SHOP EARLY

The Christmas shopping rush will soon be on and then travel on the street cars will be attended with more or less crowding and discomfort, in spite of all the provisions we can make to handle the increased traffic. We, therefore, earnestly urge the public to shop early:

Stocks of merchandise in the stores are now at their best and salespeople can wait on you more satisfactorily now than they can later on.

Buy Her a Sundstrand for Xmas

Clean, Even Automatic and Dependable Heat in Your Home

Sundstrand
SILENT OIL BURNER
Economical, Convenient and Safe

Based Upon Principles Proved to Be Correct by Three Years of Experience

Burns Cheap Fuel Oil--Is More Economical Than Coal

With the Sundstrand Silent Oil Burner in your home there is always an abundance of clean, healthful and dependable heat in every room. No more attention to your heating plant needed than to your electric lights. It is simple, automatic and dependable. Burns cheap fuel oil, which is plentiful everywhere. It not only gives better heat than coal, but is actually more economical to use.

The Sundstrand operates satisfactorily and economically with ANY HOT WATER, STEAM OR HOT AIR HEATING PLANT and is installed without any costly alterations. Unlike coal, which must burn all the time, the Sundstrand uses fuel only when heat is needed. When the temperature of your home reaches the desired degree, the heat is automatically turned off and there is no waste due to overheating.

An important Sundstrand advancement is the elimination of all roaring and other objectionable noises when the burner is in operation. Then, too, the Sundstrand fire bowl does not throw the flame straight up. Instead it SPREADS the flame in such a way that ALL the surfaces in your heating plant are forced to absorb heat. Thus the heat developed by the burner is utilized, instead of being wasted.

The Sundstrand Silent Oil Burner is easily installed in ANY HOT WATER, STEAM OR HOT AIR HEATING PLANT and is easily removed, thus permitting the tenant to take it away when his lease has expired. Once installed, it is entirely automatic. It eliminates all the drudgery of maintaining the ordinary heating plant and does away with the coal and other heating problems.
