### Improvement by Breeding Success College Savs

Animal improvement through breeding is being practiced with much success, says the agricultural college. In hog raising. Nebraska has demonstrated to the country what the use of good sires can accomplish. It seems very peculiar, therefore, that equal attention has not been given to improving the milking cattle by the use of good sires. Strange, as milk cows of the state are bred to purebred dairy bulls. Nebraska stands near the bottom of

the list of states with only a little more than a ton and a quarter of per cow compared with almost state of Washington. That state re-
