

Market, Financial and Industrial News of the Day

Omaha Grain

After an early dip around yesterday's low figures on more optimistic Argentine news regarding favorable harvesting conditions and lower Liverpool cables steady, with a better class of buying in evidence than for some days. Corn showed a rather firm undertone today, with a rather marked disposition in some quarters to look for a rally on the belief that the technical position has been considerably strengthened. Cash demand remains slow and prospects are for an enlarged movement, but the break of 3/16c from the high of last week is regarded by some as sufficient for the time being.

Total receipts at Omaha were 170 cars, as compared with 117 cars last year. Total shipments were 131 cars, against 92 cars last year.

Cash wheat on the Omaha floor was in good demand at the prevailing prices. Premium grades selling generally lower, and the dark wheat 1/16c lower. Corn was in fair demand, with prices 1/16c lower to 1/8c higher. Oats were generally unchanged. Rye and barley were quoted unchanged.

Chicago Grain

Chicago, Dec. 6.—Sentiment among grain traders was much more friendly to the buying side and while there was nothing in the news that was construed as radically bullish, the markets showed a very firm undertone and while holding within narrow limits early closed strong with the gains of 3/16c on wheat, 2 3/16c on corn, 1/16c on oats and 1/16c on rye.

The greater part of the news early in the week was of a bullish character. Liverpool was 3/16c lower with Argentina wheat pressing for sale at lower figures than last year and weather in Argentina was reported as favorable.

Close Near Top. Toward the end of the introduction of the Argentine wheat, the market was again buoyed up by the Argentine wheat, which was reported as being in good condition.

Grain traders expect a further rally for the wheat and corn will be safe. Action of the market improves and traders expect a further rally for the wheat and corn will be safe.

Financial

Foreign exchange markets were active and the dollar advanced perceptibly. The German mark held around the price of .0011, from which it has hardly varied in two weeks.
