

Beef Butchering Resumed on Many Farms This Winter

Two Reasons Ascribed for Revival of Old Time Phase of Meat Preparation. Columbus, Neb., Jan. 6.—With the approach of the winter butchering season on the central Platte and lower Loup river valleys, an old-time phase of home meat preparation has been revived. It is that of beef butchering. On many farms beef butchering has not been practiced for 10 years or more. This winter sees its resumption.

Two reasons are given for this action. One is owing to the fact that many farmers disposed of all or nearly all of their hogs because they feared pork prices were going lower, while they saw no hope of disposing of a large amount of the moulty corn, much of which they found sick and both cattle and hogs want used for feeding.

The second reason is that many hogs were disposed of when farmers found cholera and influenza in their herds were threatening to become epidemic, and the inclination of many farmers to dispose of scrubs and give a new start with pure blooded stock.

Added to these reasons comes the decline of farm market products, with the refusal of living commodities to show any sign of a downward trend.

The last few days has resulted in a sudden rise in the price of eggs. During the winter days of December, egg prices fell to almost summer quotations, with the result that farmers held their eggs. The cold weather has decreased production and increased demands. Buyers are paying more for eggs and farmers are selling the demand of poultry jobs for hens continues heavy, but the sale of chickens to produce men continues unusually light for this season and produce packers announce they plan to lay off help because the supply is much lighter than usual.

In spite of the cold weather, farmers are inclined to view recent prices as a boon to the winter wheat crop since subsequent thaws will supply moisture which has been lacking for more than nine weeks in this section.

Good Seed Corn Chosen by Careful Tests

Beatrice, Neb., Jan. 6.—That the farm bureau department was on the right track when it urged Gage farmers to take every precaution in the selection and storage of seed corn is shown by tests of many specimens by County Agent Boyd Rist.

A test of the corn entered at the Wymore corn show and from other Gage county farms gives convincing proof that a considerable portion of our 1923 crop will not make good seed," Mr. Rist says.

At the corn variety trials held at the Gen. Garrison farm west of Central and the Joe Scheve farm near Beatrice, farmers from all parts of the county reported immature, soggy and moldy corn in practically every community. The 1924 seed corn supply was discussed at that time. Careful selection and proper storage was urged as the remedy.

As a result of these discussions there are hundreds of bushels of dry, mature and high germinating corn now hanging in sheds and cribs on farms all over the county.

Tests made recently on some of this early selected corn which was properly stored and dried show a germination of 90 to 95 per cent. On the other hand, corn taken from the feeding cribs show several samples under 50 per cent.

"A few months ago corn taken from the seed supply on the farms of John H. Buss, Joe Scheve, L. J. Koenig, and Guy Stahl, show an average germination of 94 per cent. In each case, however, the corn had been hand selected and stored so it would dry rapidly.

"Similar conditions apparently exist in other Nebraska counties. Samples taken by Mr. Stewart of the college of agriculture from the Richardson County Corn show showed a range of 15 to 80 per cent germination, with several samples under 70 per cent."

Pipe and Cigar Smoking Prohibited in Bulgaria

Sofia, Jan. 6.—A law prohibiting the smoking of pipes and cigars went into effect throughout Bulgaria today. This measure was introduced in order to increase the consumption of cigarettes, which as a government monopoly would be calculated to increase the public revenue.

Brief News from Iowa

IOWA CITY—Coach George T. Bresnahan of the University of Iowa track team will personally conduct a European tour in 1924 with a party made up of Iowans. The trip covers 63 days, starting with the sailing from Montreal, June 20, and the landing again at New York, August 22. Places of interest in England, France, Italy, Switzerland, Belgium and Holland will be visited with possible trips to Germany and Germany. The party will remain in Paris from July 4 to 14 to attend the Olympic games.

DES MOINES—The Des Moines City Railway company introduced a new method of keeping its tracks clean during the recent blizzard. Early on the day of the storm a new "blow" machine was used, equipped with a big brush in front of it. The machine cleaned only one rail at a time, taking a swath of less than a yard, but it made up in speed for what it lacked in range and made short work of cleaning the tracks in the downtown district. Company officials say the machine used only one man—and operated cheaply—with one man—and operated cheaply, with one man—and operated cheaply.

GARNER—The Garner Commercial club has evolved a novel method of encouraging young people of the city to attend college. During the Christmas holidays it gave a banquet in honor of all the young people of the community who were home from colleges or universities for the holiday season. Sixty students attended, and heard addresses by several speakers on the value of athletics, the religious side of education, and the value of college training.

ATLANTIC—County officials of Cass county are expressing alarm at cracks which are developing in the walls and ceiling of the courthouse. Some of the county commissioners believe it will be necessary to remove or remodel the dome of the structure to prevent the settling of the building.

MASON CITY—The National Butchers' association will hold its convention here in October or November of this year, it was decided recently by the board of directors of the association. Six hundred butchers from throughout the country, Mason, Wis., is president of the association. A. W. Rudnick of Ames, Ia., is treasurer and Albert Erickson of Clear Lake is the director.

TOLEDO—The Tama county engineer announces that the average cost of graveling the primary road from Toledo north to the county line amounts to \$17,295.65 per mile. Twelve miles of the graveling cost an average of \$3,600.76 per mile, and the remainder of the project cost \$5,955.13 per mile. The difference was caused by the use of local gravel on the south twelve miles of road.

WATERLOO—Waterloo citizens are becoming more law abiding as the city police force increases. The police court records show 147 arrests during December, 1923, of which were for traffic law infractions. Of twenty-eight defendants arraigned during the month in district court, the great majority were charged with violation of the prohibition laws.

With the County Agents

of the Dakota county farm bureau, will take the affirmative in a debate. "Resolved, That the tractor is the most important piece of machinery in the farm," was the subject of the debate. The tractor was the subject of the debate. The tractor was the subject of the debate.

The net money return into the state from this production is set at approximately \$51,000,000, as shown by the United States survey and of this amount about \$33,000,000 was returned by grain and livestock production, the report says on the basis of railroad transportation figures.

Pumpkin seeds are very attractive to mice. Bait your traps with them.

165,000 Feeders Shipped to State Since September 1

Approximately 200,000 Lambs and 125,000 Hogs are Received in Nebraska for Feeding Purposes. Lincoln, Jan. 6.—Approximately 165,000 cattle have been shipped into Nebraska for feeding purposes since September 1, Grant L. Shumway of the department of agriculture announced.

"Cattle which were put into the feed pens at top prices ranging from \$12 to \$12.75, and which are marketed or are ready for the market bring approximately the same figure for this time," Shumway says. "In the meantime choice cuts of beef also have remained approximately stationary, ranging from \$17.90 to \$18.00.

"Probably 400,000 lambs were put on feed in Nebraska. "Top lambs put in the yards in September at \$14.25 and now ready for market or already shipped through \$12.50 in December. That decline has been a corresponding decline in the price of lamb chops and choice cuts.

"There were 125,000 hogs shipped in besides the 1,000,000 or so raised in Nebraska. Top hogs put in the feed yards in September at \$9.35 and ready for the market in December of January, brought \$7.15 to \$7.25. There was a corresponding decline in the price of pork in the markets.

"We can here see where the 60 cent corn is going. "Agricultural Nebraska had one bright sunspot in 1923—the corn crop and price. It becomes evident that someone proposes to take a large portion of it through the Nebraska feed yards."

Nebraska Rifle Teams Will Compete in Meet

Lincoln, Jan. 6.—Twenty-one members of the reserve officers training corps of the University of Nebraska will comprise three rifle teams to compete soon in the national rifle match. Capt. V. G. Huska, in charge of rifle marksmanship at the university, announced. Each team will consist of 12 students.

More Business in Dakota

Pierre, S. D., Jan. 6.—Agricultural and mineral production in South Dakota for 1923 scored an approximate 22 per cent increase in value over the 1922 figure, according to summary contained in the South Dakota Review of Progress for 1923, which the production total at \$39,361,000 compared with \$27,344,000 of the previous year.

The net money return into the state from this production is set at approximately \$51,000,000, as shown by the United States survey and of this amount about \$33,000,000 was returned by grain and livestock production, the report says on the basis of railroad transportation figures.
