

U. S. Mail Costs Mount Because of Parcel Post

Postmaster General and First Assistant John H. Bartlett Tell Omahans P. O. to Be Put on Business Basis.

A movement of great prosperity is about to pass over the country, provided certain economic conditions, among the most important of which are wages, are suitably served, Dr. Robert Work, postmaster general, told a group of 350 Omaha business men at the Omaha Athletic club Monday night.

Dr. Work and his first assistant, John H. Bartlett, closed a busy day in Omaha at the dinner tendered them by the Bankers Club of Omaha. Dr. Work urged that the business men take an active interest in the problems of the farmer, declaring such an interest necessary to the welfare of the country.

"Dr. Work is attempting to reduce the postal system so it can be practically handled," said Mr. Bartlett. "He realized such a gigantic business could not be run from Washington—a business which costs of \$3,000,000 post-offices. Hence he has built up an organization in each state, a postal unit. Thus the Washington department deals with one man first in each state."

"The system has one central post-office in each state. Here in Omaha Postmaster Black receives communications from all postoffices in the state. They are corrected and cleared through him and sent to Washington. Mr. Bartlett called attention to the protection 'fraud orders' which prevent anyone guilty of defrauding through the mails ever to receive mail again, afford the public. He cited as an example of fraud the man who advertised '13 quarts of rye for \$18' and became wealthy by sending the numerous thirty purchasers 13 quarts of that variety of grain."

John L. Kennedy presided at the bankers' dinner. He introduced Governor McKelvie, who called attention to statistics to show that the people of Nebraska spend one-fifth of their income for pleasures. The governor said he would not condemn this in ordinary times, but that he believed it wrong now.

Other speakers were Postmaster Black and Senator-elect R. B. Howell, who said he is in favor of giving the postmaster general and his assistants a chance to work out their problems and plans, and that he believed they were quite capable of doing so with utmost success and benefit to the entire country.

Olderog Is Re-Elected.

C. H. Olderog of Springfield was re-elected president and Mrs. Hannah Price of Bennett was re-elected secretary of the Nebraska branch of the National League of Postmasters at the Hotel Rome yesterday morning. The organization is made up of third and fourth class postmasters.

H. C. Blackstone, cashier of the central accounting office, Omaha, addressed the group.

Two Distinct Bodies in the Human Being

Dr. W. Stuart Leach of Roseau, Minn., created a sensation in a recent meeting of the Mississippi Valley Medical association when he declared while the human physical body sleeps the ethereal or spiritual body slips away for a nocturnal stroll to some distant part of the globe.

He dressed the meeting on the method of cashing in war saving stamps.

Omaha Lawyer Dies After Long Illness

Samuel O. Cotner, 38, attorney, died yesterday morning after an illness of 18 months from Bright's disease. He graduated from the University of Nebraska law school in 1912, was a member of the American Legion and the Chamber of Commerce.

He is survived by his widow, his parents, who live at Lovell, Wyo., and two brothers. His grandparents were donors of endowments to Cotner university. He lived at 5010 California street. Funeral arrangements have not been made.

Plot to Smuggle Firearms Abroad Steamer Frustrated

Honolulu, Nov. 14.—(By A. P.)—An attempt to smuggle arms and munitions aboard the China mail steamer Nilsa Saturday was frustrated by federal officers, according to an announcement by Collector of Customs Murray. The officers seized seven cases of large caliber revolvers and 2,400 rounds of ammunition. A prominent Honolulu Chinese hardware merchant is being held pending an investigation. Collector Murray said the munitions were destined to the Chinese rebels.

War on Bootleggers.

Minneapolis, Nov. 14.—Moonshiners and bootleggers whose records show previous convictions of violating the liquor laws will be sentenced to not more than five years in federal prisons, Judge Page Morris announced in federal court here yesterday.

Common Sense

Are You a Borrower of Trouble? Don't be looking on the future as a time of trouble. Have confidence that the future, by reason of your efforts will be better and brighter than the past has ever been. Too many worry about things which never happen. There is enough cause to worry about the actual things which come to pass without worrying about the things which might happen. Why make yourself so much discomfort over something which may never materialize. The troubles which may befall you in the future may be the very things needed to bring you to a state of greater usefulness to yourself and the world concerned. Possibly you have been sliding along too easily, all through life. Probably you have never been obliged to "get down to cases" and make yourself over after getting into a position where to extricate yourself means success or failure. Hard luck has "made" many men and it may make you amount to something. No why dread the future as a time of trouble? (Copyright, 1922.)

Legion Confident Bonus Will Pass at Next Session

Member of Legislative Committee Says Results of Election Brightens Prospects for Compensation.

Washington, Nov. 14.—John Thomas Taylor of the national legislative committee of the American Legion, analyzed the election returns from the soldiers' bonus bill standpoint, reaching the conclusion that the returns demonstrated conclusively that the people are for soldiers' adjusted compensation.

The election, Mr. Taylor declared, assures the passage of a bonus bill in the next congress and it will become a law, in his opinion.

"Senators who were friendly to the great financial interests and toolies of those who profited most out of the war have gone by the board," said Mr. Taylor.

"Of 19 senators up for reelection who voted for adjusted compensation last September, 13 were re-elected. Fifteen of the 15 newly-elected senators favor the soldiers' measure."

"Only three of the newly-elected senators are opposed to the measure. These added to the 34 holdover senators opposed, gives the anti-compensation group a maximum voting strength of 37. The 15 new favorable votes coming to the senate as a result of the election gives the adjusted compensation bill 69 votes, or a clear majority of 15 in excess of the two-thirds required to override a presidential veto."

"The new house of representatives is more than eight to one in favor of the bill. Nineteen of the 74 opponents were defeated in the election and four were not candidates for reelection."

I. C. C. and State Rail Bodies to Co-Operate

Detroit, Mich., Nov. 14.—Plans for co-operation between the Interstate Commerce commission and state railroad commissions in regulating railroad service, have been carried sufficiently far to insure their ultimate success, Chairman McChord of the federal body declared today in an address before the national convention of railway and public utilities commissioners. The joint exercise of state and national authority with elimination of conflicts between them, he said, would put the transportation utilities of the country to their greatest use.

"Within the realm of commerce, there should be no state lines," Chairman McChord said. "And the building up of symmetrical rate structures for the use of the interstate intrastate shipper can best be accomplished by harmonious cooperation of purpose and action among the respective regulatory bodies. "There can be no conflict of authority in harmonious action laid down in the present plan, and for the development and effectual application of the plan we need no statutory authority or assistance."

Jurors in Mine Massacre Trials Favor Death Penalty

Marion, Ill., Nov. 14.—(By A. P.)—Three jurors had been accepted tentatively in the case of five men charged with murder in connection with the Herrin mine killings last June, when court adjourned late yesterday after scores of veniremen were questioned and excused. The three men declared themselves in favor of the death penalty which, it was indicated, the prosecution would demand for those on trial. The men said they favored legal execution if there was sufficient evidence.

Marriage Licenses.

The following couples have been issued licenses to wed: Arthur J. Murphy, 22, Omaha, and Elsie Dolan, 22, Omaha. Chris L. Laible, 21, Omaha, and Clara E. Keller, 20, Omaha. FACTS ABOUT CANCER.
By DR. M. G. SKELLEY, St. Louis.
The primary cause for cancer is unknown. No one has ever proved that it is due to a germ or organism of any kind. Like Topsy, a cancer "just grows."

It is made up of cells just as is the rest of the body. The cells of the body, however, have definite growth energy—that is, they grow up to a definite limit, and then growth ceases. A normal, 6-foot man grows until he reaches 6 feet and then he stops. The cells of his liver, his spleen, his bones and all his other organs grow and multiply until his liver and spleen and skeleton are of proper size, and then growth ceases in accordance with some unknown law of life. Normal growth is an orderly process.

The growth of cancer cells is the most disorderly process conceivable. A sudden and for no known reason, a certain cell makes up its cellular mind to have no regard for the laws governing the growth of the rest of its brother and sister cells. It proclaims itself an anarchist and starts in on a delinquent growth that knows no limit of size and no respect for the claims or the needs of the rest of the body. Just as the anarchist will do untold and irreparable harm to the social body, unless apprehended early and properly dealt with, exactly so will the anarchistic cell do equal harm to the physical body, unless it and its progeny are apprehended and properly dealt with.

The human body is made up, for the most part, of epithelial cells and connective tissue cells. The epithelial cells make up the skin, the mucous membrane and most of the various organs of the body, such as the lungs, liver, pancreas, spleen and kidneys. The connective tissue cells constitute the supporting tissues of the body and the cement substance holding the epithelial cells together.

Comparing the human body to a house we should say that the bricks represent the epithelial cells, whereas the mortar and the supporting joists and beams represent the connective tissue cells. The epithelial cells, on the one hand, and the connective tissue cells, on the other, are untrained growth happens to be of the epithelial variety, then the resulting cancer is known as a carcinoma. If the wildly growing cell is of the connective tissue type, then the resulting cancer is known as sarcoma. The groups of carcinoma and sarcoma embrace practically all cancers.

Both carcinoma and sarcoma are called "tumors" because when they attain sufficient size, they can be seen as swellings. Tumor merely means a swelling. Not every tumor is a cancer, but every cancer is a tumor. Not every tumor is malignant, but every cancer is malignant—and we call it malignant because we know it grows rapidly without limit; it spreads into neighboring territory; it involves the blood and lymph stream, and is thereby carried to remote parts of the body, where secondary cancers may develop; it tends to recur unless it is removed by what is known in surgical parlance as a "radical operation"; and, finally, it will eventually kill the patient unless it is thoroughly removed.

If the cancer is recognized early, this thorough removal can be accomplished by an operation often of almost insignificant proportions. The later in its course it is brought to the attention of the physician, the more radical will the operation of removal have to be, and the less hopeful the outlook of a cure. However, it is the experience of every active surgeon that even seemingly neglected cases far advanced cases of cancer respond with amazingly favorable results to a properly executed radical operation. Surely all this is hopeful and not dreaded information.

The American Society for the Control of Cancer is bent on spreading this message of hope. It says to you insistently: "Beware lest you lose the chance of hope." It tells you, for example, not merely that cancer is curable (definitely so, when looked to early; even possibly so in certain late cases), but also that there are seemingly insignificant defects that lead to cancer, and that, nevertheless, may be very simply cured before the cancer stage is reached. The stubborn crack

Stockholders

The Bell System is owned by its thousands and thousands of stockholders, who are men and women in all walks of life throughout our territory and other parts of the United States.

One-third of all the men and women in our organization who have been with us six months or more are purchasing Bell Telephone stock out of their savings.

We encourage the owning of stock not only by employees but by our subscribers as well.

We shall be glad to talk to you about purchasing Bell stock if a conservative investment will interest you.

Opera Folk, What D'you Say?
N. B. E. writes: "Does removing the tonsils, injure the singing voice, or does it help the voice?"
REPLY.
As a rule it makes no difference either way. There are some exceptions both ways.

Let Her Take Warm Baths.
J. V. writes: "My wife has the habit of taking cold baths daily except during menstruation. During that time she finds the cold water has a tendency to stop it, and is afraid that it is harmful. Is that so?"
REPLY.
Let her take warm baths at that time.

"Citrus Lemonade."
R. D. K. writes: "Kindly advise me whether or not citric or tartaric acid when used instead of lemons in lemonade, is harmful."
REPLY.
I do not think so, but remember that when you drink these artificial lemonades you do not get the vitamin which is so helpful. You do get the minerals.

Daily Prayer

I love the Lord, because He hath heard my voice and my supplications. Because He hath inclined His ear unto me, therefore will I call upon Him as long as I live. The sorrows of death compassed me, and the pains of hell gat hold upon me: I found trouble and sorrow. Then called I upon the name of the Lord: O Lord, I beseech Thee, deliver my soul. Gracious is the Lord, and righteous: yes, our God is merciful.—Ps. 115:1-5.

Keep our hearts from sin, our minds pure, and our motives true. Forgive us when we fail. Grant that we may consecrate the commonplace duties of the day with the consciousness of Thy presence. Whether the day brings prosperity or loss, sunshine or shadow, blessings or bereavement, may our faith remain firm, our love unflinching, our hope undimmed. Through us today may mankind be blessed, and the coming of Thy Kingdom hastened, for His name's sake. Amen.

REV. H. H. BINGHAM, B. A., London, Ont., Canada.

Ward off one of humanity's greatest enemies by daily use of Kellogg's Bran!

Medical authorities generally agree that sickness and old age start in the intestinal tract through CONSTIPATION—a condition that every man, woman and child in this nation can positively and permanently relieve through the regular use of BRAN—Kellogg's Bran, cooked and krumbled. Kellogg's Bran is nature's own food, roughage that the eliminative tract must have to function properly. Bran sweeps, cleans and purifies without irritation or discomfort! So wonderful is its work for health that you can take any person who is run down, whose system is clogged and poisoned by constipation, give them Kellogg's Bran three times a day and eliminate the trouble permanently! Yet Kellogg's Bran is not a "remedy"—simply nature's food. To eat Bran regularly means that you will become normal in the eliminative tract, and in other organs, and escape the dangers that are traceable directly to constipation! Your physician will endorse Bran for constipation. Do not neglect Kellogg's Bran another day. Every member of your family should eat Bran regularly—at least two tablespoonfuls daily; in chronic cases, eat it with each meal. It does great work for children, making them grow big and strong, and safeguards their health. Kellogg's Bran, cooked and krumbled, is deliciously flavored. Eat it as an appetizing cereal or sprinkle it over your favorite cereal. Kellogg's Bran makes the tastiest gobs, raisin bread, pancakes—and endless other good things—and it is working for health all the time! Buy Kellogg's Bran at all grocers!

The postmaster says he used to take sides in all arguments around

What becomes of 30,000 cement sacks a year?

Practically 90 per cent of the 95,000,000 barrels of portland cement shipped last year was delivered in returnable cotton sacks.

To supply users of cement promptly, the industry must have about 200,000,000 sacks either on hand or in use.

The sack method of shipping is most convenient. There are four sacks to a barrel. Each sack contains 94 pounds of cement—a cubic foot. And a cubic foot is a handy volume in proportioning concrete mixtures.

When cement is shipped, the sacks are billed to the purchaser. When they are returned, they are bought back at the same price if they are in usable or repairable condition. This involves much work in checking, cleaning, sorting and repairing.

But in spite of the fact that every good cement sack is redeemable, 30,000,000 of the sacks shipped every year fail to come back—a loss of nearly \$5,000,000 a year at present prices of new sacks.

To replace these "lost, strayed or stolen" sacks requires annually over 30,000 bales of cotton. It requires that the textile industry weave a strip of cloth 30 inches wide and 17,000 miles long. It means that 1,600 looms are kept working full time for a year.

Thousands of sacks returned to the cement mills for redemption are damaged, yet accepted for credit, if they can be repaired. This repair is done by the cement manufacturer at his own expense.

A medium sized plant shipping, say 1,000,000 barrels of cement a year, has to repair an average of 6,000 sacks per day from among those returned for credit. This keeps 6 people constantly working at rapidly operated electric sewing machines. In a million barrel a year plant, 22 people are constantly employed sorting, counting, repairing and otherwise caring for returned sacks so that they may again be used.

At the present time \$30,000,000 would be a conservative estimate of the investment which the cement industry has in cotton sacks.

Sacks are one of the lesser, but nevertheless important items in the cement industry.
