Army Worms Are Being Found in Parts of State

College of Agriculture Outlines Methods of Fighting Pests in Fields.

Owing to the cool spring and unusually moist spring and summer prevailing over the most of Nebraska, the army worm, which flourishes during such seasons because its parasites are held back when the weather is not warm and bright, has put in an appearance in many parts of the state. Entomologists at the University of Nebraska agricultural college say that the worm at this time present in the fields belongs to the second brood or generation of the year. This brood, they say, usually reaches the destructive stage during the last few days in July or in early August, and continued activity until the middle of August.

The army worm is so-called because it has the habit of traveling in masses or armies, devouring almost everything before it as it goes. While such movements may occur in the daytime, they usually occur at night. Entomologists claim that the best way to deal with the army worm is to stop them up with furrow barriers and poison them with a poisoned mash of bran. When they are moving in a field, the experts advise that parts of the field unaffected may be protected by plowing several deep furrows between the army worms' main line and the unaffected field. Post holes are sunk in the furrows, spray with kerosene as they reach the furrow.

North Nebraska Harvest Is On

Rains Practically Insure Big Corn Crop—Oats Supply Is Short.

Norfolk, Neb., Aug. 12. (Special)—The annual harvest in north Nebraska and southern South Dakota is over and threshing is on in full blast all over the district. Rapid progress is being made in the final harvesting of grain. An unusual number of new separators have been unloaded in various parts of the territory. Suitable threshing weather has been taken advantage of by the threshing outfits, and farmers who have rested during the heat of the day, are busy during the cool of the evening. Good yields and fine quality is the report from many fields, although there is a general shortness of oats. Wheat in some parts of southern South Dakota has yielded around 35 bushels to the acre. The first load of what marketed near Winner, S. D., tested 60 and the yield around 35 bushels to the acre. Some local marketed was tested at 62 at what elevators. A number of rye fields are reported to yield from 20 to 25 bushels per acre.

Pawnee County Farmers' Union Will Hold Picnic

Table Rock—Preparations for the Farmers' Union picnic to be held near Violet August 22, are well under way. C. J. Osborn, state president, and C. McCarthy, manager of the state exchange, are to be the speakers. Music will be by the Pawnee City band, and there will be two ball games. A watched game of horseback pitching between Pawnee City and Burrhead is expected to be the center of attraction with the racing events, will stretch a full day's entertainment.

Harvest Festival Week Is Plan of Burgess-Nash

Burgess-Nash company is planning a harvest festival week, October 21 to 28. This store realizes the importance of agriculture in our economic life; realizes that unless agriculture prospers, no other industry prospers. This store also believes that there is still pride in achievement, that the individual who excels should have recognition.

Table with 3 columns: Name, Quantity, Price. Lists various agricultural products like wheat, corn, and beans with their respective prices.

County Agents' Notes

Members of farm boys' clubs in the state will be interested in knowing that the American champion boys' judging team, which won the national stock judging contest at the Atlanta fair, has succeeded in winning the boys' livestock judging contest at Cambridge, England, in open competition with the English boys' team. This occurred on July 5.

SAUNDERS COUNTY.

Wheat—A number of farmers in Saunders county are reporting a considerable amount of wheat according to the County Agent, H. R. Roberts, and Edith Cone. They have prepared a formula for combating this trouble in the wheat that is to be planted next season.

FRONTIER COUNTY.

Stockville—The Frontier county Farm bureau, with the cooperation of the residents of Stockville, put on a one-day chautauque and picnic. W. M. Gaines delivered a lecture on vitiated agriculture to a crowd of 2,000 persons. Farmers from all over the county were present and talked over with the speaker on various subjects.

FILLMORE COUNTY.

General number of clubs, both junior and senior, are working hard to get their clubs ready for the state fairs in both the county and state fairs.

WASHINGTON COUNTY.

Washington county agents have been called upon to do all kinds of tasks, but the job that was placed in the hands of W. W. Thompson, county agent, here several days ago, was a single for all others. Mr. Thompson says a farmer called the Farm bureau office with a request that the agent analyze a sample of drinking water. The farmer thought the water was bad. Mr. Thompson sent the water to the state laboratory and the test was made and reported to the patron.

COLFAX COUNTY.

Colfax county agents are holding a picnic at the Colfax county fair grounds. The picnic will be held on August 15.

Sultan Telivo Qualified for Silver Medal

University of Nebraska Junior Herd Sire Has Three Daughters With Production Records.

Sultan Telivo 152511, the junior herd sire of the University of Nebraska Agricultural college herd, has recently qualified for a silver medal by having three daughters complete high production records and give birth to calves within 14 months. Sultan Telivo's daughters have established a remarkable record as junior 2-year-olds with their first calves. The daughters, which were owned and tested by J. J. Van Kleck of Heaverton, Ore., produced as follows:

Chicago Grain

By CHARLES D. MICHAELS. Omaha Bee Lead Wire. Chicago, Aug. 12.—Lack of aggressive support rather than any material pressure was responsible for a break in all grains to new low figures for the season. Scattered liquidation was in evidence at times but the break was due to the markets sinking under their own weight.

CASS COUNTY.

Wheat—Water in Cass county farmers who purchased a carload of No. 2 wheat last year are well satisfied, according to L. H. Burdette, county agent. The wheat was of the variety known as 'Cass' and was of the variety known as 'Cass' and was of the variety known as 'Cass'.

SALINE COUNTY.

Saline county agents are holding a picnic at the Saline county fair grounds. The picnic will be held on August 15.

Strike Checks Movement.

September wheat was in a premium over the December, due to apprehension on the part of shorts as a result of the rail strike. Strike of motive power is curtailing the movements of the country. Report markets was not large and premiums on spot here little changed. A rally which came toward the close was due mainly to weakness existing on the part of shorts. Sentiment on the whole remains bearish.

Omaha Day Market.

Omaha day market. Grain—Wheat—No. 2 hard, 1.04; No. 2 soft, 1.03; No. 3, 1.02; No. 4, 1.01; No. 5, 1.00; No. 6, .99; No. 7, .98; No. 8, .97; No. 9, .96; No. 10, .95; No. 11, .94; No. 12, .93; No. 13, .92; No. 14, .91;
