"My bakings used to be a matter of 'hit or miss' — sometimes they were successful; then again a total failure, no matter how hard I tried. But that was before a friend persuaded me to try Calumet. Now I know what the result will be-what to expect every time - perfectly raised, uniformly baked foods. Bake day is really a delight."

Baking Powder plays an important part in the success or failure of your baking. The great American housewives all realize this. They have found by experience that a better leavener is not, and cannot be made-that for nutritious and wholesome foods it has no equal.

Calumet is made in the World's largest baking powder factories; human hands never touch it.
