MACK SENNELL'S

The deeper we stir the soil the more rain it will hold, and the better the crop will be, but this doesn't mean that we should get the biggest shovels on the cornplow that we can find and injure the corn roots with them. We have reference to the preparation of the soil for the crop.

We don't know anything that will give soil any deeper working than sweet clover will, unless it be its sister crop, alfalfa. You are letting the best part of your farm go to memers, have been organized among hit waste if you are not using one of the boys and girls, according to Earl these legumes, which are known to G. Maxwell, county agricultural exbe regular subsoilers. Sweet clover, tension agent. however, is the one for a short and very beneficial rotation.

Some of the experiment stations, Ohio especially, has given soy beans agent. Vera Donahoo was chosen a black eye, with the statement that president, Helen Donahoo, vice presithey can't compare with tankage in dent; Luree Schneider, secretary protein value. But just remember treasurer. that soy beans will grow where alfalfa and clover might fail, and the protein they supply doesn't cost as much per ton as it does in the case and organized again for the second of tankage.

Even if soy beans were only half vice president; Vietta Hansen, secre as good as some claim them to be, tary and Gladys Schomer, treasurer.

still there would be a place for them on the farm, especially in those years when the spring finds the alfalfa or red clover missing from the meadow. It's mighty fine experience to find one of those towns that seem to have no city limits—where the city just naturally dwindles away into the country, and where town folks and country folk belong to the same high country folk belong to the same big

enthusiastic family. In this country of the corn-fed wcritter" for the beef market, we sometimes almost forget that there is such an animal as the dairy cow. It is she who keeps the loose change in the nocket while we nile the corn in the pocket while we pile the corn in the pocket while we pile the corn and alfalfa or clover hay into the steer that may make or break us. Muddy roads are interfering with the schedules of intercity bus lines, most of the busses arriving 30 minutes to two hours behind their regular time.

It isn't so hard a job to mink a It isn't so hard a job to mink a cow, even in the sultry days, if we will quit in the field soon enough so that we don't have to do the milk-ing after nightfall. A milk stool is sometimes a restful place and the reward comes soon. It isn't so hard a job to mink a the Thayer County. Hebron-A crop field day wil be held at the Thayer county farm, three miles east of Hebron, on Friday, June 22, ac-cording to L. C. Christie, county agent. Paul H. Stewart, state extension agrono-miet of the college of agriculture of the University of Nebraska, will discuss vari-ous phases of the work being done at the farm, it was announced.

There is much discussion among feeders as to whether or not the grain for the beef steer should be ground. For the dairy cow, we'd grind it For the dairy cow, we'd grind it every time, and we wouldn't care if the cob were left in it besides.

the cob were left in it besides. Before long, the bluegrass pasture may be drying up, and then those who haven't any sweet clover in who haven't any sweet clover in their stubble fields will be sorry for

their stubble fields will be sorry for the hungry cattle. The greatest profit is made on young hogs, so the quicker we can The greatest profit is made on young hogs, so the quicker we can grow them the better it is for us. Alfalfa and good grass build the frame. Corn only pass on the fat.
