

# Nebraska to Have Better Chance at Big Grain Show

## Redistricting of Country Will Aid Corn Growers in Competing With Other States.

Agricultural College, Lincoln, Oct. 7.—Nebraska farmers will have a better chance than ever to win in the corn classes at the coming international grain and hay show, because of a redistricting of the United States into regions.

In the past eastern Nebraska farmers have had to show corn against Iowa, Illinois, Ohio and Indiana farmers. In the new regions eastern Nebraska counties will compete only with northern Iowa and Illinois. A new region has been made for corn in which the western two-thirds of Kansas and Nebraska are the two chief corn producing areas. Farmers in Nebraska who live west of Lancaster and Gage counties, south of the Platte river and west of a line drawn south from the west side of Knox county north of the Platte river, will have an extra good chance to win in the corn classes.

Whole corn classes will be held as compared with the rest of the region in which they are placed.

Liberal cash prizes are offered on all classes, amounting to \$12,000 for the show. Last year Nebraska won first on alfalfa hay, competing against western United States. We should do as well this year.

The Nebraska Crop Growers' association will have an educational exhibit at the show and some one will also be on hand to unpack and arrange the exhibits. Entries in all classes will be received by November 1. Premium lists and other information regarding the show may be secured by writing P. H. Stewart, secretary Nebraska Crop Growers' association, Agricultural College, Lincoln.

# Creamery Men to Organize South Dakota Independent Dealers Will Promote and Protect Dairy Industry.

Wessington Springs, S. D., Oct. 7.—Preliminary steps for the organization of creamery men of South Dakota have been taken at a meeting at Parker, S. D., according to J. M. Rishol, newly elected secretary of the organization. Temporary officers were elected to complete the organization, which is to be known as the Independent Creamery Men's association of South Dakota.

"The purpose of the association is to promote and protect the dairy industry of South Dakota," Mr. Rishol said. "To endeavor to have more South Dakota cream churned in South Dakota, to have the cream only profitable to the state but will provide a much better market for the South Dakota butterfat producers."

"South Dakota is making rapid gains in dairying and a successful dairy country must have successful creameries in order to realize the very best returns from the dairy farms. This new organization hopes to be of some help in bringing these better conditions about."

F. H. Grey, Beresford, is the temporary president, and J. M. Rishol, Wessington Springs, temporary secretary.

# Farm Girl of Laurel Gets Watch as Prize

Lincoln, Oct. 7.—Miss Dorothy Norris, Laurel, Neb., who exhibited the grand champion steer of the boys' and girls' club cattle exhibits at the Nebraska state fair, has written to the Nebraska Agriculture college, advising Prof. H. J. Gramlich, of the animal husbandry department, that she received a white-gold wrist watch from the American Aberdeen Angus Breeder's association as an additional premium for her winning at the fair. This was not on the premium list. Professor Gramlich announced that the association had also appropriated \$10 to be prorated among the seven other boys' and girls' who showed Angus steers in the boys' and girls' club class at the fair.

# Farmers' Union Notes.

Hartington.—At the annual convention of the Cedar County Farmers Union at Hartington, Oct. 6, J. H. Barbach, Hartington, president; C. A. Whitely, Hartington, secretary; and C. A. Whitely, Hartington, secretary-treasurer; W. McKinnis, Hartington, secretary; and C. A. Whitely, Hartington, secretary, presided. Secretary A. C. Davis addressed a large crowd of farmers from his native county.

Stephens.—A farmers' meeting held under the auspices of the Stephens county extension agent, J. E. McLaughlin, was held at Stephens, Oct. 6. The meeting was held at the Stephens county extension agent's home. The meeting was held at the Stephens county extension agent's home. The meeting was held at the Stephens county extension agent's home.

Lincoln.—The Lincoln county extension agent, J. E. McLaughlin, is holding a series of meetings in Lincoln county. The meetings are being held at the homes of the farmers. The meetings are being held at the homes of the farmers.

Oxford.—A re-visit of the Oxford Farmers' exchange for the year ending June 30, 1922, made by the Farmers' Union audit department, revealed that the association was \$2,000 in the red. The audit department was \$2,000 in the red. The audit department was \$2,000 in the red.

# Poultry Culling Demonstration

It is proverbial that the man who goes into poultry on a large scale usually comes to grief but O. H. Love of North Platte, Pa., who is giving this demonstration, says that he finds his poultry a better-paying proposition than his dairy and in breeding his poultry flock he makes a selection from the best layers some time in October. These birds are then banded and used for breeders the coming year.

John J. Jaquish, the county agent at Tunkhannock, Pa., says that Mr. Love's great pride in culling poultry fanciers for miles around to come to his place to receive the first hand practical information he has about feeding for the whole year.

His poultry houses are models of convenience and sanitation. His birds are always healthy and happy, and he has a state-wide reputation.

# Omaha Poultry Dealer Report Heavy Slump in Demand for Fowls

## There Is Practically No Market for Hens, Ducks, Geese and Turkeys—This Is Principally Due to Approaching Holiday Season.

The poultry market is experiencing its usual post-holiday slump, according to reports from the commission house district. Hens, ducks, geese and turkeys are in little demand. The market for spring chickens and pullets is fairly active.

Spring chickens are being bought by commission agents at 17 cents a pound. Heavy broilers are being sold at 18 cents. Leghorns are 3 cents lower on the price scale.

The market for ducks is reported as very slow. Fifteen to 18 cents is the price range for quackers. Spring ducks weighing four pounds or over are the only ones in demand, and these are generally quoted at 17 cents.

Geese are in less demand than ducks. The turkey market is even slower. One large commission house reported that no more than half a dozen are being sold weekly. The demand for these is practically nil, except during Christmas, Thanksgiving and other holidays.

Squabs have been forced down to a much lower value than other years because of the small demand. Only the best squabs are being speculated in and these must weigh 12 to 16 ounces apiece. Squabs are being bought for \$5 and \$6 per cwt. in contrast to the \$5 and \$6 per cwt. being quoted in vogue for the past few years.

The price of two financial New York Bonds

New York, Oct. 7.—The most spectacular event of the financial markets last week was the sharp rally which occurred on the New York stock exchange on Wednesday. The rally was caused by a number of factors, including the announcement of the Federal Reserve board that it would purchase \$100,000,000 of government bonds.

The rally was also caused by the announcement of the Federal Reserve board that it would purchase \$100,000,000 of government bonds. The rally was also caused by the announcement of the Federal Reserve board that it would purchase \$100,000,000 of government bonds.

# Card Needed in Potato Storage

## Tubers Must Be Properly Dug and Handled to Obtain Best Results.

Lincoln, Oct. 7.—According to the Nebraska Agriculture college extension notes, made public today, potatoes should be dug in the best periods of the season, and the tubers should be handled in a way that will insure the best results.

"Only those potatoes that are of good quality and properly mature should be dug," the notes state. "Tubers that are badly bruised or immature or infested with fumigium will not keep well."

"After the potatoes are dug they should be allowed to dry for several hours, then be packed in crates or sacks and carefully placed in the bins or storage sheds. Rough handling and scooping is conducive to the entrance of rot."

"Ventilation is very essential, especially where large quantities are stored. False floors and sides facilitate the circulation of air, which carries off excess heat and foul air. Cold air intakes and warm air outlets should be provided at the rate of 70 square inches for each 1,000 square feet of storage space. If space is available the piles should not be over four feet deep."

"The atmosphere in the storage place should be moist enough to prevent shriveling, but not so moist that water condenses on the tubers. The temperature best suited to potatoes is from 32 to 35 degrees. It holds down decay and the potatoes keep their crispness. Outdoors they may be dug with success as in storing other root crops."

# The Business Barometer

## This Week's Outlook in Commerce, Finance, Agriculture and Industry Based on Current Developments.

By THEODORE H. PRICE, Editor Commerce and Finance, New York.

The week's business developments were of a nature to strengthen the outlook for full confidence with which most far-seeing business men are looking for the coming year. Short sellers on the New York Stock Exchange and elsewhere are being driven out of the market. This in itself was of significance.
