regard to the magnitude of the expenditures involved and other far-reaching considerations, the present does not appear to the Canadian government an opportune moment in which to contemplate treaty negotiations on this subject as between the two countries.

Man Finds Insurance Policy Covering Loss by Tornado

Blountfield, Neb., July 13.—(Special Telegram.)—Carl Frahm, whose farm buildings were demolished in Saturday night's storm, was unaware that he had any windstorm insurance. In going through some papers he found a paid-up policy in a reputable company, covering loss of \$8,000. This policy had been taken out by John D. Reims, former owner of the farm, and was transferred to Mr. Frahm with the place.

Body of Congressman's Wife Brought Home for Burial

Hastings, Neb., July 13.—(Special Telegram.)—Representative W. E. Andrews arrived here today with the body of his late wife, Mrs. Mma Andrews, who died at Atlantic City last Sunday. He was accompanied by Miss Myrtle McCoy, sister of the late Mrs. Andrews. Funeral services will be held at the Andrews' home here, at 2 o'clock Friday afternoon.

Inflammable Soil Found on Ranch North of O'Neill

O'Neill, Neb., July 13.—(Special Telegram.)—Soil which burns with a bright flame when a match is applied to it was discovered by William Grutch on his ranch in Rock Falls township, north of O'Neill, while plowing Tuesday and residents of the township are greatly excited. The inflammable soil is in a field close to the ranch buildings. It burns with an oily odor. Samples have been brought to O'Neill and experts will endeavor to ascertain whether the soil is peat or oil impregnated.

Auditorium to Be Built for Gibbon Chautauqua

Gibbon, Neb., July 13.—(Special Telegram.)—The Gibbon Chautauqua association has named a building committee to erect an auditorium for this season's use. To finance the building fund a coal chautauqua program is being prepared. Former and present residents are being requisitioned for the program.

Hail Near Callaway

Callaway, Neb., July 13.—(Special Telegram.)—A half-inch of rain has fallen here. Crops are looking fine. A severe hail storm visited the community several miles northwest of Callaway, destroying corn and other crops.

High-Grade Wholesale Automobile Man Wanted

We want an automobile salesman to handle our wholesale automobile business on a large territory. We want a man with energy, ability—a man we can depend on—one whose past proves him to be a business man of ethical methods and integrity.

For such a man, here is an opportunity to become connected with one of the finest automobile firms in this locality, with branches in several cities. Compensation will depend upon results obtained not only in number of cars sold at wholesale, but by the upbuilding of good-will and a live dealer organization.

CURED BY A NATIVE HERB

On board a vessel bound for India recently a man was bitten by a poisonous reptile; both the ship doctor and a famous surgeon failed to control the poison fast spreading through his system.

In a day the vessel reached port. An Indian medicine man was sent who quickly allayed the poison and the man's life was saved.

Roots and herbs are nature's assistants in combating disease. That well-known medicine for ailments peculiar to women, Lydia E. Pinkham's Vegetable Compound, is prepared from roots and herbs, possessing medicinal properties of great value in the treatment of such ailments.

This is proved by the letters of recommendation we are continually publishing in this paper for it.

Candidate Reviews Growth of Nebraska

Broken Bow, Neb., July 13.—(Special Telegram.)—George A. Williams, republican candidate for secretary of state, was the guest of the Rotary club here and spoke on the marvelous growth and development of Nebraska in the last 50 years from the "great American desert" to one of the leading agricultural and livestock states of the union.

In addition to 60,000,000 bushels of wheat, 210,000,000 bushels of corn, 70,000,000 bushels of oats and 10,000,000 bushels of potatoes, Nebraska produced 200,000,000 pounds of sugar in 1921, he said. Nebraska has the second largest livestock market in the world, the third largest packing industry, the largest butter factory, the largest broom factory, the largest incubator factory, the largest macaroni factory and the largest index tag factory in the world.

The poultry and dairy products of Nebraska, annually, exceed the gold and silver output of the nation. The corn crop of Nebraska exceeds the coal output of the nation.

Mr. Williams spoke later before the public service club on the fundamentals of the United States government and the importance of safeguarding the guarantees of liberty and freedom.

First National Bank of Spencer Is Closed

O'Neill, Neb., July 13.—(Special Telegram.)—The First National bank of Spencer, Boyd county, of which Frank H. Woods is president, was closed today. Its capital was \$10,000 and surplus \$20,000. Its recent statements have shown \$400,000 in loans. The bank has been in bad shape for some time.

Judge Leslie C. Dorsey is the Man. The Right Man for the Right Place. A Vote for Dorsey is a Vote for Law and Order. VOTE for Judge DORSEY for ATTORNEY GENERAL. Judge William C. Dorsey, Lincoln, Nebraska. My dear Judge: Your favor of recent date, advising me of your candidacy for the office of Attorney General was received in due time, and I want to assure you that it gives me great pleasure to find that one of your experience and ability is willing to become a candidate for an office to which there is so much work and responsibility attached, and that from a financial standpoint is so unburdened. The office of Attorney General of this state is regarded as one of the most important offices, if not the most important office, in the State. Your experience as a practicing lawyer, a Judge of the District Court, Commissioner of the Supreme Court and that of the individual returned by the Grand Jury to this county as a member of the State Bar, are qualifications for the office of Attorney General of this State as few men are qualified. I had an opportunity to observe the manner in which you handled the State's litigation in the cases you have been conducting in this county, and I think it is due you that I should express my appreciation of the able, vigorous manner in which you have discharged your duties. If elected, as I trust you will be, I shall feel that with kind personal regards, I am, yours truly, Charles S. Smith, REPUBLICAN Candidate for ATTORNEY GENERAL.
