## Dr. Dallas Lore Sharp Admires Middle West

A wish that President Elliott of Harvard, President Faunce of Brown and former President Micklejohn of Amherst might make a special trip to Omaha to traverse the miles of the new Technical High school and "learn what real democratic education is like," was uttered by Dr. Dallas Lore Sharp, professor in Boston university and well-known contributor to Atlantic, Harper's Monthly, and other magazines.

"I have been making a pilgrimage to the public schools all the way across the country, starting with the new high school at Atlantic City, N. J. But I got my biggest thrill here in Omaha," declared Dr. Sharp.

"Omaha has not only been justified but glorified in its expenditure on the new Technical high school," ad-

ded white-haired and gracious Mrs. Sharp, who accompanies her husband on their adventurous midwinter motor trip across the continent from their ranch, Casa Loma, near Santa Barbara, Advent Hill, near Boston, to Santa Barbara, Cal.

Dr. Sharp is on leave of absence to finish his book on bees and their habits, three chapters of which have appeared from time to time in Harper's. The author has been presented with the use of a charming little ranch, Casa Loma, near Santa Barbara, on condition that the book when written shall be dedicated to the ranch. At Casa Loma he expects to reveal in orange blossoms and live a life like that of the ancient Greek honey-makers and honey-sweet singers who inhabited Mt. Hymettus, the source of most of the sweetness known to the ancient world.

**How Wife Feels.**  
"California is a marvelous bee country," thrilled the doctor with an enthusiasm worthy of a native. "The mountains are covered from base to top with blossoming sage—the same white and purple sage of which Vergil and Pindar sang. While most of my material for the book is already prepared, I expect to hunt make special observations on the habits of the California bees."

Mrs. Sharp had her contribution to make to the writing of the book. She said she expected to have to emulate Mrs. John Masfield, who looks her poet husband in his study every morning for four hours of lyric composition, and for two hours of dramatic writing in the afternoon. She foresaw the need of heroic methods if that book is ever to be completed.

**Art in the Fields.**  
However, pigs in Iowa proved almost as entrancing to Dr. Sharp as bees in California. In fact, the doctor showed himself so in love with the middlewestern farm scenery that no one would be greatly surprised to learn of his motor becoming permanently mired down in a Nebraska road, where there not two schoolboys named Sharp at Deep Valley, Cal., who impatiently await the arrival of their parents for Christmas.

The rich black of the newly plowed fields, in strong contrast with the white of the clinging snow, filled the farmer part of Dr. Sharp's soul with glee, while the author rejoiced in the cloud forms and glimpses of the pale green winter sky. Meanwhile the motorist self, equally important for the time being with the other two, was keeping out of the deep ditches at either side of the road, which he saw had swallowed a number of cars between Dunlap and this city. This did not in the least dim the doctor's ardors.

"The black pigs rooting around in the snow, the black Minora hens, the quantities of Angus cattle, of which there were quantities, all looked as though they were made out of that wonderful black soil and were a part of it. I never saw so much fine-tack in a similar short distance. There were pigs of all colors of the rainbow except purple.

**Wealth of Experience.**  
"We were greatly impressed with the beauty and self-sufficiency of the middlewestern farms, especially through Iowa. With their trees, their big barns and outbuildings, and especially with their round and battlemented silos, they resemble nothing so much as ancient Norman manor houses. We could not feel much sympathy with the farmer, we were so full of admiration for his energy and independence.

"I hope to gather up the experi-

## Women Discuss Clubhouse and Drugs

The Peters house at Thirty-second and Farnam streets is out of the running as a possible location for the new Women's clubhouse. The property was sold elsewhere late last week, according to a report made by Dr. Jennie Callias, new chairman of the clubhouse committee, at the general meeting of the Omaha Woman's club Monday afternoon in the Burgess-Nash auditorium.

Reports of the committee on drug addiction in Omaha, by Mrs. W. S. Knight, and of the committee on health concerning the course of drug addicts, by Mrs. Charles B. Neal, together with discussion upon them, occupied a good part of the business session.

Four hundred persons have been arrested in Omaha in two and one-half years for illegal sale of narcotics, said Mrs. Knight, and of these 90 per cent had been convicted. Two federal drug inspectors with headquarters in the postoffice building are charged with the task of running down these offenders.

**Narcotic Agent Speaks.**  
One of the federal agents, William Carroll, told the women's committee that 50 drug addicts had come to him voluntarily during the last year asking for a cure. He referred them to the sanitarium at Lincoln, which has a special department for treatment of such cases. The cure requires 90 days, although persons some times become drug addicts in as few as 10 days, according to this inspector.

A controversy has arisen whether the Nebraska prohibitive law permits sending drug addicts to the sanitarium for a cure without their own consent. They may be sent to jail, but the law is not clear on whether they may be sent to the hospital. The women tried to get a legal opinion on this law from Judge Holmes but were not successful because the law was ill at the time of their call.

Mrs. Neal quoted the opinions of several Omaha doctors on the unsatisfactory nature of the existing cures for drug addiction. Two doctors maintained that drug addicts cannot be really cured, as the drug has broken down the structure of the nerves themselves. Others were more hopeful, but seemed unwilling to commit themselves definitely, or based their optimism on comparatively few instances. One declared that every case treated at the sanitarium in Lincoln had been cured; but this statement was so sweeping that the committee received it with some doubt.

**Home Training for Business.**  
A letter from Mrs. Edgar Penney of Fullerton announcing her appointment as advisory member of the republican national committee and her trip to Washington, December 11 and 12 to attend the meeting of the committee, was read by Mrs. O. Y. Kring. The program was in charge of the home economics division of the club and was led by Mrs. J. F. Dimick. Miss Eva Morse of the public schools read a paper on "Home Economics."

One reason for women's signal success in executive posts has been their age-old training in domestic management, according to Miss Morseman. While she would not require training in domestic science of every girl, the speaker thought it of value to every girl.

## Children Give Program

Evalyn Ruth Pierpont, 12, daughter of Mr. and Mrs. Pierpont, is one of the children who will take part in the miscellaneous musical program which forms a part of the children's Christmas entertainment of the Omaha College club Saturday afternoon, December 15, at the Yates school.

Evalyn is a pupil of Robert Cusack. She will play the Romance from the Second Concerto by Wieniawski. The program is directed by Mrs. Geneva Swenson.

Two children's plays, "The Christmas Box" and "Rhoecus" will form a part of this delightful program, which is open to all the children of College club women, as well as their mothers. The plays are directed by Mrs. A. S. Harrington.

"The Christmas Box" tells a pretty story of how a group of rich children discover that one of their poorer playmates has never had a Christmas present. They remedy the lack by enough gifts to make up for last time. Children who act in this play include Jean Wallace, Ethel Standen, Helen Buckland, Bonnie Beth Berquist and Ethel Beaver.

"Rhoecus" takes its name from its principal character, the old Greek wood god, whose business it is to guard the trees. Rhoecus receives word that a certain dryad is in danger because her tree is about to fall. Messengers sent to save the tree daily by the way, so Rhoecus himself comes to the rescue. The actors are Billy Cotter, Mary Hughes, Jack Cotter, Clayton Mossman, Billy Hughes, George Harrington, Elam Standevan and Carol Beaver.

## Dime Thrillers on Exhibit at Public Library

Full of Blood and Mad Adventure But Contain Nothing of Immoral Taint.

Nebraska, and even Omaha, figure as the setting for scenes of blood and mad adventure in a collection of 1,480 dime novels by the Beadle Publishing company, now on display in the Indian room of the Omaha public library.

"Omaha Oil, the Masked Terror, or Deadwood Dick in Danger," "Nebraska Charlie," by Col. Prentiss Ingraham; "Wild Vulcan, the Lone Range Rider, or the Rustlers of the Bad Lands—A Romance of North-western Nebraska"; "The Phantom Adventure on the Nebraska Plains," by Col. William F. Cody, are a few of the titles which bear witness to the reputation of the Goldenrod state among the boys of a generation ago. Probably many respected citizens of the state recall with a tingling skin clandestine perusal of these literary works. Indeed it is not impossible that the state owes a part of its present population to such works and their circulation among adventure-loving lads.

Many of the vivid and thrilling adventures told in these dime novels, however, are based on actual fact, as is shown by the original journal kept by Erastus F. Beadle, publisher of the books, during his trip from the rounds of the book stores, beginning with Prowl's in the Bowery in 1847.

**WHO ELSE WANTS BETTER BREAD?**

**Give your baking skill a chance**

THE kitchen is fragrant with ravishing odors. On the table are big hot loaves of crusty brown bread. In the oven is a light, fluffy cake enriching the air with the flavor of hot spices and sugar. On the window-sill is a fat, juicy pie, its flaky crust all ready to melt in one's mouth. And mother, busy putting things to right, has a happy flush on her face.

Turning to her son's wife she says—"I've been baking for thirty years, but I've never found any flour before that seemed to give me such a sense of sureness as Omar Wonder Flour."

Two things distinguish Omar Flour—quality and uniformity. Omar is a perfected flour of selected spring and winter wheat. By the most exacting tests known in flour milling Omar is maintained at an absolute quality standard. By actual bakings in our own kitchen every run of the mill is required to meet that standard before a sack is shipped.

Go to your grocer to-day and buy a sack of Omar Wonder Flour. Use it in all your baking, bread, biscuits, doughnuts, waffles, pies, cakes. You'll be rewarded with results rich in satisfaction.
