

Market, Financial and Industrial News of the Day

Omaha Grain

Traders were on the buying side of grain during most of the short session, preferring to cover shorts and even to pending developments in the near east over Sunday. Prices of all grains closed near the best figures of the day. Receipts at Omaha aggregated 263 cars of all kinds of grain, principally wheat and corn, as compared with 212 cars last year. Total shipments were only 92 cars, against 201 cars last year. There was a good demand for cash wheat in the local market, the bulk going a cent higher than yesterday. Corn was also in good demand at generally unchanged to 1/4c lower. Data were quoted unchanged to 1/4c up, but generally 1/4c higher. Soy was 1/2c to 3/4c up and barley up 1/4c.

Chicago Grain

September contracts in all grains, with unsettled political conditions in the near east, resulted in rapid changes with a higher average. At no time were values more than a fraction below Friday's finish, with the close at net gains of 1 3/4c to 2 1/2c, while corn was unchanged to 1/4c higher, oats unchanged to 1/4c higher, and rye 1/2c to 3/4c higher. Provisions were unsettled, with lard 1/2c higher to 2 1/2c lower, the latter on January, and ribs were 1 1/2c to 2c lower. Influences prevailing in the grain markets were so conflicting that erratic fluctuations were the rule rather than the exception this week. As compared with the previous week, wheat showed an advance of 4 1/2c on September, while the distant deliveries were 1/2c to 3/4c lower. Corn was also unsettled and 1/4c lower on September and 1/4c higher on the new crop futures. Oats closed 1/4c to 1/2c higher, September leading, and rye 1/2c to 3/4c higher on September and 1 1/2c to 2c lower on the deferred deliveries. Nearly 76 per cent of the wheat crop was harvested, and the balance is expected to be in by the end of the month. The grain market is expected to be active during the remainder of the season, with a heavy demand for cash wheat and corn. The market is expected to be active during the remainder of the season, with a heavy demand for cash wheat and corn.

Live Stock
