The court granted the injunction forthwith. Howard was convicted of the charge against him, on appeal

from police court, by a jury which remained out 14 hours. O'Brien's success in obtaining the restraining order was unexpected as the liquor introduced as evidence was found outside the place. The Brandeis Store Bought Toys in the Markets of the World

The Brandeis Store Toyland is one of the largest and most complete in the country. It is so for the reason that we sent a special representative to the toy markets of Europe and others scoured the toy markets of America in search for up-to-date playthings for the little ones. Toys bought at Brandeis are toys bought at the lowest price. The reason is that we saved the importer's or middleman's profit and pass the benefits to our customers. We believe that outside of St. Louis we are the largest importers of toys between Chicago and the coast. We also believe that there is not a store in the United States that has as large a variety of toys as you will find on our Eighth Floor, and the prices compare favorably with the lowest.
