

General Strike Urged by Central Union of Omaha

Resolution Calling for Country-Wide Walkout of All Labor Passed at Meeting.

A resolution calling for a national strike at the earliest possible date "in order that this warfare upon the American home may cease," was adopted by the Omaha Central Labor union meeting Friday night.

The Central Labor union calls upon the executive council of the American Federation "immediately to set in motion the machinery which shall bring the full power of labor to bear in one grand national protest against the slavery conditions that are being imposed upon us."

Commenting on the resolution following its passage, John M. Gibb, president of the Central Labor union, declared that he and other members of the body were convinced that a national lockout is being attempted by big business in this country in an effort to break unions.

He called attention to the reported wholesale discontinuance of trains, asserting that this was virtually a lockout aimed at the trainmen, who automatically are being thrown out of employment. "We feel that we might as well go out now as be thrown out later," said Gibb.

The resolution calls attention to strikes of the railway department of the American Federation of Labor, the textile workers in New England and the United Mine Workers of America, and to "many other strikes, authorized and unauthorized, that are spreading and fast becoming universal."

To Use Full Power.
"The president of the United States now informs us through the medium of the public press that it is his purpose to use the full power of the government, both military and judicial, to intimidate and oppress a free people and to bend them to his will," continues the resolution, "that the American standard of living must be reduced. The doors of the United States treasury have been thrown open for the relief of big business as represented by the railroad owners and we are facing a condition bordering on slavery."

Copies of the resolution are to be made, telegraphed and mailed to the American Federation of Labor and all its departments, the brotherhoods of locomotive engineers, firemen, trainmen, conductors, to every central labor union in the United States for endorsement and support, it was decided.

"We pledge our lives, our liberty and our sacred honor to the establishment, maintenance and defense of a living rate of wages in the United States," concludes the resolution.

5 Die in Railway Crash in Missouri

Springfield, Mo., July 22.—(By A. P.)—Engineer C. H. King and four passengers, all members of one family, were killed and several passengers injured early today when St. Louis-San Francisco railroad passenger train No. 2, Texas special, east-bound, and No. 9, Meteor, west-bound, met in a head-on collision 200 yards east of Logan, Mo., where No. 2 was waiting on the main line.

The dead are Mr. and Mrs. Andrew Hammer, Stoutland, Mo., and two small sisters of Mrs. Hammer, and Engineer King of Sapulpa, Okla. The first official report of the accident reaching the Frisco general offices building here this morning stated that the wreck was caused by No. 9 failing to take the side track at Logan. Passenger train No. 2 had arrived at Logan at 3:43 o'clock and was standing on the main line when No. 9, failing to take the siding, crashed into it.

World Wheat Harvest for 1922 to Show Increase

Washington, July 22.—The estimated 1922 wheat harvest for all countries for which figures are available shows a slight increase over production for the same countries in 1921. Department of Agriculture statistics just issued show these countries' crops of wheat will aggregate about 2,753,386,000 bushels this year compared with 2,724,506,000 bushels last year and with a five-year average ending with 1913 of 2,557,577,000 bushels. Russia is not included in the estimates. Wheat acreage for the countries for which statistics are available is about 191,000,000 acres, which shows a general decrease compared with 1921.

Hitchcock Makes Attack on Seal Dyeing Company

Washington, July 22.—An investigation of the contract between the federal government and the Fouke company of St. Louis, under which the company received \$20 for treating and dyeing the skin of each seal killed by the government annually on the Pribiloff Island was urged yesterday in the senate by Senator Hitchcock, democrat, Nebraska, and the promised by Chairman Jones of the commerce committee. Senator Hitchcock charged that through this arrangement the St. Louis company received the lion's share of the profits from the industry.

Australia Bans German Consuls as Trade Agents

London, July 22.—The Australian government has refused to agree to the appointment of German consuls in Australia, says a Reuter's dispatch from Melbourne.

RADIO Range of Radio Is Chief Interest

Beginner in Wireless First Studies How Far Receiver Will Listen in on Concerts.

The first question asked by the radio enthusiast about receiving apparatus is generally relative to its range.

The dealer may answer this by giving some attractive distance, or he may be more honest and tell his customer the limitations of the apparatus that might be expected from it under varying conditions.

The fact is, however, that the range of any set, no matter how good or how poor, cannot be guaranteed and an estimate is no more than a guess.

Two sets, identical in every respect, may have a widely different range when set up in different localities. You may have a set that gives very good results, and you move to a house maybe only a few blocks distant, only to find that your set is almost useless. This may be due to the fact that you were not able to erect as good an aerial in your new location as in your old, or your ground may not be as good. Possibly there are high buildings about you that cut off a portion of the wave.

Under given conditions you can shortly ascertain the working or reliable range of your set. You will find that there are some stations that you can hear with practically all conditions. This distance you may call your reliable range, although it may seem considerably lower than the range advertised by irresponsible dealers and manufacturers.

Determining Factors.
At times you may hear remarkable distances with quite good intensity, but these results cannot be depended upon, so, therefore, they must be classified under the variable range of your set.

There are many things which determine the range, among which are atmospheric conditions, time of day, local conditions, neighboring obstructions, topography of the surrounding country, and the nature of the aerial and ground. Reception or transmission can seldom be carried on over as great distances during the daytime as during the night. This is thought to be due to the ionization of the air particles due to the action of the sun's rays, this effect causing a partial absorption of the waves. Buildings with steel frameworks also tend to absorb waves. The topography of the country has a decided effect on radio. Waves travel much more readily over water than over land. Metal and mineral deposits, sometimes cause absorption losses.

The importance of a good aerial and ground cannot be overestimated, as this greatly affects the range of a set. You cannot expect to get as good results with an indoor aerial or a loop as with one that is located outdoors.

China's Wheat Crop Above Normal; Jap Finances Better

Washington, July 22.—China's crop conditions are favorable and the financial situation in Japan has improved, the Commerce department was informed today by its representatives in the far east. The wheat crop in China is above normal. Commercial Attaché Arnold at Peking reported, thus precluding any material demand for American aid. It is not now expected, he declared, that there will be any decided improvement in business conditions generally in China until sometime after the fall or the beginning of the next year. The condition of China's finances, he asserted, was well reflected in the present attempt to utilize the estimated increased income in customs tariff now under revision, as security for a bond issue to cover defaulted government loans.

Alleged Robber Held for District Court at Sturgis

Sturgis, S. D., July 22.—(Special Telegram.)—Adison Adair, charged with robbery committed upon O. P. Egan Wednesday, was given preliminary hearing this afternoon, pleading not guilty. He was bound over to the next term of the Meade county circuit court. His bond was fixed at \$10,000. He was unable to give bond and will remain in jail.

Marilyn Miller on Way to L. A. to Wed Pickford

New York, July 22.—Miss Marilyn Miller, dancer and musical comedy star, was on her way today to Los Angeles for her wedding on August 1, to Jack Pickford, motion picture actor, brother of Mary Pickford. A member of her party stated that the wedding would take place in the home of Douglas Fairbanks and that Miss Miller, after her marriage would continue her stage career.

A Baby Full of Pep

New York, July 22.—David Farber wheeled his baby carriage down Fourth street and had so many men looking under the top to see what it contained that the police got suspicious. They looked in, took David to the police station and there told the lieutenant that while Farber had a carriage and a bottle, he had no baby. He was selling liquor out of the bottle at 30 cents a "shot," they declared, so he was taken to court and held in \$1,000 bail for the grand jury on a charge of violating the prohibition laws.

Moderation
WHEN any of us pass beyond the Bounds of Moderation in the conduct of our affairs, somebody will be hurt.

It is possible to be firm and urgent when we are sure that we are right, but when there is a middle course of fairness to take it will be a saving from muddles and troubles.

"Moderation," it has been said, "is the silken thread through the pearl chain of all virtues."

When once we pass the gates of moderation because we know that we may justly claim what we believe to be our rights, we may lose the presence of the guardian angel that has so often stood by us and helped us out.

New Laces
We are featuring a new Russian filet in ecru color that is effective trimming for dresses. It may be used to advantage in curtains and table runners also. One may choose either, the rose design or a Greek pattern. Priced—
12-in. width, yd., 65c.
