

Will Irwin Says Next War Will End White Race

Correspondent Declares to Fine Arts Society That U. S. Has Chance to Stop Strife.

"The first move in the next war will be an attack on the enemy's capital and large cities by wireless driven airplanes loaded with lethal gas. A successful attack will leave not a living thing in the city, not so much as a mouse.

"Utilizing the inventions made to date, less than a dozen airplanes based at Richmond, Va., could wipe out New York city overnight. We will kill by wholesale, not retail, in future wars in the future will be on entire populations, not on armies. In short, the lid is off."

This spoke Will Irwin, war correspondent and lecturer, addressing the Omaha Society of Fine Arts Tuesday afternoon at the Fontaine Hotel.

Mrs. Ward Burgess, president, presented the speaker, after the audience had stood in memory of Mrs. Charles T. Kountze, a former president and present member, whose death occurred last Saturday.

Code Abandoned. In the earliest history, war was the "big thing," Mr. Irwin said further. "There were no rules for the same. But during the time of the Hebrew prophets, a sense of what a gentleman should do sprang up. Christianity carried this movement on until there came to be a civilized code of warfare and finally certain rules were published in the second Hague peace conference. This code is probably the only thing that permitted western

civilization to get through to its present high state. "Then came the war of 1914. Within two weeks, the code built up through thousands of years of civilization and reason, was not worth a snap of the fingers. Germany had killed noncombatants and Great Britain had established a food blockade.

Then Came Gas. "On April 22, 1915, at the second battle of Ypres, a new thing happened. A greenish yellow cloud, streaming to opal in the setting sun, came down like a mist. It was chlorine gas and it left 8,500 men dead. For the first time, brain was put into the business of killing men. Before that date men's only idea for killing had been to hit with something hard. After the use of chlorine gas, the war became a race between gas makers and mask makers and the race was pretty even.

"After the armistice, it became known that William Lee Lewis of Northwestern university, a chemist, had invented lewisite gas, with 50 times the spread of any known gas, and that has increased now. It is a sinking gas and invisible. It attacks through the skin. Clothing is no protection. Should the body be touched by so much as the area of a 50 cent piece death is certain.

Steer Airplanes by Wireless. "At the end of the war, bombing planes had been perfected so they could carry 400 miles from their base and return, with two tons of bombs. Now they have discovered that they can steer airplanes by wireless, so that airplane bombing has become an accurate thing. Deadly diseases may be spread by bombs.

"Economically, every year in a modern war. Although there are fewer soldiers under arms now than in 1912, equipments of armies at the present moment, cost five times what they did in 1913. A horse used to cost \$150. A tank now costs \$2,000.

The next war among great nations will destroy white civilization, leaving its people a small horde groping around among the ruins. The yellow and black people will be left. "Under these circumstances, how can proud isolation be maintained? "In less than 50 years, America with her resources, especially of steel, and her great inventiveness, could wave her flag over such an empire as the sun never alone upon. But she can, if she will, be the first nation which, having the power of a giant, refused to use it as a giant. She can lead the nations of the earth to a basis of world peace."

Open Light Declared Cause of Oklahoma Mine Explosion. McCurtain, Okla., Oct. 24.—An open light carried on the cap of P. E. Seaton, president of the Progressive Coal and Fire of the Progressive Coal company at the No. 11 mine, caused the explosion last Friday which killed eight men, including Seaton, and injured four others, according to Ed Boyle, state mine inspector.

Fremont Factory, Razed by Flames, to Be Built Again

Immense Loss Fails to Deter Refrigerator Plant Owners — Work Found for Employees.

Fremont, Neb., Oct. 24.—(Special Telegram)—Undaunted by the huge loss sustained in a \$200,000 fire Monday, officials of the Fremont Manufacturing company are now laying plans for immediate reconstruction and the erection of a modern plant. Meanwhile employees of the company will be used in clearing up the wreckage and continuing the manufacturing of the company's products—refrigerators and incubators—in other buildings of the city.

Tuesday morning the flames again broke out among the ruins and an extra force of the fire department was again summoned. A house adjoining the plant, owned by C. C. Parker, caught fire from flying embers and burned to the ground.

Six hundred feet of fire hose, attached to a hydrant in the center of the plot occupied by the plant, also was ruined. Frank Hammond, president of the company, announced today that steps were being taken to secure new equipment and machinery. The Fremont Manufacturing company has been located in this city for the past 18 years and ships its wares to all parts of the United States, with warehouses in Chicago and Philadelphia.

Fire to Be Investigated. Lincoln, Neb., Oct. 24.—The chief of the fire department at Fremont last evening appealed to State Fire Warden Hartford for the assignment to that position of an expert to look into what he says is the mystery surrounding recent fires at Fremont. The fire warden telegraphed to the National Board of Fire Underwriters of Chicago for the best man it has and received assurance, he said, that an expert will arrive at Fremont Tuesday noon. The buildings and contents owned by the Fremont Manufacturing company were totally destroyed by a fire this afternoon, with a loss estimated at \$200,000. Four warehouses, three lumber sheds and other small buildings owned by the company were burned.

Giant Magnet Removes Bullet from Boy's Eye. Brainerd, Minn., Oct. 23.—A giant magnet was used today by Dr. N. E. Smith Nelson to remove a 22-caliber bullet from the eye of Iden Wade, young son of Hammond Wade, who was injured while playing with the cartridge. The boy found the cartridge near his home and was wounded by it on a rock when it exploded.

20 Eggs a Day From 24 Hens

"Never Got So Many in My Life," Says Mrs. Dean.

"I started using Don Sung on Jan. 1. My 24 hens which had been laying only 1 or 2 eggs a day, began laying 15 to 20 eggs a day and have laid five over since. I never got so many eggs before in my life and I have been a poultry 'lover for 25 years."—Mrs. Elva Dean, R. 2, Colville, O.

No guesswork about this. Mrs. Dean kept her egg record. In 4 months she used one 5lb. and three 1lb. boxes of Don Sung and got over 150 dozen extra eggs. "It doesn't pay to be without Don Sung," says Mrs. Dean. And it's a fact. You're losing money every day you "get along without it." Why not let it for yourself in this easy way. Give Don Sung to 12 hens. Then watch results for 30 days. If it doesn't show you a big increase in eggs, if it doesn't pay for itself and pay you a good profit, we'll refund your money will be promptly refunded.

Don Sung (Chinese for egg laying) acts directly on the egg laying organs, and is beneficial in every way. It makes hens healthy and happy. They scratch and sing, pullies develop earlier. The whole flock lays regularly in any season, in any weather, when eggs are scarce and high. Can you afford to ignore the wonderful reports you are hearing from Don Sung users everywhere? Why not let us show you the same results, with your own flock? Don Sung is no trouble to use. It costs nothing to ignore the wonderful chance to prove our claims, entirely at our risk. Get Don Sung from your local dealer, or send \$2.00 for package by mail prepaid (large size, \$1, holds three times as much). Hurrell-Duggler Co., 214 Columbia Bldg., Indianapolis, Ind.

SULPHUR SOOTHES UGLY, ITCHING SKIN

The First Application Makes Skin Cool and Comfortable.

If you are suffering from eczema or some other torturing, embarrassing skin trouble you may quickly be rid of it by using Mentho-Sulphur, declares a noted skin specialist.

This sulphur preparation, because of its germ destroying properties, seldom fails to quickly soothe itching, even of fiery eczema. The first application makes the skin cool and comfortable. Rash and blotches are healed right up. Rowella's Mentho-Sulphur is applied like any pleasant cold cream and is perfectly harmless. You can obtain a small jar from any good druggist.

FACE DISFIGURED WITH PIMPLES

Itched and Burned. Very Hard. Lost Rest. Cuticura Heals.

"I was troubled with pimples on my face. They itched and burned and were very hard. Some were large and some small, and I lost rest many nights. I scratched and caused disfigurement. This trouble lasted about six months before I used Cuticura Soap and Ointment, and I used three boxes of Cuticura Ointment with the Cuticura Soap, when I was healed. Now my face is smooth." (Signed) Noble G. Gibbons, Jr., 939 Montana St., Chicago, Ill.

Make Cuticura Soap, Ointment and Talcum your every-day toilet preparations and watch your skin improve.

PARKER'S HAIR BALM

Keeps Hair Clean and Shiny. Prevents Dandruff. Stops Itching. Stops Hair from Falling Out.

How Much of Your Money Burned Up Last Year?

Last year's fire loss in the United States and Canada was over \$500,000,000. In the past ten years \$1 out of every \$4 spent in new construction has been destroyed by fire.

Each year we burn up enough property to build homes for a city of half a million people—a city as large as Buffalo.

To put it another way, \$500,000,000 would have built over 14,000 miles of concrete roads at \$35,000 a mile, or 5,000 school buildings at \$100,000 each.

Fire loss represents a total loss of natural resources together with loss of time, wages, customers, good will and all the disorganizing effects that follow fire.

In addition fire takes annually an enormous toll of human life.

To drive home the necessity and profit of buildings that won't burn is part of the work of the Portland Cement Association.

Time and time again concrete has proved itself the highest type of fire resistive construction. Concrete buildings command lowest insurance rate. Concrete construction means safety combined with longest life at minimum upkeep. Concrete grows stronger with age.

The Portland Cement Association is constantly assisting every movement directed toward reducing fire waste through the medium of better building. Our engineers are at all times cooperating with builders, architects and others with a view to reducing fire hazards.

Aiding the work of fire prevention is typical of the daily service of the Portland Cement Association.
