

Poisoned Liquor Stories May Draw Fire of Congress

Haynes to Be Asked for Evidence on Which Terror Propaganda of Department Is Based.

Washington, Sept. 12.—(Special Telegram) — Federal Prohibition Commissioner Haynes is to be asked for evidence to corroborate stories in the "frightfulness propaganda" which the department is putting out to deter the use of bootleg liquor.

The latest story to arouse congressional interest is that alcohol used in universities to preserve cadavers is being shipped as a beverage throughout the middle west.

Members of congress say that if the reports are true, there should be legal action at once to prevent this revolting use of alcohol and to punish the men responsible.

U. of M. Is Mentioned. According to the story, 450 gallons of this loathsome fluid was shipped to Des Moines after being distilled from alcohol obtained from the University of Minnesota.

Members of the Minnesota delegation, including Representative Volstead, today denied having heard such a rumor and resented the inclusion of the university in such a story without investigation.

Iowan Called on. Members of congress who are questioning this form of propaganda, say that if one-half of the stories told by the commissioner's office are true, a large portion of the population of the United States is headed straight for the cemeteries.

Glen A. Bronson, prohibition director of Iowa, has been asked to supply the Washington office with information.

Cricket Hicks came home Saturday evening from Tickville wearing a new hat. It does not become him at all, and makes him look like a squirrel, but he doesn't care, because the clerk told him it was the latest style.

The Tickville town marshal is back on the job after a much-needed rest, and all who need arresting are invited to call on him day or night.

Tobe Mosely says he has been in existence a long while and has seen a good many things, but that he has never yet run across a square pill.

Tobe Mosely's wife says a man will complain about the unbearable hardships of married life, but that very few of them fail to marry the second time if they get a chance.

ADVERTISING SIMPLE WAY TO GET RID OF BLACKHEADS

There is one simple, safe and sure way that never fails to get rid of blackheads, that is to dissolve them. To do this get two ounces of calomel powder from any drug store—sprinkle a little on a hot, wet sponge—rub over the blackheads briskly—wash the parts and you will be surprised how the blackheads have disappeared.

How to Keep Well

Questions concerning hygiene, sanitation and prevention of disease, submitted to Dr. Evans by readers of The Bee, will be answered personally, subject to proper limitation, where a stamped addressed envelope is enclosed. Dr. Evans will not make a diagnosis nor prescribe for individual disease. Address letters in care of The Bee.

IS POVERTY INHERITED?

If inheritance counts for anything we, here in America, are headed for the scrap heap, according to H. N. Hart of the University of Iowa.

Hart warns against drawing too general conclusions from too small a group of women in such a limited section. But let us read what he found, and form our own opinion as to whether the 1,000 women inquired about were a fair sample.

He found that the poor have more children than the rich. Furthermore, that the rule was that poverty was inherited, after a way of speaking. The children of the poor tended to remain poor throughout their lives and to beget children that, in turn, remained poor.

Occasionally children born in a poor family will learn habits of thrift, will develop acquisitiveness and, in time, largely as the result of environmental influence, will become rich, but they are exceptions.

The rule is that inheritance counts—the poor beget poor, and before long a poverty rut is established. Another observation was that the ignorant and poorly educated had high birth rates. The highly educated had but few children.

A third observation was that the native or old stocks had a very low birth rate. The foreign born and their immediate descendants had high birth rates.

A fourth was that the rural birth rate was higher than that of the city. But when the rural birth rate was further analyzed, it was found to be high among the tenant farmers, and low among those who owned the land.

The summary of the important conclusions is that the babies are being born to the women who are poor, uneducated, foreign born, tenant farmers.

To his mind, this spells progressive, racial, social degeneration. Of course the investigation was made by one who holds the old order in high esteem. That is natural.

Most of us who belong to the old order feel the same way about it. There are those who think the race, in so far as there is an American race, needs the infusion of foreign blood. The only proof that is needed of it is the fact that the birth rate of the old stock has fallen to or below the maintenance level.

But we will all agree as to the harmfulness of those ignorance and poverty barriers. Beyond doubt, economic barriers are higher than they have ever been in our history. The poor boy still has a gambler's chance, but he plays against higher odds than he did 50 years ago.

Likewise, while education is freer and more nearly universal than ever before, the acquisition of an education sufficient to make one stand out is not so easy.

Arsenic For Eczema. S. T. J. writes: Physicians advise taking of Fowler's solution of arsenic for persons who are afflicted with eczema, about 4 to 8 drops before each meal.

causes hay fever. It is one of the least important causes.

Starch in Foods. Walter writes: I have to restrict the use of starchy foods on account of boils.

REPLY. Butter and other fats, none. Lettuce, cucumbers, tomatoes, spinach, asparagus, sauerkraut, greens, celery, okra, cabbage, radishes, string beans, grapefruit, olives, and some nuts, 3 per cent or less.

REPLY. Pumpkins, turnip, squash, beets, carrots, onions, oranges, berries, peaches, pineapples, and nuts, between 5 and 10 per cent.

REPLY. Pears, parsnips, apples, pears, cherries, raspberries, almonds, and walnuts, between 10 and 15 per cent. Potatoes, peas, corn, boiled rice, bananas, and peanuts, 20 per cent. Breads and cereals, 40 to 80 per cent.

Carl Gray to Remain With Union Pacific

A dispatch from Montreal, Quebec, received here late yesterday, stated that Carl R. Gray, president of the Union Pacific system, is to head the Canadian National railway. Rumors to this effect have been current for several weeks.

President Gray denied the report, however, in the following statement: "I have not accepted and am not considering any proposition from Canadian National lines. Have no intention of leaving the Union Pacific."

First Issue of Central High Weekly Out Today. The first issue of the Central high school paper, The Register, will be on sale this morning. The publication is

a weekly, put out by the journalism class. The paper contains seven columns, two columns more than last year and is printed on regular newspaper paper. This morning's issue, being published before the regular subscription campaign, was sold for 5 cents a copy.

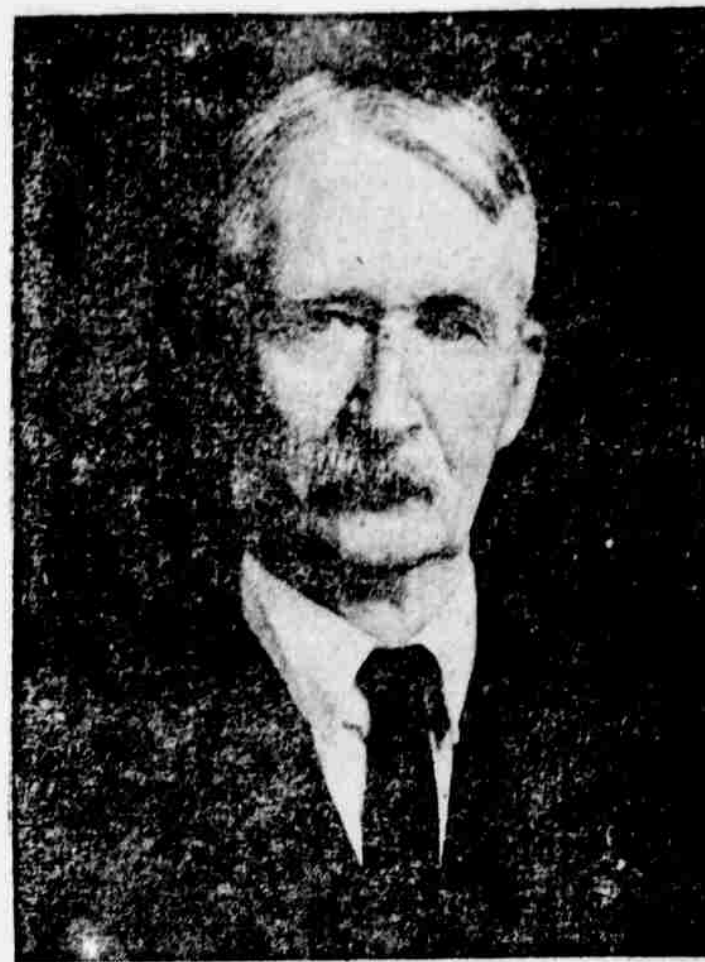

STUTZ

THE owner of a Stutz knows that the capacity of its famous power plant is so much greater than any demand he will ever make of it that the swiftest sustained speeds become a mere loafing pace for the Stutz "D-M" Engine, assuring absence of strain, lengthened life and far less service attention.

JUDGE SEARS for CONGRESS

WILLIS G. SEARS, DISTRICT JUDGE REPUBLICAN CANDIDATE FOR CONGRESS

TO MY FRIENDS AND NEIGHBORS IN DOUGLAS, WASHINGTON, AND SARPY COUNTIES; THE SECOND CONGRESSIONAL DISTRICT OF NEBRASKA.

Now that I have been nominated as your candidate for Congress, I write this letter to request your earnest, active support of my candidacy.

For a large part of my life I have served you in one public capacity or another. Part of the time as a member of the State Legislature and as Speaker of the House of Representatives. For the past twenty years as a Judge of the District Court of the Fourth Judicial District of Nebraska.

Since you have nominated me as your Candidate for Congress, it is my earnest desire to round out my public career by representing the Second Congressional District of Nebraska in the Congress of the United States

I feel satisfied that you have confidence in me and that you want me to be elected to represent you in Congress, but I receive so many assurances of success that I must take this occasion to warn you not to be so over-confident as to depend entirely upon someone else to do the necessary work and the necessary voting to insure my election.

Remember that your good wishes for my success can not be counted when the ballot boxes are opened on the night of the next November Election. We must all work together and vote to make our wishes count.

Yours sincerely,

Willis G. Sears

Republican Candidate for Congress.

The Joy

Of watching film-coats disappear from teeth

If you don't know these facts as yet, send now for this free test.

All the world over careful people are brushing teeth in a new way. Millions of them in America alone. You see the results in prettier teeth wherever you look today. Now let your own teeth show them.

Combat the film Your teeth are coated with a viscous film. You can feel it now. It clings to teeth, enters crevices and stays. No ordinary tooth paste can effectively combat it.

Film absorbs stains, making the teeth look dingy. It then forms cloudy coats. Tartar is based on film. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Germs breed by millions in it. They, with tartar, are the chief cause of pyorrhea. All of these troubles were constantly increasing under old brushing methods.

Then this came Dental science then began a search for film combatants. Eventually two were found. One acts to curdle film, one to remove it, and without any harmful scouring.

ABLE authorities proved these methods effective. Then dentists everywhere began to advise their use. A new-type tooth paste was created, based

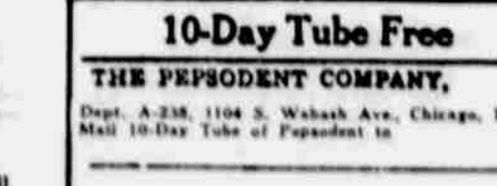

on modern research. The name is Pepsodent. In that modern tooth paste are embodied those two great film combatants.

Two other effects Pepsodent brings two other effects which research proves essential. It multiplies the alkalinity of the saliva. That is there to constantly neutralize the acids which cause decay.

It multiplies the starch digestant in the saliva. That is there to digest starch deposits on teeth which may otherwise ferment and form acids. Thus Pepsodent, twice daily, gives manifold power to Nature's great tooth-protecting agents in the mouth.

What it means to a child Pepsodent brings a new era in teeth cleaning. It means that children need not suffer what you may have suffered from your teeth. It means that boys and girls, as they grow up, need not have dingy teeth.

Do this Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear. One week will bring to you and yours a new idea of what clean teeth mean. Cut out coupon now.

Here Is Your Opportunity

A Brand New Columbia Phonograph for \$1 Down

Simply choose and pay for a few records and for one dollar down a brand new Columbia Grafonola will be sent at once to your home. Easy and pleasing terms will be arranged for the other payments. The Columbia Grafonola is too well known to need comment here. Come in and see the many styles we have for your selection and notice the extremely low prices. The fact that we purchase them in quantities makes it possible for us to give a low selling price and very easy terms.

If you want a phonograph, before making a decision as to the kind you want, see a Grafonola. Priced at \$30 to \$300
