

Public Won't Stand Strike, Pinchot Says

Warns Miners and Operators Welfare of Nation Takes Precedence Over Any Dispute.

(Continued From Page One.) The details of the present controversy but it knows the essential facts. I express a truth none will deny, when I say that the anthracite-using people of the United States are losing patience, and I ask you to consider the fact with care.

Governor Pinchot emphasized to the operators and miners that it is the desire of the government, the commonwealth of Pennsylvania and the public that the controversy be settled on terms of "even-handed justice." A settlement based on anything less than justice to all could not properly be expected, he said.

"Other reasons to show that an anthracite strike at this time would work disaster upon the country were brought into play by the governor in his appeal.

"The country is just now entering upon a period of prosperity after a prolonged depression. The closing down of the anthracite mines would tend to undermine the confidence essential to a continuance of this prosperity," he declared.

"Our railroads are heavily taxed already. An uneven output of coal—now much and now little—will tend to block transportation and the blocking of transportation will be almost as effective in making a coal shortage as in closing the mines."

Referring further to possible terms and methods of settlement, the nation's new strike mediator stated: "Settlement means that neither side can get everything it would like to have. Few people ever do in the world we live in. But the settlement of this dispute is absolutely necessary for the public safety and welfare. The public needs and must have coal and I am entirely confident that the public is going to have it. It is my duty to insure to the public by every lawful means at my command the necessary supply of coal."

Right of Organization. "I recognize the right of mine workers to organize for their own protection and to obtain fair and decent conditions of living. I am fully aware that the strike is a right which should not be arbitrarily abridged or denied. The exercise of this right, however, should be made unnecessary by the use of orderly and reasonable methods of settlement."

"I recognize the right of mine operators to a just return on their investment and their managerial ability.

"As the representative of this commonwealth, I am here to tell you that these rights are to be recognized and protected also."

At the conclusion of the open meeting with miners and operators shortly after noon, the operators returned to their headquarters to formulate their statement to the governor at their executive session tomorrow morning.

Greater London, with a population nearly 2,000,000 more than Greater New York, has far fewer fatal street accidents. Figures recently published in England show that in the entire metropolitan area of London 149 persons were killed in the first three months of this year, while 160 were killed by automobiles alone in New York City in the same period.

"Get Rich Quick" Plan Is Bootlegging Scheme

By Universal Service.

London, Aug. 27.—Sir Broderick Hartwell's "get rich quick" offer to investors is again an absorbing topic. A new circular issued in explanation of his project, guaranteeing a profit of 20 per cent every 60 days, is hot off the press. It reads:

"I have arranged with an American syndicate to take from me 10,000 cases of high class Scotch whisky monthly. As a guarantee of good faith, they have lodged the equivalent of 10,000 pounds in government securities and also 3,000 pounds sterling cash, to pay for the goods.

"I am shipping to an agreed point on the high seas, where the goods will be paid for in cash on delivery.

"Please understand that this is not any smuggling expedition. It does not conflict with the laws of England or any other country. I will sell my goods at sea to those buyers who come alongside to purchase."

Cords from window shades can be purchased very cheaply, and if every shade is supplied with cords they will never be rolled up crooked.

Lambs Bought Up in Wyoming

Most of Feeders Contracted for, Burlington Livestock Agent Reports.

John Petrie, livestock agent of the Burlington railroad, who returned yesterday from a trip to the Casper and Sheridan (Wyo.) divisions of the road, said almost all lambs raised in those areas were contracted for.

"Although there are a few small bunches scattered here and there," said Mr. Petrie, "there will be only a very few come from there this season. In the last three weeks buyers have been active and most of the feeders at Fort Collins, Colo., have been purchased from Wyoming and Montana sheep raisers.

"According to advices received, lambs in New Mexico are also almost cleaned up. In Wyoming the most of the contracting was done at a price of \$9.50 to \$10.50 a hundred.

"This time a year ago prospects for feeding of livestock were not as good as now. There is an abundance of feed and all classes of livestock are being put into the feed lots, which will keep the corn price up regardless of an unusually large yield.

"The corn crop in Nebraska is in excellent shape and with two more

Car to Be Given Away in Columbus Auction

Columbus, Neb., Aug. 27.—Columbus merchants with co-operation of the Chamber of Commerce are planning a "fun auction" to be held in Franklin square October 10. At this auction an automobile will be sold along with \$1,000 worth of merchandise offered by merchants.

Each merchant of the first 40 to enter his name with the Chamber of Commerce pays \$15 in cash toward the automobile and an equal amount of merchandise to be selected at invoices by the committee.

For this donation each merchant will receive \$3,000 in Columbus wampum or script. He will in turn give each one of his customers paying cash for their merchandise \$1 in script for each \$1 that they spend with him in buying regular articles during the period prior to October 10.

These scripts will then be used as money during the sale of merchandise and the auctioning off of the car. The man who can bid the most wampum or script will get the car and the others can bid their scripts on the articles of merchandise offered for sale.

Crops Ruined, Barns Wrecked by Storm

(Continued From Page One.) hundreds of acres of corn are 50 per cent loss. At Thompson, 20 miles east, hail ruined a large melon patch and killed several dozen young turkeys belonging to C. L. Hledsoe.

The roof of the farm house of C. C. Myers, two miles north of Thompson, was pounded to pieces.

Corn Crops Ruined. Wayne, Kan., Aug. 27.—A severe hail storm six miles wide came from the northwest and passed through Republic county, doing the heaviest

damage so far reported about one-half to two miles east of here.

Sixty acres of fine corn on the C. A. McKenzie farm was laid waste.

J. W. Salmon lost 39 acres.

Campbell brothers had a 50 per cent loss on 250 acres of bottom corn. E. L. Shepard lost two stacks of wheat by lightning.

Much wind and two and one-half inches of rain accompanied the storm.

The windmill at the Burlington pump station here was blown over and hundreds of windows and trees broken.

Many chickens were killed, and acres of melons ruined.

An auto tourist arriving here stated that hundreds of acres of corn between Barnes and Greenleaf and

Wayne were blown down and stripped of ears and leaves.

Lightning Fires Barn. Harvard, Neb., Aug. 27.—Fire, started by a terrific bolt of lightning, consumed the greater part of a large barn on the Fred J. Paulus place in the west part of town. Mr. Paulus, who was shopping downtown, did not know his property was ablaze, and came home to find the city fire department attempting to control the fire. A large amount of hay and other miscellany was burned, but a cow escaped to the pasture.

Rain Helps Corn. Beatrice, Neb., Aug. 27.—Heavy rains fell in this section of the state last night. Farmers say the moisture

will fill out the corn, which promises a big yield, and put the ground in fine condition for fall plowing.

Stella, Neb., Aug. 27.—An inch of rain which fell last night was needed for fall plowing, and helps late corn.

Wymore, Neb., Aug. 27.—A good shower covered southern Gage county Sunday evening, the first rain, except a few sprinkles, for 10 days. It was of value in helping the immense corn crop nearer to a bumper crop.

Fall plowing is well under way and the ground is in excellent condition. It is apparent that the acreage of fall wheat sowing will be considerably less than former years, as farmers claim it does not pay.

Always the Same — Always Pleasing

Think what it means to go to your dealer and be able to obtain cheese of exactly the same quality and flavor as that which so pleased you the last time.

Yet that is the very thing you can be absolutely sure of when you order Kraft Cheese—either in Loaf or in Tins.

And its remarkable keeping qualities and absence of rind make it the most economical.

Four varieties: American, Pimento, Swiss and Brick, sold by the slice, pound or loaf.

PIERCE

The Pierce-Arrow Enclosed Drive Limousine is undoubtedly the most usable type of car ever created. In no other way can we account for its widespread acceptance during the last two years.

It is a correctly-appointed Limousine, and yet the turn of a handle converts it into a companionable owner-driven seven-passenger Sedan. The full-width glass partition disappears completely so that the rear and front compartments become one.

The six-cylinder engine has far more power than its rating and is flexible almost beyond belief—because of dual valve and dual ignition, exclusive Pierce-Arrow developments.

We are glad to demonstrate this or any other of the twelve beautiful Pierce-Arrow models. A request will bring a courteous driver to your door.

Open Cars \$5250 - Closed Cars \$7000
