Chiropractic Health Talks

The nerve and blood supply to the stomach perform an important part in the elaboration and secretion of the gastric juice and a very important part of the nervous system is the furnishing of energy for the stomach movements during digestion.

The nerves leading to the stomach pass out from the spinal cord through little openings in the spinal column; if they are impinged by a subluxated (displaced) vertebra, it interferes with the transmission of nerve energy leading to the stomach and cause that organ to become diseased.

Chiropractic adjustments will free the nerve from the pressure that is causing the trouble, nature will restore normal function to the organ and health is the result.

If you are suffering with some form of stomach trouble make a thorough open-minded investigation of the Chiropractic principle and then be guided by your better judgment.

We will not accept any case that we cannot help. Consultation and examination is free. Office adjustments are 12 for \$10 or 30 for \$25. House calls made when unable to come to the office.

Dr. Burhorn conducts a Free Clinic for Children under 13 years of age daily, from 7 to 8 p. m. Bring the little folks in for a spinal examination and adjustments.

Dr. Burhorn's Chiropractic office is located on the fourth floor of the Securities Building, on the corner of 16th and Farnam Sts. Office hours from 9 a. m. until 8 p. m. Phone JA cksion 5347 for appointment.
