

**Amazing Divorce
Sequel Involves
Omaha Woman**

**Colorado Man Weds Mother
of "Love Babes" After
Wife Is Granted a
Divorce.**

Denver, Sept. 29.—(Special Tele-gram)—George Stoffel, Byers, Colo., and Nellie Belle Phillips, Omaha, Neb.

To the casual eye reading down the list of marriage licenses, those names may mean nothing, but to persons who have a way of remembering unusual circumstances, especially when those circumstances contain the element of big news, those names recall an amazing domestic triangle, where two women, Grace Janet Stoffel, childless, and Nellie Phillips fought for possession of George Stoffel, who admitted he was the father of Nellie Phillips' two children.

"I won't give him up, for he is my husband and wants me to stick to him," declared the wife.

"She will give him up, because he wants to be with me and to give a name to his son and daughter," Nellie Phillips of Omaha, 26 years old, pretty, blue-eyed unmarried mother, declared as her babies played on the floor.

"I'll let my attorney do the talking," Stoffel said, as he picked up the 11-month-old baby girl.

The juvenile court took a hand in the affairs of the triad, learned that Stoffel had been supporting both women, heard his admission of affection for both, ordered him to increase his contribution to Miss Phillips and awarded the children to her, because one was a nursing baby, and while conditions were irregular, yet she had demonstrated a clean love for the little ones.

Stoffel's continued attentions to the unmarried mother of his babies finally sent Grace Janet Stoffel into the divorce court, where she obtained a decree setting Stoffel free to the dictation of his heart, and that his heart dictated a message to Nellie Belle Phillips, who had taken her babies to Omaha as evidenced by a glance at the list of marriage licenses today.

**Fillmore County Clubs
Hear Talk on Program**

Geneva, Neb., Sept. 29.—(Special)—Township women's clubs were addressed by Miss Stella Mather of the extension service and Miss Edna Pegler, who has taken charge of home demonstration work in this county, in connection with the work for the clubs outlined for the year. A good-sized delegation of Fairmont women also attended the meeting.

Miss Mather, Miss Pegler, County Superintendent Maragaret Haugbawout and Lee Thompson, boys' club leader and county agent, went to Fairmont in the evening for a program. The health campaign planned for October during which Dr. Caroline Hedger of McCormick institute, Chicago, will spend several days here, was explained by Miss Mather. Slides depicting hot lunch plans for rural schools were shown by Mr. Thompson.

**"Dry" Leaders Insist Liquor
Is Issue in State Campaign**

Lincoln, Sept. 29.—(Special)—Dry leaders are wondering how Mr. Bryan and Senator Hitchcock will be able to convince any considerable number of Nebraska voters that prohibition is a dead issue in the state, with the Association Against the Prohibition Amendment demanding of candidates for the legislature that they state whether they are for or against amending the state prohibitory law so as to permit light wines and beer to be sold here if congress amends the Volstead act.

Meanwhile the Anti-Saloon league is taking nothing for granted. It is sending out questionnaires to all members on the same subject, and expects to publish the replies. It is not expected that the association will publish its list of answers.

**Bandits Rob Norfolk Man
in Business Section of City**

Norfolk, Neb., Sept. 29.—(Special Telegram)—Dr. I. G. Brennan of this place was held up by two bandits in the heart of the business section of the city and robbed of \$25 in cash and two diamonds valued at about \$700.

RADIO

**Function of Grid
Leak Explained**

Ideal Grid Should Have Non-Capacitive Resistance of Constant Value.

The grid leak as used in Radio receiving equipment consists of a non-inductive resistance unit. The function of a grid leak is to drain the grid of the excess negative charge which would gradually accumulate if the grid was perfectly insulated.

An ideal grid leak should embody a noninductive, noncapacitive resistance of constant value. In order to maintain a constant resistance, the resistance element must be enclosed to prevent foreign objects from injuring or otherwise changing the element. So far the ordinary grid leak fulfills these conditions. However, it has been found that many of the grid leaks on the market, did not remain constant in resistance, but at the end of several months even though not in use, it was found the value varied as much as 50 per cent. Careful laboratory investigation revealed the fact that the resistance change was caused by molecular displacement of the material composing the resistance unit (usually some form of carbon).

It was found that this action could be prevented by enclosing a specially prepared resistance element in an evacuated container from which all moisture had been thoroughly excluded.

Pershing a Radio Fan.

Washington, Sept. 29.—The mysterious appearance of a bright copper wire running around the top of one of the big army limousines used by Gen. Pershing set afloat a rumor here recently that the former chief of the American expeditionary forces, had become a radio fan and listened in on concerts or other matters passing in the air as he rode about the country in the car. Inquiry at the general's office today disclosed, however, that it was not John J. but Warren Pershing, the general's young son, who equipped the motor car with the radio apparatus. He was aided in his project by the army sergeant who drives the general's car and the pair now are able to ride to music and occasionally induce the general himself to listen in.

Portable Transmitter.

San Francisco, Sept. 29.—KTA has been licensed by the department of radio, the San Francisco Examiner announced today, as a portable telegraph and telephone transmitter. According to Maj. J. F. Dillon, radio inspector in this district, the license is the first of its kind in the country.

KTA will operate on 540-meter wave length and will be used by the Examiner on assignments to transmit news to KUCO, the Examiner's broadcasting station in its newspaper building.

The news that KTA will transmit will be used by the Examiner in its regular editions and will not be available to public until it is either printed or broadcast by KUCO, on 360 meters. It is planned to use KTA where telegraph and telephone lines are not accessible.

**Boys and Girls Will Stage
Pony Parade on October 14**

A pony parade, in which all boys and girls riding or driving ponies or small horses are eligible to enter, will be held Saturday, October 14, in connection with the tag day of the Nebraska Humane society. Entries should be made with Mrs. E. S. Stiles at the society's headquarters at Central police station, Eleventh and Dodge streets.

The parade, which will start about 1. will be headed by a band and Boy Scouts will officiate along the line of march. First, second and third prizes of money and gifts will be awarded for the best mounts. Prizes also are offered for the youngest rider or driver, the youngest and the oldest ponies, and the pony which has been brought from the farthest distance. Each entry will be given a pony parade badge.

Japs Quit Siberia.

Tokio, Sept. 29.—(By A. P.)—Japanese evacuation of the Siberian mainland opposite the island of Sakhalen has been completed, and civil administration of that territory has been withdrawn, it was announced officially here today.
