

High Court Rules Lincoln Municipal Coal Yard Illegal

Instructs Lower Court to Enjoin City Perpetually from Engaging in Fuel Business.

Lincoln, July 19.—(Special Telegram.)—Lincoln's municipal coal yard, established by City Commissioner Charles W. Bryan, the alleged success of which he used as one of his chief arguments in his race for democratic nomination for governor, was declared illegal in an opinion given today by the Nebraska supreme court.

The court held that the ordinance establishing the coal yard is invalid and remanded the case back to the Lancaster county district court, with instructions to enter a decree perpetually enjoining the city of Lincoln from conducting a fuel business.

The Lancaster county district court held the ordinance valid and denied the petition for injunction filed by all of Lincoln's private coal dealers when the case was tried before it.

The argument was based largely on a section of the city charter which granted council the right "to possess and exercise all the legislative powers and duties."

This, Bryan contended, granted power to establish the coal yard. But the supreme court said in its opinion today: "This does not confer legislative authority beyond that necessary to the exercise of the powers especially enumerated in the charter."

Continuing, the supreme court held there is no place in the charter specifying that the council had power to establish a municipal coal yard.

Mysterious Shooting of Man Investigated

Grand Island, Neb., July 19.—(Special Telegram.)—An unidentified man with a companion, Walter Carson, 26, badly wounded by a shotgun charge, applied for aid at the home of a farmer in the vicinity of Alda early Wednesday morning. It was feared Carson might bleed to death.

The farmer summoned Sheriff Lorenz from Grand Island.

The men at first declared they had been "bumming" their way on a freight train and were kicked off and shot at by a brakeman. Upon investigation, the sheriff found a automobile, shot-riddled and loaded with Columbus beer, some distance from the farmer's home.

Officers who are investigating the case say they believe the man who did the shooting has escaped. They say they are of the opinion the fray was the result of a quarrel between bootleggers.

Several men, whose names have not been divulged, are in custody here. The beer has not been tested as to alcoholic content.

Officers Installed by Randolph Rebekah Lodge

Randolph, Neb., July 19.—(Special.)—The local Rebekah lodge installed officers at its meeting here, Monday evening, at 8 o'clock. The officers are: Mrs. C. E. Van Slyke, noble grand; Mrs. Mable Wintz, vice grand; Mrs. S. C. Cox, chaplain; Miss Lena Hiward, warden; Mrs. Mae Coash, conductress; Mrs. O. O. Reed, R. S. N. G.; Mrs. J. A. Farrow, L. S. N. G.; Mrs. Anna Hall, R. S. V. G.; Vena Warner, L. S. V. G.; Mrs. Martha Helms, inside guardian; Mrs. Theodora Black, outside guardian. Following the installation ceremonies a luncheon was served.

Man Exonerated of Murder Sent to Insane Asylum

Central City, Neb., July 19.—(Special.)—Ed P. Hill of Silver Creek, recently exonerated in the Boone county court of the murder of Bookey V. Cooley, was given a hearing before the Merrick county insanity board and judged insane. Transportation was arranged for his immediate removal to Engleside. Ever since the trial Mr. Hill has been acting queerly. Recently he has been heard to make threats of violence, and at times centered his whole attention on the construction of miniature jails, which he would destroy in a fit of rage.

County Must Bear Expense of Municipal Court Rooms

Lincoln, July 19.—(Special Telegram.)—Douglas county commissioners must provide the new municipal judges with courtrooms at the county's expense under an opinion handed down by the supreme court today affirming a decision of the Douglas county district court. The supreme court held that the expense is merely the agent of the state and the municipal courts in Omaha are a part of the state's judicial system, the expense of which must be borne by the county.

Embarrassing Hairs Can be Quickly Removed

(Beauty Culture)
Hairs can be easily banished from the under-arms, neck and face by this quick, painless method: Mix into a stiff paste some powdered delatone and water, spread on hairy surface and in 2 or 3 minutes rub off, wash the skin and it will be free from hair or blemish. Excepting in very stubborn growths, one application is sufficient. To avoid disappointment, buy the delatone in an original package and mix fresh.

DANDRUFF

Disease germs attack the scalp, destroying the hair growth, causing itching, dandruff, premature hair loss, and itching scalp. The rich lather of Hunt's Medicated Soap carries with it the very hair roots and the combination of medicinal ingredients to correct scalp troubles, causing luxuriant hair growth and insuring that consistency of the hair that indicates the proper hair health.

Number of Condenser Plates Is Not Alone Factor in Determining Inductive Capacity

Experimenters have become so accustomed to buying apparatus of a certain make that when they want a condenser of say .001 microfarad capacity, they at once think of a condenser having 43 plates. Likewise they think a condenser must have 23 plates in order to have a capacity of .0005 microfarad.

This idea is erroneous, for there are several other factors that determine condenser capacity besides the number of plates.

Three Factors. The essentials of a condenser are shown in the illustration. This consists of two metal plates separated by an insulating medium or dielectric, which in this case is air. Now capacity of such a condenser depends on

IN SERIES. IN PARALLEL.

three factors—the area of the dielectric, the nature of the dielectric and the thickness of the dielectric. Dielectrics have what is known as an inductive value or dielectric constant and this value is calculated by the relationship of the capacity values of the different dielectrics to that of air at ordinary pressure, which is considered as having a value of 1.0. On this basis a dielectric of paraffined paper would make a condenser having a capacity 3.65 times that of air; mica would make a capacity from four to eight times; hard rubber about 2.5 times, etc. You can now readily see how such very small condensers can be made having a comparatively high capacity by using a mica dielectric.

Condensers for tuning purposes with receiving sets almost invariably have a dielectric of air, as this substance incurs the least losses, so that factor we need not further consider. But there are two other factors that are of equal importance—the area of the

plates and the spacing of the plates. The greater the area of the plates, the greater the capacity, and also the closer the plates are together the greater the capacity. Mechanical considerations must be met with when spacing the plates so that a certain distance must be allowed for the sake of mechanical stability, to prevent the plates from touching.

When buying condensers keep these thoughts in mind and choose by the capacity rating instead of by the number of plates. Some variable condensers of .0005 mfd. capacity have 23 plates, while others of the same capacity have but 15, and the condenser with the lesser number of plates will serve every purpose as well as the one with the greater, constructional details being equal.

Feature Transactions on Livestock Exchange

Emil Marotz, veteran stock raiser of Hoskins, was on the market with 90 head of heavy heaves averaging 1,378 pounds for which he received \$10.50 a hundred, the high price of the season for cattle of that weight.

Mr. Marotz said he bought the cattle on the local market the latter part of last November when they averaged 850 pounds and cost \$6.35 a hundred. They were fed on a ration of corn and alfalfa and a small quantity of oats.

"In the 30 years I have been farming and raising cattle," said Mr. Marotz, "I found that it always paid best to feed crops to livestock in preference to sending them to the grain market. In my neighborhood the oats are looking fine, corn is in good shape and the pastures are in excellent condition."

Two carloads of yearlings brought in by C. J. Jernberg of Clayton, N. M., one of the first shipments to be shipped direct from the New Mexico range, were marketed at the local yards Wednesday. The cattle were all sold as feeders at prices ranging from \$5.75 to \$6.75 a hundred.

"I expect to see more cattle shipped to Omaha from the southwest to the local market this season than ever before," said Mr. Jernberg.

A shipment of 29 head of Polled Angus yearling heifers averaging 852 pounds, brought in by John Krenk of Dwight, set a new price for heifers this season on the local market when they sold for \$9.65 a hundred.

Two loads of heavy steers averaging 1,341 pounds were brought to the local market by L. F. Sherlock of Emerson and sold for \$10.50 a hundred.

Mr. Sherlock said the cattle he brought in cost him \$5.55 a hundred and sold at his feed lot last November and they averaged a gain of 570 pounds since they were on feed.

Occupants Unhurt When Motor Goes Into Ditch

David City, Neb., July 19.—(Special.)—A Dodge sedan, carrying Walker Bennett, Clifford Deford, Lyllith Davis and Helen Miles skidded into a ditch while passing another car and turned over. Bennett was driving and his endeavor to get out of the ditch caused the accident. The young persons climbed out of the top of the car. Aside from a few bruises, none of them were hurt. The car is badly damaged.

Supreme Court Affirms Penitentiary Sentence

Lincoln, July 19.—(Special Telegram.)—The supreme court affirmed the penitentiary sentence imposed by the Thomas county district court on Jeremiah L. Heilman, former Thomas county treasurer. The sentence is one to 21 years in the penitentiary. Heilman was found guilty of embezzling \$11,372.59 of county funds.

Wheat Stacks Burn

Beatrice, Neb., July 19.—(Special.)—Several stacks of wheat were destroyed by fire on the farm of Harry Larson five miles northeast of Beatrice. The fire was started by a bolt of lightning which struck one of the stacks. The loss is covered by insurance.

Idle rooms are not profitable; let an Omaha Bee "Want" Ad find a desirable tenant for you.

Aberdeen May Run Own Tram System

Citizens Petition Bond Election When Abandonment of Service Threatened.

Aberdeen, S. D., July 19.—(Special.)—Aberdeen may be the first city in South Dakota to own and operate a street railway system.

Street car service was established in Aberdeen some years ago by a private company composed of Aberdeen men, including Charles W. Herold, former governor of South Dakota.

The venture has not proven a success and the company had to borrow funds to keep the cars running on several occasions.

Recently the owners of the traction system gave notice that unless business improved they would be compelled to stop operating cars on September 1. In view of this, a number

of citizens circulated a petition asking the city commissioners to have an expert make an appraisal of the property of the street railway company, with a view to ascertaining the amount needed, and then call a special election to permit the voters to decide whether or not the system should be purchased by the city and operated as a municipal project.

The petition has been filed with the city commissioners, who have adopted a resolution providing that the city employ an expert to appraise the present value of the property of the street railway company and ascertain the earning capacity of the system.

Kearney May Have to Rebuild Water Plant

Kearney, Neb., July 19.—(Special.)—Kearney may have to entirely rebuild its water works plant. Services of an expert consulting engineer have been secured thoroughly to inspect the plant and determine if entirely new mechanical equipment will be required, or if a few replacements and repairs will suffice.

The plant has been in operation over 30 years, municipally owned over 10 years, and during all that time no machinery replacements were undertaken. Now it is beginning to show signs of depreciation and wear. No provisions were made in all these years to take care of the tremendous increase in water consumption.

If necessary, the commissioners are prepared to call a special election and vote bonds for the erection of an entirely new plant. However, they hope to avoid such expenditure for the present.

Boy Drowns in Pond

Sturgis, S. D., July 19.—(Special Telegram.)—Jack Lewis, 10, son of George Lewis of Sturgis, fell from a raft in a pond on Elk creek and drowned. The body was recovered half an hour later, but too late to be resuscitated.

Sparks

With a population of only 120, Triton da Cunha, the British island in the middle of the south Atlantic, will have a radio station. Its population is mostly descendants of Napoleon's St. Helena guards.

More than 600,000 receiving stations in the United States! This is the estimate of experts. The output of manufacturers only marks the limit to which receiving stations will go.

Very interesting and various effects in directional control of reception can be obtained by pointing a loop aerial around the diameter of a circle. The variety is secured, however, only if the signals are sufficiently loud, two degrees each of radio and audio frequency are most desirable with a loop aerial.

Mother-To-Be, Read This—

Here is a wonderful message to all expectant mothers. When the little one arrives, you can have that moment more free from suffering than you have ever known. An eminent physician, who has spent his life in the study of the science of child-bearing, has shown that the use of the Rupture Supporter, which is a simple, comfortable, and effective device, will relieve you of all pain and suffering during the process of child-bearing. It is a most wonderful discovery, and one that every mother should know. It is the only device that has been shown to be effective in relieving the pain and suffering of child-bearing. It is a most wonderful discovery, and one that every mother should know. It is the only device that has been shown to be effective in relieving the pain and suffering of child-bearing.

If Ruptured

See Free Demonstration of Remarkable Appliance at

ROME HOTEL
OMAHA, NEB.
July 22, 24 and 25

If you are ruptured and wear a truss, now is your opportunity to get a FREE TRIAL of the most scientifically constructed Rupture Supporter ever invented. It embodies most principles sought after by all leading truss manufacturers.

It is absolutely guaranteed to hold under all conditions and afford proper protection at all times.

It is positively the most comfortable for every day wear at all kinds of work.

Can be worn nights with no discomfort.

It is guaranteed not to slip out of place under any circumstances.

Pad is made of soft, resilient material, light, durable and comfortable. Does not chafe, and does not irritate. It is designed and shaped to fit and give pressure at the right spot so the bowel cannot possibly escape.

The pressure is easily adjustable to all positions and movements of the body, with no binding, cutting or chafing. Pressure can be increased or lessened at will.

If you would appreciate the fit and comfort of the most perfect rupture holding support ever designed for ruptured sufferers, then come to the Rome Hotel Saturday, Monday or Tuesday, July 22, 24 or 25. Representatives of the Company are coming to the Hotel to give all who call an absolutely free trial. No obligation whatever and it doesn't cost you one single penny to have this wonderful rupture invention fitted to your particular case of rupture. We want to convince you that there is nothing better. Hundreds of thousands in use all over the civilized world and thousands are throwing their old-fashioned trusses on the scrap heap after adopting this scientific Rupture Supporter. No ruptured person can afford to miss this opportunity.

Call and see the exceptional merits of this guaranteed Rupture Supporter. It has no equal and is being recommended by physicians and druggists everywhere. You are invited to call from 9 to 12 A. M., 2 to 5 P. M., or 7 to 9 P. M. You don't get yourself under the slightest obligation by accepting this invitation. The test costs you nothing.
