

2 Victims Tortured to Death

Horrors of Spanish Inquisition Attended Parish Murders, Evidence at Hearing Shows.

Bodies Mutilated, Torn

New Orleans, La., Jan. 6.—Close observers see in the state's investigations in the Morhouse kidnappings and murders not only an effort to punish the slayers of Watt Daniel, world war veteran, and Thomas F. Richards, Mer Rouge citizens, but also a step in the direction of "tearing the mask off the Ku Klux Klan."

Bastrop, La., Jan. 6.—Dr. Charles W. Duval and Dr. John A. Landford, pathologists, in a report submitted at today's session of the open hearing of Morhouse parish, expressed the opinion that the bodies of Watt Daniel and Thomas F. Richards were subjected to some "specially constructed device designed for inflicting punishment."

Dr. Duval called to the witness stand at the opening session of the hearing, first presented the findings of the pathologists.

"How would you account for the absence of the arms and legs?" Dr. Duval was asked during his description of the body of Daniel.

"They evidently had either been chopped or mashed or crushed off," Dr. Duval said.

Legs and Arms Broken. "The bones of the arms and legs were broken in three places," Dr. Duval said, "the striking features of the fractures or breaks in the bones, always three in number in the arms and legs, were that they were about equidistant. Indications were breaks produced by some force or forces that came from different directions."

"When would you say the cutting operation performed on Daniel's body took place?" Dr. Duval was asked.

"During life," the physician replied.

He testified that the head was crushed, "the forces coming in different directions as though from some instrument, such as a vise."

"Could the injuries have been produced by beating?"

"I don't think so," Dr. Duval said.

Were the injuries inflicted before death? Attorney General Cocco, who conducted the questioning, asked.

"Yes," Dr. Duval replied.

He explained that any one of several injuries noted could have caused death.

"My idea is that the body was most inhumanely tortured," Dr. Duval said in answer to another question.

The report as to the body of Richards—of broken bones and lacerations—were similar to those noted in the case of Daniel with the exception of the cutting described in the report.

"The bone breaks were ante-mortem," Dr. Duval testified.

"The injuries came from more than one direction. Force apparently had been applied to the breast plate and to the spinal column and both carried on until the front of the chest crushed to the back."

By Sharp Instrument. Appearance of the wound showed that the cutting of the body of Daniel was done by such a sharp instrument as a pen knife or razor, Dr. Duval said.

The findings of the pathologists were based on an autopsy performed on the mutilated bodies of two men (Turn to Page Two, Column One.)

Klan Got His Job, Police Chief Says

Michigan City, Ind., Jan. 6.—Arthur Sullivan, discharged police chief, who attributes his dismissal to influence of the Ku Klux Klan, decided today at a conference with his lawyers to demand a public hearing.

The city commission will meet Monday at which time it is probable Sullivan's demand for a hearing will be made.

The former chief was given a week's notice that his dismissal would become effective January 1. Under the commission form of government he had the privilege of a public hearing.

Sullivan charges that City Commissioner Arthur H. Snyder asked him to join the klansmen.

Corpse of Man Found in Car from Omaha at Sioux City

Sioux City, La., Jan. 6.—The corpse of an unidentified man was found in a refrigerator car in the freight yards of the Omaha railroad, last night. Fumes of the coal gas escaping from the stove caused the man's death, it is said.

The car is thought to have been picked up in the freight yards at Omaha. He was about 25 years old, of medium height and slender. He had light hair and blue eyes and was dressed in clothes of good quality. A suit of overalls covered a sack suit of a brown material. He had on two flannel shirts.

Aged Negro Slain Over New Graves in Race Trouble

Handed Over to Mob to Avoid Fresh Outbreak of Race War at Rosewood.

Rosewood, Fla., Jan. 6.—A negro answering the description of Jesse Hunter, search for whom here Thursday night resulted in the clash between negroes and white men, in which six persons were killed, is under arrest in Lakeland, Sheriff Elias Walker said this afternoon. He had been advised.

Summer, Fla., Jan. 6.—Handed over to a mob when it appeared a fresh racial clash was imminent, an unidentified negro, apparently aged 60, was shot to death at Rosewood today, over three newly made graves containing the bodies of three negroes killed in a clash at Rosewood Thursday night.

The negro was taken to the scene of the three negroes who were killed when a mob attacked a house in which a score or more of blacks had barricaded themselves, he was questioned by his captors. He admitted, it was said, that he had been in the barricaded house and had taken refuge in a swamp when the negroes escaped.

Body on Graves. The negro refused to divulge the names of other negroes in the party. His captors then riddled him with bullets, leaving the body stretched across the graves.

The negro returned to Rosewood this morning and appealed to W. H. Pillsbury, superintendent of the Sumner Cypress company mill there, for protection. Pillsbury locked the negro in a house in the negro quarter. Later, however, when a new clash became imminent, the negro was turned over to 25 or 30 men.

Seven Killed. The death of the unidentified negro brings the total casualties to seven as a result of the troubles at Rosewood. The dead include two white men, who were killed in the first volley fired by the negroes when they were surrounded by a party of Sumner men who were seeking Jesse Hunter, negro, who is alleged to have participated in an attack on a young white woman. The other victims were four negro men and a negro.

Reports said feeling at Rosewood, which subsided after the battle of Thursday night, had become inflamed today as a result of the capture and slaying of the aged negro.

Alleged Oakland Slayer Arrested in Indianapolis

Indianapolis, Ind., Jan. 6.—William R. Krice, alias Walker, who police say is wanted in Oakland, Cal., in connection with the death of Nicholas S. Dabelich, hotel keeper of that place, last October, was arrested here. Dabelich's body was found beneath a bridge in a lonely spot several days after he was killed.

Sister of Senator Harris Dies at Home in Cleveland

Washington, Jan. 6.—(Special)—Senator Norris of Nebraska has gone to Cleveland to attend the funeral of his sister, who died there yesterday.

Senator Norris recently spent some time with his sister in her last illness. She was a favorite sister.

Des Moines Woman Given Pen Sentence for Fraud

Des Moines, Ia., Jan. 6.—Mary Fraze, former city park department secretary, was sentenced to an indefinite term of from one to seven years in the Rockwell City reformatory by District Judge Lester Thompson. She was convicted on charges of obtaining city money under false pretenses.

Miss Fraze's bond was fixed at \$7,500 pending an appeal to the state supreme court.

G. A. R. to Install Officers

Old Guard post No. 7, Grand Army of the Republic, and George A. Custer, George Crook and U. S. Grant chapters, Women's Relief corps, will hold joint installation of officers at the courthouse at 2 Saturday afternoon.

Mrs. Lillian Knox, Murder Defendant, Free on Bond

San Augustine, Tex., Jan. 6.—Permanent bond of \$5,000, pending the meeting of the grand jury in March, was agreed upon today for Mrs. Lillian Knox, pretty 35-year-old widow of Hiram Knox, millionaire lumberman, whom she is charged with slaying.

The fixing of the bond ends the habeas corpus hearing before Judge H. V. Stark in the first district court here.

Stefansson to Give Up Explorations

World-Famous Arctic Traveler to Devote Life to Developing the Polar Regions.

Plans Trade Air Routes

New York, Jan. 6.—(By A. P.)—Vilhjalmar Stefansson, Arctic explorer, announced abandonment of his career as an explorer, to devote his efforts to proving to a skeptical world that within a decade or two the north polar ocean will be crossed by a network of commercial aviation routes and that the Arctic regions, hitherto known as mysterious, uninhabitable lands, will be the source of developed resources unlimited in magnitude.

"I am through with exploring," he declared to The Associated Press. "I will devote myself seriously to the abolition of the polar regions. The aura of mystery surrounding the north is a pall of ignorance. The polar regions are a state of mind."

Mr. Stefansson said his decision to give up the polar expeditions which have made him internationally famous was prompted by his conviction that the age of exploration of the north now was to yield to the age of commercial development. He felt, he said, that he should give up exploring while he was still young enough to develop his career as a "propagandist" or enlightener of the north. Exploring was a young man's game, he added.

Saw Unlimited Resources. "My expeditions to the Arctic," he declared, "were like those of Lewis and Clarke in the early days of the United States' history. I saw as they did that I was crossing country with unlimited resources, country which could easily be exploited and country, in which men and women could live as comfortably and as energetically as they live in many parts of the north temperate regions of the world."

Development of the Arctic country as a path of commercial air routes certainly would be made within the next generation, Mr. Stefansson asserted. The temperature 1,000 feet above the north pole in July, he said, was about the same as that 1,000 feet above France in April. The light conditions were ideal. An Arctic route from London to Tokio, he pointed out, would be only two-thirds the length of one charted from west to east.

Terrors Imaginative. The popular attitude toward the Arctic regions, Mr. Stefansson said, was much like the medieval attitude towards the unexplored regions beyond the horizon—the terrors in both cases might be largely imaginative.

Fire alone stands in the way of the developing of a land area twice the size of the United States," he declared. "If you want the truth, assume the opposite of a dozen or so things you have heard about the north."

"Oil, coal and other resources are there. Climatic conditions are favorable. People are living and flourishing in places where there are no more than those at the north pole. For example, the lowest temperature at the pole is about 60 degrees below zero, while 70 below has been registered in North Dakota, where the winters are just as severe as in the Arctic. At Verkhoyansk, in Siberia, the mercury has dropped to 93 degrees below zero.

"The course of empire, of civilization, must inevitably give a move toward the north, and Americans, citizens of the nation of progress, must realize this fact."

Bryan Mourns Radio Failure

Heartbroken When Told McKelvie's Message was Broadcast and His Lost.

Lincoln, Jan. 6.—(Special)—Governor Charles W. Bryan was heartbroken today to learn that the message of ex-Governor McKelvie was broadcast over the statehouse wireless while his message was confined to the four walls of the house of representatives.

The governor was informed by George Johnson, state engineer, that someone, either through ignorance or through premeditated malice, put the statehouse radio amplifier out of commission just before Governor Bryan delivered his message.

"It is something for the legislature to consider," Governor Bryan said.

"Would you call for a legislative investigation?" he was asked.

"No," he replied. "I believe not, but the legislature should know what caused the trouble."

Racing Results in The Omaha Bee

New Service Gives Complete Information on Activities at Winter Tracks.

A new service for readers of the sport pages has been started by The Omaha Bee.

Results and entries of the running races now being held at Havana, New Orleans and Tijuana will be published complete each day in The Morning Bee.

This information comes to this newspaper by special wire direct from the tracks and includes prices paid and the time on winners, together with the weights on entries.

Arrangements for this new service were completed by The Omaha Bee because of the increased interest in Omaha and Nebraska in running races.

It offers the fans an opportunity to follow the performances of their favorites at the three big tracks and to keep in touch with the winter form of the thoroughbreds that will race at the spring and fall meetings at the Ak-Sar-Ben track in Omaha.

The Omaha Bee is the only paper in Nebraska providing this service for its readers.

Day's Activities in Washington

The agricultural appropriation bill was reported to the senate carrying \$72,900,000.

A house committee recommended an appropriation of \$5,000 to make the White House fireproof.

A bill was introduced by Representative Uphaw, democrat, Georgia, to make the buyer of outland liquor equally guilty with the seller.

The senate adopted a resolution declaring its opinion that President Harding should bring about the immediate return of all American troops on the Rhine.

Secretary Hoover declined an offer of President Harding to be transferred from the Commerce to the Interior department upon the retirement of Secretary Fall March 4.

Members of the United States coal commission expressed the opinion that danger of a strike in the unionized bituminous fields after April 1, had been averted.

Arrangements were made for the first formal meeting of the British debt commission Monday. The latter, after a meeting announced that its members were in "general accord" on the main principles of the debt problem.

After a conference with Secretary Hughes, Chairman Lodge of the senate foreign relations committee announced he did not believe the time was opportune for action on the resolution of Senator Robinson, democrat, Arkansas, looking to America official representation on the reparations commission.

No immediate government action was said to be in prospect with reference to the German reparations situation. It was indicated that the Chamber of Commerce of the United States was considering renewing its efforts to substitute business diplomacy for intergovernmental exchanges in working out a new proposal on reparations.

Families Driven From Homes in Oregon Floods

One Known Dead as Heavy Rains, Landslides, Wreak Havoc Along Northern Rivers.

Portland, Ore., Jan. 6.—Heavy rains of several days resulted in all rivers in western Oregon reaching the flood stage. The body of an unidentified man was found today under a landslide caused by the rain in the Hood river vicinity.

The Santiam river overflowed, drowning stock and driving residents from the lowlands. One of the oldest bridges across the Hood river was carried away when logs hit it last night. The Dalles reported bridges in that section over creeks and small streams were carried away.

Railroad tracks were washed out in different parts of the state and the Columbia river highway was blocked by mud slides. Telephone and telegraph companies reported their lines were crippled to some extent.

A family was removed in boats at Williams when rising waters marooned them in the Nebraska State.

There was a constant downpour for 48 hours in the Hood River valley, which together with the snow water from a chinook wind on Mount Hood, sent the river to the 11-foot stage today, which was two feet higher than any previous flood on record.

Big Party to Be Held for Visiting State Teachers

An entertainment feature for visiting teachers of the Nebraska State Teachers' association, January 19 at the Auditorium, will be a soiree.

Belle M. Ryan is chairman of arrangements committee. The Junior Chamber of Commerce will furnish 700 young men to serve as escorts for the teachers. The Duke of Timbuctoo will attend with his hair in a braid. Ak-Sar-Ben and South Omaha packers will furnish the cats. On the program will be two high school bands, a skit by South High school clown band, Concord club's saxophone band of 18 players, Adelaide Fog's dancers, Hoffman quartet and a grand mixer march.

The soiree will start at 8 p. m. and will continue until 12.

Senate Votes to Withdraw American Troops From Rhine

Washington, Jan. 6.—The senate went on record today as favoring withdrawal of American troops from Germany. It adopted a resolution by Senator Reed, democrat, Missouri, declaring it the sense of the senate that the president should bring about the return of the remaining occupation forces. The vote on adoption of the resolution was 57 to 6, the senators voting against it being Nelson, New, Reed (Pennsylvania), and Sterling, republicans, and Myers and Williams, democrats.

Senate Refuses to Limit Debate on Shipping Bill

Washington, Jan. 6.—Senator Jones, republican, Washington, in charge of the administration shipping bill in the senate, got nowhere today with his attempt to expedite action by limiting debate.

When the proposition was presented today, Senator Fletcher, democrat, Florida, said he had been asked by Senator Brookhart, republican, Iowa, to object. Senator Brookhart was absent and Senator Fletcher then objected on his own account.

War Issue Up Before Conference

Turkish Delegate Says Key to Peace Lies in Hands of Near East
