Narcotic Agent Here Forced Nature Lover to Comply With Customs of Civilization.

Among the treasured keepsakes of Joseph Manning, United States narcotic agent, is a picture of a small man, tanned to such a deep brown

ADVERTISEMENTS.
IF SKIN BREAKS OUT AND ITCHES APPLY SULPHUR

Just the moment you apply Mentho-Sulphur to an itching, burning or broken out skin, the itching stops and healing begins, says a noted skin specialist. This sulphur preparation, made into a pleasant cold cream, gives such a quick relief, even to fiery eczema, that nothing has ever been found to take its place.

Because of its germ-destroying properties, it quickly subdues the itching, cools the irritation and heals the eczema right up, leaving a clear, smooth skin in place of ugly eruptions, rash, pimples or roughness.

You do not have to wait for improvement. It quickly shows. You can get a little jar of Howles' Mentho-Sulphur at any drug store.

that he might be mistaken for a Malay, with hair so long that he looks like the aborigines.

"That fellow doesn't look human," Manning said while exhibiting the photograph. "Yet he was once seized by one of the best writers I know of, Jack London."

Manning then went on to explain that the picture was kept to remind him of "one troublesome day," while he was a captain of police in Manila, Philippine Islands.

"Several years ago London wrote a book about a trip through the islands of the South Seas. In this book he devoted almost an entire chapter to a white man he found living the life of a nature lover on a small island south of Hawaii.

Perfect Hermit.
"According to the account by London this nature lover was a perfect hermit, wore no clothing and lived on such gifts of nature as came his way. The daily menu of the island varied little. London declared that the usual diet was sea food except on the days of storms, when they ate whatever they could find.

"One day after reading the London story, I received a report that there was trouble on the docks at Manila," said Manning. "I took a couple of officers and went to investigate.

"Whether London was correct in his description of the hermit I don't know, but when I got to the docks I found this fiction character trying his best to live up to all that had been said about him.

Draped in Knapsack.
"Around his shoulders he had slung a knapsack and in this he had hundreds of picture postcards of himself.

"I took the old fellow to the police and after five hours' conversation I convinced him that he needed clothing before he could appear on the streets of Manila. The best I could do, though, was to get him into a pair of army pants and the remnants of a calico shirt.

"That was one of the toughest prop-

Egyptian Council Head Blocks Carter's Work

Saighoul Pasha, recently named president of the Egyptian council and who is virtually premier of Egypt, who is backing the Egyptian ministry of public works in its action tending to handicap Howard Carter and his party in the opening of King Tut's tomb.

School Head Re-Elected.

Brock, Neb., March 8.—The board of education has re-elected Superintendent M. A. Sams for the coming year and his salary was increased to \$2,700. The following teachers were elected: High school, Miss Veva Adams, Miss Leta Wakelin. Grades, Miss Jess Jarman, Miss Mamie Reeve, Miss Maurine Sams, Miss Leora Davis, Miss Rosetta Schaefer, Miss Freda Thrig, Miss Elmetta Dickerson and Miss Fernie Sams. Brock High school will graduate 16 pupils this year.

otions I ran into in 18 years' service in that city, so I keep the picture as a memento."

Omaha Bachelors Score Over Their Eastern Brothers; Records Show 22 of 40 Criminals Here Are Married

Figures of Criminal Court Rush to Defense in New Attack on State of Single Bliss.

Bachelors are crooks and scoundrels and sneaking knaves. That is one of the popular beliefs, which is utterly without foundation in fact.

An eastern investigator has come forward with the statement that in New York, out of 480 men committed to penal institutions, 105 were married, living with their wives, 265 were bachelors, 11 were widowers and 39 were married.

It isn't so in Douglas county. County Attorney Beal says about 71 per cent of the men charged with crime here are married. This includes the great mass of men charged with wife or child abandonment, totaling about 25 per cent of the criminal cases.

Here's Proof.
Censuses of 40 cases of men sent to penal institutions in the last year showed 22 married men and 18 bachelors.

It is likely, also, that some of those who put themselves down as single were married or had been married. A man sentenced to the penitentiary will often deny that he has a wife and even refuse to give the names of any of his relatives, his idea being to keep them in ignorance of his disgrace.

Two men, sentenced to death in district court recently for the murder of William Deerson in a grocery store at 3234 Seward street, are married. Otto Cole, who served long terms

in various prisons and was found guilty of murder after conducting his own trial in district court here two years ago, admitted he is married, though he refused to give the name of his wife, and even admitted that his name was bogus.

Three alleged "gunmen" recently jailed for the murder of "Hank" McArdle, are all married.

William Burton and Leander Little were convicted here recently of slaying their wives.

Most Are Young.
The predominance of bachelors in crime is true here in spite of the fact that the majority of criminals are young, under 30, many of them under 25 and therefore would naturally be expected to be unmarried.

The proposition that "marriage is an insulation against crime" doesn't seem to work out in this part of the country, according to statistics.

And an honest blow is struck in defense of the reputations of bachelors who have been patient under malign attacks for so long.

Jap Finds Way to Grow Pearls

Osaka, Japan, March 8.—Mr. Koisi, president of the Marine Products Experimental station in Ehime prefecture, has discovered a way to produce pearl shells and obtain pearls as large as three inches.

It is said that he has applied to the Japanese patent bureau for a patent, and that he intends to take out patent rights in foreign countries also.

Use Waste Paper Profitably in Construction of Houses

Stockholm, March 8.—A new building material made from waste paper and designed for college and wall linings has been perfected by a Swedish engineer, and production on a large scale soon will be undertaken.

The raw materials are ordinary waste paper such as accumulate in cities, clay and sulphate lye, the cheapness of which warrants an inexpensive finished product. The covering is said to be fireproof and durable; can be applied by unskilled labor, will take paper, paint or stain, and can even be polished. It is a good nonconductor, and does not respond to changes in temperature.

Avoid Driving Rapidly Through Winter Slush

Avoid driving fast through deep slush or white puddles during cold weather. If the chassis is kept wet during the day and the weather turns cold at night ice will collect on many important units. Springs, spring bolts, shackles, steering rods, king bolts, universal joints, brake rod connections, etc., have a hard enough time struggling against odds as it is. To freeze them up needlessly is just another way to abuse the car.

Columbus Baptists Plan to Build \$35,000 Church

Columbus, Neb., March 8.—Seven thousand dollars will be given by the First Baptist church in Columbus by the church extension board of the Nebraska Baptist convention towards erection of a new church building. A \$25,000 building is planned. It will be erected on the present site.

A 15 per cent increase in the membership of the church here was reported at the annual meeting.

Irish Methodists Seek Aid in U. S.

Belfast, March 8.—The Rev. Dr. Northridge, Rev. G. A. McIlraith and Rev. Mr. Byers have left Belfast for New York as emissaries of the Methodist church in Ireland to enlist American financial support and co-operation for a big church crusade in northern Ireland. They hope to

collect \$500,000 to build new churches and provide extensive Methodist headquarters in Belfast.

"Going to Smash It."
Freeport, Ill., March 8.—What is happening in Washington "is merely a part of the government system I am going to smash," Senator Hiram Johnson of California, candidate for the republican presidential nomination, declared in an address here.

The New ESSEX

What Experts Here and Abroad Say About It:

"Hudson has produced a super Essex . . . It looks like the proverbial knockout."—From Automobile Topics.

"The New Essex is a revelation of performance, ease of riding and of smoothness."—From Motor Age.

"Steers easily, even on loose gravel at 50 miles per hour."—From Motor World.

"A wonderful value—a car of which Hudson engineers have a right to be proud."—From Motor Life.

"Possesses qualities I didn't believe could be incorporated in a closed car at \$975."—H. A. Tarantous, in Motor (U. S. A.)

and "MOTOR" of London, England Says:

"For a very considerable time the Essex car has been one of the most popular American productions marketed in this country, and has won an enviable name for reliability and road performance. Good as the four-cylinder model has proved to be in service, however, the manufacturers have superseded it in favour of a six-cylinder model. It represents a very great advance in design on the old car, and is one of the most interesting American vehicles that has ever been imported here, chiefly on account of the fact that the engine is only just over two litres capacity.

"Outstanding features are the splayed rear semi-elliptic suspension, the sturdy frame, accessible power unit and components, oil system of chassis lubrication, general finish of chassis and bodywork, and the remarkably low price.

"So much for the details of the chassis. A short run on the road proved to our satisfaction that the car did not belie its appearance. The engine is vibrationless and will take the car along at so slow a speed as 2½ miles per hour without a tremor from the transmission. From even this low speed a ready pick-up can be obtained without changing down. For a 2-litre power

unit the acceleration on second is terrific; in fact, it is one of the most lively cars in which we have ridden. Thirty miles an hour or over seems but 10 or 12, so smooth is the engine, while ordinary main-road gradients can be surmounted in excess of 45 miles per hour.

"The steering is particularly light for an American production, very accurate, and an ample lock is provided. The brakes, both hand and foot, could not be better, for they are very smooth, progressive and powerful in action. The transmission is noiseless, and in every way the new Essex six-cylinder can be put down as a real delight to drive."

"Even better than my former ESSEX" say Thousands of Owners

It is the most talked of car ever brought out by Essex. Old owners say it duplicates the pep and dash of the former Essex up to 50 miles an hour, while far surpassing it in smoothness and riding ease.

Thousands who examine and ride in it daily are proclaiming qualities never expected in a car of its price. They call it the easiest riding car they ever knew. Safe, comfortable and steady on all roads at all speeds. A special

design that will interest you accounts for that. It starts instantly in any weather. Steers easily as a bicycle. Gears shift noiselessly at a touch. Even those who keep but casual track of gasoline and oil mileage, are astonished at its economy in those respects. And the minimum service cost policy, continues these economies in inexpensive maintenance throughout all the years it serves you. Ask your dealer for the parts price list.

And take a 30 minute ride to learn the facts.
