

9 Grain Exchanges Are Designated by Government

Purpose of Futures Act to Curb Big Speculators From Improperly Influencing Market Explained.

Washington, May 17.—Under the Grain Futures act of September 21, 1922, nine grain exchanges, after revising their bylaws to conform with its provisions, have been designated by the secretary of agriculture as contract markets to continue trading in grain futures. In October, immediately after the passage of the act, the Los Angeles Grain Exchange, the grain division of the San Francisco Chamber of Commerce, the Milwaukee Chamber of Commerce and the open board of Chicago applied for designation as contract markets and were so designated by the secretary.

Later the constitutionality of the act was tested in the courts and no more applications were made until the act was upheld by the United States supreme court April 16, 1923. Since that date the following exchanges have been designated as contract markets: Minneapolis Chamber of Commerce, Chicago Board of Trade, Kansas City Board of Trade, Duluth Board of Trade and the St. Louis Merchants' exchange. The list of designated exchanges included the principal grain markets on which there has been trading in futures.

The Toledo Produce exchange, one of the oldest grain exchanges, decided not to make application for designation for trading in grain futures. It is the largest market for timothy seed and clover seed, which do not come under the meaning of the act, and the exchange will continue to deal in futures of these commodities. Other grain markets in various cities deal in cash grain for which no designation is required.

The Department of Agriculture has found a quite general misunderstanding of the scope and purpose of the Grain Futures act. Many persons seem to think it will stop speculation in grain by all persons outside the grain trade; in other words, the general public.

The truth is the act places no check on any individual in buying, or selling short, for ordinary speculation. One of the chief purposes of the act is to curb manipulation and operations of big professional speculators who may by their trading improperly influence prices.

It also makes it possible for the government to demand that the designated exchanges take precautions to prevent their members from issuing false or misleading statements which might have a tendency to influence prices or trading.

The grain futures administration of the Department of Agriculture has already established in Chicago and Minneapolis offices in charge of supervisors, who keep in close touch with transactions on those markets.

Two Wives of Same Man Refuse to Prosecute

Lester Gillincio, reported husband of two Omaha women, who is alleged to have posed as a postal inspector making trips about the country by airplane to inspect postoffices, was arrested Wednesday night as he stepped from a train at the Union station after his second wife, Helen Gillincio, had become suspicious and had shown some of his letters to police.

His first wife, Edith, 5601 North Thirtieth street, filed suit for divorce March 10 and shortly after that Gillincio married again.

He left his second wife at 5223 North Eighteenth street and returned to the home of his mother, 830 South Nineteenth street, and wrote letters to tell of his travels. Wife No. 2 investigated.

Neither woman will place a charge of bigamy against Gillincio, who is being held for investigation.

Parade Chief Feature of Memorial Day Observance

Plans for the official observance of Memorial day in Omaha this year were completed Wednesday afternoon. Chief feature of the observance will be the parade, which will start at 1:30 May 30.

Col. C. F. Weller will be grand marshal. Fifteen organizations will be represented in two divisions.

The line of march will be east on Sixteenth street from Capitol avenue to Douglas, west on Douglas to Nineteenth, south to Farnam, east to Fifteenth and south to the Auditorium.

Two-Day Celebration Is Planned for Omaha Troops

Falls City, Neb., May 17.—The coming of 500 troops of the Second battalion, 17th Infantry, from Fort Omaha Saturday will be made the occasion of a two-day celebration here, to which all Richardson county has been invited. In addition to the army maneuvers and band concerts, there will be a ball game between Falls City and the army team on Sunday afternoon.

Insurance Firm Loses.

Verdict of \$75 was awarded Abe Lewis by a jury in district court against the National Fire Insurance company. Lewis sued the company for \$1,500, claiming it refused to reimburse him for damage caused by fire. The company alleged that the damage was negligible.

Entries for Pet Show Must Be Made Early

All pets to receive prizes in the personality pet show Saturday afternoon must be registered Saturday morning at the Humane society animal shelter between 9 and 11. No pet will be received for the show after 11. The regular shelter luncheon will be served at noon to all the animal visitors that day. The shelter dogs and boarders will also give up their daily run out of doors and stay in their kennels all day so that the visitors may be comfortably located in the runs for the show.

The prettiest dogs will be grouped together with the prettiest cats in another group as far away as possible. The most unique animals will be quartered in the garage of the Humane society headquarters. As far as possible "birds of a feather will be flocked together."

Supreme Court Urged to Advance Sugar Hearing

Motion Says Early Decision on Government's Power "Vital to Welfare of American Public."

Washington, May 17.—An early decision on the power of the federal government to afford protection against speculation in the necessities of life is "vital to the welfare of the American public."

This is the basis on which the Department of Justice urges the supreme court to advance the appeal from the New York district court's denial of an injunction against the New York Coffee and Sugar Exchange and the New York Coffee and Sugar Clearing association, to stop futures trading in sugar.

The motion to advance the appeal was completed today and will be filed with the supreme court as soon as it can be printed, probably Friday, it was announced by Acting Attorney General A. T. Seymour, who has personal charge of the case. Formal presentation of the plea that the appeal be "set down for argument on the earliest day convenient to the court" will be made on Monday by Solicitor General James M. Beck.

Department of Justice officials declined to comment on the possibility of decision before the supreme court recesses for the summer on June 11. They said emphatically, however, that if the court should so indicate, they would be ready to argue the matter at once.

The petition to advance points out that if the government is without power to deal with the situation under existing law, this fact should be finally determined, so Congress might take up the question of enacting additional legislation when it is convened in December.

Mah-Jong, Favorite Game in China, Grows Popular Here

Mah-Jong, a favorite game in China, is becoming popular in Omaha. The Burgess-Nash company is now offering professional instruction in the game, having obtained the services of Mrs. Katherine Hill of Los Angeles. She is to form instruction classes which are to be conducted without charge.

So enthusiastically has the game of the "thousand wonders and hundred intelligences" been taken up that the Burgess-Nash company is devoting an entire window to a scene in which two women are being shown the game by two Chinese men. These men are of high caste, and one of them is wearing a robe valued at \$2,000. It is loaned by Miss Elizabeth Konigsmacher of Council Bluffs. The Chinese figures are exact reproductions of Chinese characters and were produced by Frank E. Lob, noted Chicago sculptor. The window is on Sixteenth street.

Cut Grass High

It costs less to grow and care for Blue Grass Sod than Weed grasses and Dandelion lawns. Blue Grass if not Cut Short will kill out all Weed Grasses and Dandelions. If you use a Victory Mower, it will be the means of producing a Blue Grass Sod.

WHY?
Because it is specially made to cut grass HIGH, which requires less water.
The Victory Lawn Mower is a new machine, different from other makes. Made from Pressed Steel, making it Lighter and Stronger. Has all good qualities of other mowers with Three Essential improvements which have long been asked for.
First—The high wheel—Twelve Inches.
Second—Lightness of Weight yet Non-Breakable.
Third—Most essential. It Will Cut Grass High because of specially designed and built Reel and Cutter-Bar attached.

Judge F. C. Hill Talks at Omaha Science Church

Member of Board of Lectureship Speaks on "God's Revelation of Spiritual Healing."

Judge Frederick C. Hill, C. S., Clinton, Ill., member of the board of lectureship of the Mother Church, the First Church of Christ, Scientist, Boston, Mass., gave a lecture on "Christian Science: God's Revelation of Spiritual Healing," in the First Church of Christ, Scientist, Omaha, Thursday night. The lecture will be repeated tonight. Judge Hill said: "Christian Science is, as its name implies, essentially Christian and its practice being predicated upon absolute love and deliverance from sin. This being the case, Christian Science, as a great religious movement must be based upon a revelation of the teachings and practical truths presented in the Bible. Least there be confusion in the thought of those who have never investigated this subject, I assure you that the outset that Christian Scientists use for their study and in all their church services one Bible authority, that of the King James version of the Old and the New Testaments.

Christian Science as it is presented to you and is meant to be, is a discovery by Mary Baker Eddy of the operation of absolute, fixed spiritual law. In an impartial investigation of Christian Science it is desirable, in fact quite essential, to know somewhat of its discoverer and founder. I feel quite safe in assuming that my early experience in the investigation of this subject is similar to yours. My first impulse was to inquire, 'Who is Mrs. Eddy?' 'What did she discover and find?' The answer to these questions is simple and helpful.

"Mrs. Eddy was a devout and lovable New England woman, deeply interested in the Bible. Early in childhood she displayed a keen perception of the underlying truths contained in Bible narratives. Through her research and study of the Bible she noted that perfect trust and confidence in God's laws were followed by permanent and fixed results and that blessing and healing were part and parcel of His infinite plan. Hence Mrs. Eddy discovered and proved the divine laws of life, truth and love. After this discovery she subjected it to proof and being convinced of the healing and redeeming ministrations of these spiritual laws she determined to give to the world the benefit of her observation and discovery. Accordingly she wrote and published 'Science and Health With Key to the Scriptures' and designated it the Christian Science textbook. The reading and study of this book, in connection with the Bible, has brought health and healing to many and is indeed a key to God's inspired word—the Bible.

"Regardless of conflicting reports, I make this positive and emphatic declaration of fact: Mary Baker Eddy is the discoverer and founder of Christian Science and has been so decreed by our courts.

"It will early be discovered that Christian Science emphasizes the final destruction of sin and the healing of body, mind and spirit. Some of our religious friends have offered the criticism that Christian Scientists make too much of the healing element. At no time does the human mind part with cherished beliefs or relinquish traditional claims until proof, clear and convincing, is shown.

COSTS ONLY 50c BUT MY, HOW POSLAM HEALS!

Poslam is so concentrated and acts so directly that a very little of it goes a long way. Its medication is so gentle that it cannot irritate the most delicate or inflamed skin. Eczema, rashes, scalp troubles, pimples—they simply cannot resist Poslam. At all druggists, 50c.

and positive, has been presented showing that there is a better way. It is not surprising, therefore, that after material methods have failed and Christian Science treatment has restored health and happiness to the individual very much should be thought and made of the healing element. In fact, all Christian Science practice is healing in character whether it is applied to bodily afflictions or to some other forms of discord.

"Mrs. Eddy has discovered and applied the laws of Spirit. The false beliefs regarding these laws or the willful rejection of them in no way affect their intrinsic value and they remain ever available to all who will understand and apply them according to their Principle. Christian Science is applying the red letters 'Counterfeit to the false conclusions and the false beliefs masquerading as realities in the human mind. It is unfolding to the receptive thought and bringing into human experience positive proof that 'There is no life, truth, intelligence or substance in matter' and is bringing into view the basic scientific facts of spiritual truth. It is furnishing undeniable proof that ignorance and false belief have no part or place in God's creation.

"In the consideration of Christian Science it is absolutely essential to understand the nature of good and evil and to be able to distinguish between that which is intrinsically good and that which presents merely the appearance of good. Christian Science declares in no uncertain manner that God is the source of all good and that the human—the carnal—mind is the procuring cause of all evil. It presents logical, irrefutable proof that man lives by divine decree, and that the Scriptural text, 'In Him we live and move and have our being' declares the real status of man and not merely an emotional theory. It declares emphatically that evil is not a person, place or thing; that it is not a cause or creator, and that there is no realm or dominion over which evil is the sovereign power. In fact, it denies that evil has any power except such as it assumes in human belief and it then destroys this assumed power by overcoming the human mind with the divine Mind.

"Christian Science presents to you the conception of God as infinite mind, spirit, soul, principle, life, truth, love. It presents nothing about Him save that which is supported and sustained by Bible authority and which is rational and comforting. When it is perceived that God is infinite divine mind it at once becomes apparent that like produces like, hence His creation must of necessity be mental and not material. God must be sought and found, if at all, through the avenue of divine mind and not in or through matter. It then becomes clear that the real man whom

God pronounced good lives, moves and has his being in mind, and is a spiritual, not a material being, and because he is an idea in mind he can and does express the qualities of that divine mind which created him.

"There is a very erroneous and un-Christian belief ignorantly entertained by many concerning the attitude of Christian Scientists toward the experiences called sickness and death. The opinion is often erroneously entertained that they are unmindful of these distressing human conditions and that they offer no relief to those who unfortunately suffer from these beliefs. Nothing could be farther from the truth. They freely admit that these conditions call for the highest degree of human compassion and they are proving their usefulness and competency by supplying humanitarian compassion in a most effectual Christian manner.

"They are healing sickness, sorrow and dire distress in the most effectual way, in fact they are doing it in the only way that holds out a ray of hope or promise for the final deliverance of those who are afflicted with these conditions, do not agree with those who adopt the theory that there is something wrong with matter and therefore something material must be administered to restore harmonious action.

"A Christian Science treatment is a conscientious effort based upon a sincere desire to bring into human experience 'the enduring, the good, and the true' so that by the renewing of the mind it can be proved what is that 'perfect will of God.' In other words the reformation of the sinner and the healing of the sick is but proof that divine Principle, God, is present and available and is, as we have heretofore seen Immanuel or God with us. This happy and desirable mental condition is established through the medium of prayer. There is great lack of understanding among Christian people as to what constitutes true prayer. This lack of absolute knowledge is the procuring cause of much error and accounts for

the erroneous belief that Christian Scientists do not pray. Such belief has no foundation in fact. They pray continually and understandingly and the fruits of their prayers are rich blessings to humanity. It must be remembered however, that in their prayers they do not supplicate God to conform His will to theirs or to change His infinite design. Neither do they charge Him with human delinquencies and as a matter of course they do not petition Him to remedy or correct that which He has created. They do pray to Him from the standpoint of sincere desire and 'absolute faith that all things are possible to Him,' and such prayer is answered by driving out of human consciousness the diseased, erroneous images of thought and letting in the light of God's man created in His image and likeness."

Visiting Musicians Honor Guests of City Concert Club

The City Concert club held a luncheon at the Brandeis restaurants Thursday noon in honor of George W. Campbell, a former active member of the club. Mr. Campbell comes to Omaha for the Association Male chorus spring concert which took place at the Brandeis theater Wednesday evening. Mrs. Frances Nash-Watson was also an honor guest.

Mrs. Hester B. Copper, president of the City Concert club, was mistress of ceremonies. She introduced many of the prominent musical people and the speakers, and also announced the plans of the club which will send out an appeal for memberships to finance a band which will give concerts in the city parks this summer. Forty guests were present.

Turns Abolished

Right and left turns at the corners of Sixteenth and Farnam and Douglas streets have been abolished, according to an announcement by Police Commissioner Butler. All traffic will be straightaway only at these intersections.

Free Lecture on CHRISTIAN SCIENCE
