
Buy Petroleum Carbon Says Guy L. Smith

Distributor Peerless, Jordan and Cleveland Motor Cars

"It's the cleanest fuel on the market. Before using Petroleum Carbon we used to accept a certain amount of smoke and soot as a matter of course. Upon your recommendation we began using Petroleum Carbon, and since that time our house has been absolutely free from smoke and soot and without ashes to carry."

Buy Petroleum Carbon Says James Corr

James Corr Electric Company.

"It's the most convenient fuel we've ever used. Last winter I scarcely gave our furnace any attention at all, yet during the most extreme weather our house was warm and comfortable. And the fact that Petroleum is absolutely ashless was a source of joy to me at all times. We found Petroleum Carbon to give complete satisfaction."

Buy Petroleum Carbon Says W. H. Clark

Leavenworth Laundry Company.

"It's the most economical fuel we've ever used. Previous to 1922 I had always burned 12 tons of hard coal and got the idea that I couldn't use less. However, after using Petroleum Carbon last winter I discovered I could keep the house dandy and warm with only eight tons of Petroleum at an actual cash saving of \$116."

Buy Petroleum Carbon Says T. L. Combs

T. L. Combs & Maser Company.

"It's the ideal fuel. I consider Petroleum Carbon the ideal fuel because it has no ash and therefore no waste; it is absolutely sootless, smokeless and without dust. I didn't have a bushel of ashes all last winter and our house was always warm and comfortable and required little attention under all weather conditions."

Buy Petroleum Carbon Says H. B. Whitehouse

National Cash Register Company.

"There's no fuel to equal it. After believing that we were using eight tons of Petroleum Carbon to heat our new house you can imagine my surprise when your tickets revealed that we were using but FOUR tons for the entire winter. For our eight-room house this figures but \$8.25 per room. That's why I say there is no fuel to equal Petroleum Carbon, nor is there any fuel that can measure in any way to the economy one gets in using it."
