

Omaha Grain May 16. Total receipts at Omaha were 35 cars against 230 cars last year. Total shipments were 140 cars as compared with 231 cars a year ago.

Cash wheat on the Omaha market was slow to move, holders were firm and buyers hesitated in paying the advances asked. Sales were 1 to 2 cents higher. Oats sold readily, 24 to 2 1/2c higher. Rye was quoted 1 1/2 cents higher, and barley, strong and nominally unchanged.

Weak and lower Liverpool wheat market caused a bearish feeling in the early trading of the Chicago futures market and prices registered a sharp decline. Commission houses turned buyers on the decline being influenced by the cash demand, fears of damage to the winter wheat by the cold in the southwest and the strength in corn and oats.

Liverpool, Broomhall cables: Wheat easier on expectations of larger Argentine shipments and increasing offers of nearby manitobas, further pressure on May contracts, owing to early arrivals of Argentine cargoes. Australia is expected to export further 3,000,000 bushels and India further 16,000,000 bushels by end of the season.

The Rosebloom Grain corporation of Chicago, has a confirmation of damage to wheat in Kansas in the following: All of southern and central Kansas which promised a record yield a month ago will not now make more than 10 to 15 bushels an acre. This condition shows up since wheat has failed to head. It is thin and 15 inches high with small heads. Rains will help, but no chance for large yields.

George M. Leavenworth, director of the Illinois grain commission, said that the general condition of wheat in Illinois is fairly promising. Considerable acreage is in the north part, but soil and weather conditions are perfect and the thin fields should improve materially. Oats look fine.

Price Current says: Field work made fairly rapid progress the last week and latest reports from the American northwest suggest that the reduction in the acreage will be smaller than expected earlier in the season. The executive vice president of the Chicago Board of Trade, told several hundred business men attending the Illinois Grain Dealers' convention last night.

Mr. Mauff, who spoke at a banquet given by the Chicago board of trade, concluded a series of addresses in the east with leaders in industry, commerce and finance. All agree, he said, that there is very reason for continued prosperity if a same course is steered.

On his own business he continued, turning specifically to the grain trade, we have just passed through a transition period. The exchange is functioning under government supervision. The agrarian groups have been granted all their demands. The government and the exchanges are cooperating heartily to carry out the letter of the law and maintain the high efficiency of the marketing machinery. There is every reason to anticipate success.

Chicago Grain By CHARLES J. LEYDEN. Chicago, May 15.—An influx of bullish crop news that bordered on the sensational emanated out of the winter wheat belt of Kansas today, arresting an early dip in the market and resulting in a decided reversal of the trend.

What closed 1 1/2 to 3c higher, corn corn 1/2 to 3/4c up, oats 1/2 to 1 1/4c higher, rye 2 1/2c advanced and barley finished numerous.
