Beatrice Clubs to Hold Chautauqua Assembly

Beatrice, Neb., Nov. 28.—(Special.)—Committee from the Chamber of Commerce, Kiwanis, Rotary and Knits and Fork clubs held a meeting and decided to hold a chautauqua assembly here next season. The dates will be announced later.

If Piles, Send For Pyramid

Pyramid Pile Suppositories Are Known Everywhere for the Wonderful Relief They Give.

truding piles or hemorrhoids, ask your druggist for a 50 cent box of Pyramid Pile Suppositories. Take one quickly you will wonder why anyone should continue to suffer the pain of a distressing condition. For a free trial package, send name and address to Pyramid Drug Co., 620 Pyramid Bldg., Marshall, Mich.

Makes a Family Supply of Cough Remedy

Really better than ready-made cough syrups, and saves about \$2. Easily and quickly prepared.

If you combined the curative properties of every known "ready-made" cough remedy, you probably could not get as much real curative power as there is in this simple home-made cough syrup, which is easily prepared in a few minutes. Get from any druggist 2 1/2 ounces of Pinex, pour into a pint bottle and fill the bottle with syrup, using either plain granulated sugar syrup, chardul molasses, honey, or corn syrup, as desired. The result is a full pint of really better cough syrup than you could buy ready-made for three times the money. Tastes pleasant and never spoils. This Pinex and Syrup preparation gets right at the cause of a cough and gives almost immediate relief. It loosens the phlegm, stops the nasty throat tickle and heals the sore, irritated membranes so gently and easily that it is really astonishing. A day's use will usually overcome the ordinary cough and for bronchitis, croup, hoarseness and bronchial asthma, there is nothing better. Pinex is a most valuable concentrated compound of genuine Norway pine extract, and has been used for generations to break severe coughs. To avoid disappointment, ask your druggist for "2 1/2 ounces of Pinex" with full directions, and don't accept anything else. Guaranteed to give absolute satisfaction or money promptly refunded. The Pinex Co., Ft. Wayne, Ind.

Sore Throat Coughs, Colds, Catarrh Relieved in Two Minutes

In your throat sore? Breathe Hyemol. Have you catarrh? Breathe Hyemol. Have you a cough? Breathe Hyemol. Have you a cold? Breathe Hyemol. Hyemol is the treatment for sore, throat and lung trouble. It contains camphor, menthol, eucalyptus, and other powerful agents and does away with stomach distress. Just breathe it through the little black pocket inhaler that comes with each outfit. A complete outfit costs but little at the five Sherman & McConell drug stores, or any reliable druggist and Hyemol is guaranteed to banish catarrh, croup, coughs, colds, sore throat and bronchitis or money back. A Hyemol inhaler lasts a lifetime and extra bottles of Hyemol can be obtained from druggists for a few cents.

Advertisement for Nujol, a lubricant for constipation. It contains castor oil and is described as a 'natural lubricant' that relieves constipation and is safe for all ages.

Plenty of Turk, It Is High Enough

Strong Market in East Keeps Price of Thanksgiving Birds Here Above 50 Cents.

Omaha is to have plenty of turkey on Thanksgiving. The price may be a bit higher than last year, but not enough higher to make it prohibitive. One large downtown market quoted "fancy dressed young turkeys" at 54 cents a pound yesterday. This is 4 cents higher than last year, the manager said. He explained the price increase by the extraordinary demand for turkeys in the east. Turkeys are being shipped from Omaha to New York by the carload, and commanding a price of 47 1/2 cents a pound f. o. b. here, he said. Despite this, however, downtown markets and commission men say there is plenty of turkey arriving here to supply demand. There is an abundance of cold storage birds, and most persons buying turkey insist on buying the best grade, they say.

Two Churches Merged

Lincoln, Nov. 28.—(Special.)—The Congregational and Presbyterian churches of Fairmont were practically effected here Monday at a meeting of the Nebraska city presbytery. As a result of the approval of the merger, the federation project will be sent to the congregations for final ratification. According to the proposal, one pastor will serve both churches.

Births and Deaths

Births: Carl and Margaret DeWitt, 1821 Ontario Street, boy. Linda and Lester Averett, 2509 Jefferson street, girl. Andrew and Viola Jacobson, 1845 Park avenue, girl. Weilan and Milana Pavulich, 3201 W. street, girl. Joseph and Veronica Benak, 5828 South Twenty-second street, boy. John and Selma Loomay, 2312 I street, boy. Deaths: Naomi Sumner, 287, 25, 6519 North Twenty-fourth street. Baby Tolman, infant, 8221 South Twenty-third street. Joseph Hill, 59, hospital. Wayne P. Galbraith, 13, hospital. Florence M. Egner, 23, hospital. Mrs. Mary Triska, 87, 1024 Park street. Mrs. Anna Hansen, 71, 529 North Twan, Broadway street. Augustus Schlandt, 71, hospital. Nola May Dickey, 46, 2113 Locust street. Loretta Jacobson, 55, 2425 North Twenty-third avenue. John Plambek, infant, hospital. Mrs. Hedwig Koerber, 37, 4218 Laurel avenue. Jessie J. Callan, 57, 1124 South Thirtieth street.

Marriage Licenses

Allen M. Gough, 41, Sioux City, Ia., and Miriam Bern, 26, Sioux City. Daniel B. Keller, 25, Omaha, and Loretta A. Gorman, 18, Omaha. Alfred Bechard, 31, Omaha, and Mae B. Meagitt, 21, Omaha. Paul J. Dobson, over 21, Omaha, and Mary E. Egan, over 21, Omaha. Leon E. Case, 24, Omaha, and Malotch Clara Pace, 21, Omaha. John Babbe, 28, Omaha, and Julia Thompson, 29, Omaha. Chester Duane, 25, Omaha, and Lillian Walgren, 24, Omaha. Dr. Arlon V. Strass, 41, New Plymouth, Idaho, and Minnie P. Jones, 24, Dunlap, Ia. Chris Holthausen, 21, Council Bluffs, Ia., and Lela Jacobson, 19, Council Bluffs, Ia. William Willis, 28, Omaha, and Edna Murray, 21, Omaha. Frank Gjeson, 25, Sioux City, Ia., and Carolina Nielsen, 19, Omaha.

Advertisement for Brandeis Restaurants, Italian Renaissance Room. Thanksgiving Dinner on Thursday, November 30, 1922. Telephone Jackson 8653. J. L. BRANDEIS & SONS.

Daily Prayer

Evening and morning, and at noon, will I pray, and cry aloud; and shall hear my voice. Cast thy burden upon the Lord, and He shall sustain thee: He shall never suffer the righteous to be moved. Ps. 121: 2. Our Father in Heaven, look upon us, we beseech Thee, in Thine infinite love and compassion. Dwell Thou in us, that, being molded by Thy good Spirit, we may have fellowship with Thee as Thy children. Help us at all times to trust Thee. Appear for us what Thou wilt, and make us ready to receive with thankfulness whatsoever strength good to Thee concerning us. Go with us in every mission on which Thou art pleased to send us, and in Thy service may we find rest. Lighten our darkness, we entreat Thee, that we may behold Thy face, and in Thy tender mercy, do Thy will. Temper the storm lest our weak faith fall. Forgive our sins, and day by day deliver us from their power. We commit all our loved ones to Thy keeping. Do Thou watch over them and bless them. And as Thou givest us a taste of Thy joy in loving our friends, lead us into the fullness of the joy of loving all whom Thou lovest, through Jesus Christ our Lord, Amen. WILLIAM FARGO-HARSON, D.D., Ashcroft, Ont., Canada.

Be Fit for War, Warns Pershing

"No One Can Tell Whether It Will Come in Five or 20 Years." Minneapolis, Minn., Nov. 28.—An appeal to the nation "to look cold, hard facts in the face and not forget our obligations in the blind hope that we may not again engage in armed conflict," marked an address delivered here today by Gen. Pershing under the auspices of the American Defense society. "At present, we do not see definite indications, but none of us can tell whether we shall have war in five, 10 or 20 years," Gen. Pershing said. "If we knew now to a certainty that armed conflict would come in 29 years, there would be an immediate demand for preparations. Yet that is the approximate interval that we have had in the past between major wars. There is no reason to think that the immediate future will bring about a cessation of war even though it was said that we entered the world war to bring about the end of war." Gen. Pershing devoted most of his address to discussing the value of military training as a school of good citizenship, making reference in this connection to the findings of the recent educational conference in Washington. The conclusions of that conference, he said, were that the training given in reserve elements of the army and at civilian training camps "constitute an effective machinery through which much can be done not only to benefit the individual from the standpoint of his physique and self discipline, but from the standpoint of his relations to the government that protects him and which he is under obligations to defend."

School Work Discussed at Teachers' Meeting

Fairbury, Neb., Nov. 28.—(Special.)—A county teachers' meeting was held here Monday, the morning session being devoted to the needs of the beginning teachers and consisted of the following: Opening exercises; Miss Moore and Miss Hermanseler; seat work, Miss Hirsch; reading; Miss Terry; numbers, Mr. Snyder; language, Miss DeVore; health lesson plans, Miss Leighty. The afternoon program was under the management of Miss Mills, the Palmer demonstrator for the state. Over 30 normal trainers from Fairbury and Diller attended both the morning and afternoon sessions. This is the second meeting of the kind held this year.

How to Keep Well

By DR. W. A. EVANS. Questions concerning hygiene, sanitation and prevention of disease, submitted to Dr. Evans by readers of The Bee, will be answered personally, subject to proper limitation, where a stamped addressed envelope is enclosed. Dr. Evans will not make a diagnosis nor prescribe for individual diseases. Address letters in care of The Bee.

HOW TO SAVE COAL.

In view of the probable coal shortage this winter, W. H. Driscoll gives the following advice as to the operation of a heating plant: A good draft is essential to proper combustion. Therefore the chimney should be absolutely tight and the smoke connection as short and straight as possible. A hand damper should be installed in the smoke pipe to regulate the intensity of draft. This should be installed in addition to any other mechanically operated dampers that may be in use. The heater base should be tight and closely fastened to the floor to prevent air leakage into the ash pit. All fire, fire and ash pit doors should be fitted and fitted to make tight joints. Heating surfaces should be kept clean and free from soot and ash accumulations, and the entire ash pit should be kept in good condition, so they will shake easily and have no broken places for coal to drop through. Unburned or partly burned coal should not appear in the ashes at any time. Steam heaters and hot water piping should be completely covered with a good grade of insulation of ample thickness to prevent heat losses. The firepot should be kept filled at all times. It is a mistaken notion to assume that a low fire effects economy. On the contrary, it is wasteful and extravagant. Do not shake your fires too often, too long, or too violently, especially in mild weather. Regular attention to the fire by one member of the family is desirable. The firepot should have sufficient coal capacity to require attention not more than once in eight hours. Keep your house temperature low. Sixty-six degrees should be sufficient for comfort. If you are not comfortable at this temperature, you are not properly clothed or the humidity of your house is too low. Shorten the heating season as much as possible. Do not start your heater with the first sign of cold weather. An open fireplace or a gas heater will furnish sufficient heat at the beginning of the coal season. Heat as few rooms as the comfort of your family will permit. A tremendous waste is caused by the heating of unoccupied rooms. To humidify a house heated by a furnace, place an evaporating pan in the hot-air chamber above the firepot, supply it with water from a tank set at the same level by the side of the furnace. If there is steam heat, use the steam from the coils to humidify. Watch the water in the boiler. A few electric fans properly placed, will greatly facilitate heating. On occasions a fan placed at the opening of a register or in the air duct solves the heating problem. Fans to move the heat away from the ceiling and toward the floor are helpful. Asthma Not Contagious. Helen M. writes: "I am in quite a mess and don't know what to do. I am a girl of 18 and am keeping steady company with a man of 30. This man has asthma. He has asked me to marry him. "1. Is asthma dangerous or catching? "2. Would it have any effect on my children, if I ever had any?" REPLY. 1. Neither. 2. No. Not such a bad mess, after all. Social Disease Information. J. E. G. writes: "Where can I get a booklet on venereal diseases, their periods of incubation, cure, prophylactic treatment, etc.?" REPLY. You can get such a booklet free from your state health department. Agar Not Harmful. M. A. G. writes: "I eat agar every morning for constipation. Is it harmful?" REPLY. No. Wants Better Ventilation. J. M. writes: "About a week ago I saw a small item stating that a cure had been found for diabetes. I cut it out and thought I could lay my hand on it at any time, but in that I am mistaken. Would like to get a copy of it. "But there is another question that is of far greater importance that I wish to call your attention to, and not you only but also all papers that have the welfare of the nation at heart. It is the leading question of our northern states and other cold countries—I refer to ventilation. "I do not know of a practical system of ventilation for human dwellings; there are some good ones for animals, but none that I know of for humans. "Warming the same air by furnace heat is not ventilation. It is simply keeping ventilated air warm. Breathing the ventilated air over and over again only renders it so much worse, ridding it of its oxygen. Heavy, close-fitting curtains can be hung over the windows and let down when the room is not used and at night when the room is lighted from within; that conserves heat and saves fuel, but does not supply oxygen. "Persons with heart disease cannot live in that kind of atmosphere, and those who do live in it are fitting themselves for further trouble." REPLY. The diabetes treatment referred to is that in which use is made of an extract of pancreas. I had an article about it in August. If you will promise to keep clamoring for better ventilation, I will promise to do the same.

Common Sense

By J. J. MUNDY. Why Not Write That Old Friend? Do you ever write your old friends or go and see them since they have met with reverses? You are keeping away from them fearing they might ask some favor. Isn't this an unmanly spirit? Perhaps just the words of encouragement you could give might put some persons on the way to recovery from their present shaky footing. The right advice from you might put a sound foundation under them and start them again on the right road. They may be wavering between two courses; consultation with you might help them to decide which is the better of the two. You have not done much good in the world, have you? Why not accept the opportunities you have to help someone? Why be so selfish in your life? Why not give a helping hand to

Advertisement for Pepsodent. Yesterday Today. How prettier teeth came to millions. Have you noted the glistering teeth you see everywhere today? And the open smiles that show them? You can see that some great change has come in teeth-protecting methods. If you don't know what that change is, we urge you to make this test. They combat the film. These people—millions of them—are now combating film. Film is that viscous coat you feel. It clings to teeth, enters crevices and stays. It absorbs stains, then forms dingy coats. Tartar is based on film. Film also holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. These troubles had been constantly increasing. Beautiful teeth were less often seen than today. And all because no old-time tooth paste could effectively fight film. The problem solved. Then dental science, after long research, found two film combatants. One acts to curdle film, one to remove it, and without any harmful scouring. Able authorities proved these methods effective. Then dentists everywhere began to advise their use. A new-type tooth paste was created, based on modern research. The name is Pepsodent. Then these two great film combatants were embodied in it. Five unique effects. Pepsodent brings five effects which, old ways never brought. Modern research proves them all important. It multiplies the alkalinity of the saliva. That is there to constantly neutralize the acids which cause decay. It multiplies the starch digestant in the saliva. That is there to digest starch deposits on teeth which may otherwise ferment and form acids. Those are Nature's great tooth protecting agents. Pepsodent, with every use, gives them manifold effect. Pepsodent also polishes the teeth so film less easily adheres. Nearly all the world over Pepsodent is bringing a new era in teeth cleaning. Careful people of some fifty nations now employ it, largely by dental advice. Every dainty person now should know the benefits it brings. Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear. The results will amaze and delight you. Even one week will convince you. Do this for your family's sake. Cut out the coupon now.
