other seven ready by the last of August. More than 200 men are at work daily getting the stadium into form for the 1923 football season. Among them are several candidates for the football team, men who are helping to build the stadium in which they will play football this fall. The above picture gives a splendid view of the activities on the new stadium. To the left, which is the west side, can be seen two of the sections that have already been poured with concrete, and the third of the five sections to be placed on that side now in process of preparation. In the center can be seen the steam shovel which keeps 40 men, 70 horses and two caterpillar trace fors with four wagons trailing each one, busy throughout the day removing the 60,000 cubic yards of dirt from the stadium site. On the right is the first of the five sections in process of construction. Concrete has been coursed into this section for several days now. In the foreground can be seen the spur track which brings the ma erials for the stadium to the scene of the activities.

Champion Reynolds Retains Golf Title

tournament experience qualified him to keep cool at all times. Morris, who can be ranked as just a sensational player, was pitted against one of the smoothest working golf machines in the middle west.

Don't Grow Old Before Your Husband

Science Now Shows What Often Causes Premature Loss of Youth, Beauty and Attractiveness and Makes Women Fretful, Nervous and Run-Down

Women Look and Feel Years Younger and Surprisingly Increases Strength and Energy Thousands of women are like the woman in this picture. They have grown old much more rapidly than their husbands. The roses have faded from their cheeks, they are weak, pale and careworn at a time of life when they should still be filled with buoyant health and radiant with youthful beauty -pale, thin, watery blood has fastened its grip upon them and is gradually sapping their health, vitality and beauty. In most cases men safeguard their health better than women by eating coarser foods, being more out of doors and leading more active lives, therefore keeping their blood stream strong and vigorous. For want of good blood a woman may look and feel old at thirty; pale, haggard and all run-down-while at fifty or sixty, with good health and plenty of rich, red blood, she may still be young in feeling and so full of life and attractiveness as to defy detection of her real age. For the purpose of enriching the blood and belping to create
