Omaha Grain	Chicago Grain	Omaha Livestock	Financial News
Omaha, March 13. Spot wheat sold le to 2c lower today. The pronounced weakness in futures was upilicated again today in the cash wheat market and at po time was there any citive demand for wheat. Receipts were 4 cars. Corn sold lower in sympathy with wheat and sales were marked up from to 1½c under yeaterday's prices. Receipts were 149 cars and quite a number of cars carried over. Oats ruled lower, selling %c to %c under yeaterday's prices. However, there was a good demand at the decline. Receipts were 12 cars. Rye and barley quoted nominally lower. Chicago, March 12—Wheat dropped to the lowest levels since August early today as liquidation was resumed and thereafter managed to stage a fair recovery. The close was lower but at the center of the day's range. News was little changed but the liberal selling of the previous session left the pit susceptible to further pressure. Wheat closed ½ to %c lower; corn was unchanged to ½c lower; cars were ¼c higher to %c lower, and rye ruled 2½c off. A house with eastern connections that also acts for some of the prominent local operators was the best seller of wheat during the day. The trade could not make up its mind just who to credit with this selling. On the break buying for shorts and spreaders finally absorbed the scattered offerings and price losses were partially recovered. Corn again met with excellent support on the dips and late in the session rallied well, closing only fractionally lower as a result. Commission houses and local builts took hold. Cash corn prices were easier, but premiums advanced ¼ to %c. The movement of corn from the interior has shown some improvement but cash handlers claim that the country is marketing corn moderately. Oats were under liquidating pressure during the first hour, but ran into an improved class of support, and rallied to an irregular finish. Liquidation in rye carried this grain sharply lower for the second consecutive day. Provisions were again lower with grains and hogs. Lard was 2½ to 6 lower and ribs were 2½ to 7½c lower. Northwestern wheat markets were relatively strong, Minneapolis wheat futures closed with a gain of ½c. The situation	Receipts were: Cattle. Hogs. Sheep. Official Monday	Total stock sales 671,000 shares. Twenty industrials averaged 98.45; net gain, 65. High, 1924, 101.24; low, 24.85. Twenty railroads averaged 84.16; net gain, 34. High, 1924, 85.90; low, 82.74. New York, March 13.—For the first time in nearly a month, stock prices today developed a definite upward trend although trading was still on a somewhat restricted scale. Several factors contributed to the marked improvement in speculative sentiment, following the overnight announcement that American bankers had blaced a credit of not less than \$100,000,000 to the account of the Bank of France in order to assist the French government in stabilizing its currency, the inauguration of dividends of Southern Railway comman stock, easier money rates and a continuation of favorable trade reports. Transactions in Southern Railway common exceeded 100,000 shares, and comprised more than one-eighth of the day's total sales, the stock climbing neariy four points to 55, a new high record for all time. It closed a point below the ton figure. Other railroad shares advanced in sympathy, notably Wabash preferred A. Frisco preferred, St. Louis. Southwestern & Lackawanna, all of which closed a point or so higher. Standard industrials, such as United States Steel common, Baldwin, American Can and Studebaker, which have been moving within extremely narrow limits, were accorded good buying support and closed at net gains of 1 to 1% points. Considerable attention also was paid to the high priced specialities. Fisher Body umped 1% points to 215, a new 1924.

Spreaders were free buyers of wheat here against sales in the northwest late in the session. The trade has paid little attention to fundamental news of late. Reports from sections of the soft wheat territory continued unfavorable for the most part. A flember of the government crop report bureau of Ohio wired that wheat had undoubtedly been hurt by the frequent freezes. Crop advices from the southwest, however, remain generally flattering. The defeat of the Norbeck bill at Washington was inclined to cast a ray of hope over the grain trade. From an economic standpoint the defeated bill had been regarded as the strongest of the many proposed. The primary movement of wheat was again under a year ago, totaling 750,000 bushels, compared with 870,000 bushels a year ago. The loan of \$100,000,000 to France by American bankers apparently exerted little impression marketwise. Neither did the firmness that followed in the French exchange. American exporters back from Europe confirm low stocks but say affoat grain is plentiful. CHICAGO CASH PRICES. By Updike Grain Company. Atlantic 6312. Art. Open High Low Close Yes. Wht. Bear traders made an unsuccessful attemnt to depress the general list by distributing substantial selling orders among the standard industrials to be executed on the announcement of the Southern Railway dividend. These were well absorbed, however, and operations on the short side in these issues were cuickly abandond. Sale of raw silk at a low price for the year, due in part to the weakness of Japanese exchange, had a depressing effect on the so-calld silk shares. Mailinson common and preferred and Julius Kayser each dropped a point or more. Sugar shares improved in sympathy with the more active market for the raw product. Impressive strength also was shown by Colorado Fuel, international Harvester, Corn Products, National Dairy Products and the New York dock issues all up 1½ points or more. Wall Street interpreted the granting of the French loan to mean that official assurance had been received that the Dawes reparation report would be acceptable to both France and Germany, Indications that huge sums are available here for investment and commercial purposes were seen in the widespread inquires by banks for participation in the French credit, applications for which were materially scaled down. Call money held at 4 per cent all day, some "outside loans" being reported below that figure. Time money and commercial paper markets continue quiet with no change in rates. The sharp recovery in the French franc, based on the French loan and the sharp contraction in note circulation feature the foreign exchange market. With the exception of Japanese yen,

New York Sugar. New York, March 13.—A steadler tone valled in the raw sugar market today 1 while prices were unchanged at 7.32c to paid, a better inquiry was reported as ales included about 80,000 bags of bass and 5,000 bags of Porto Ricos for mpt and March shipment, to local reces. Sarly declines of four to six points on stinued liquidation, inspired by the akness abroad, were followed by full overy in raw sugar futures. The late turn was due to active covering and wing believed to be for Cuban account, implied by the steadler tone in the spot rece. Final prices were at the best of from unchanged to 3 points net ther. March clowed, 5.29c; May, 5.38c; ys.5.44c; September, 5.42c. Refined sugar was unchanged to 20 nts lower due to the recent decline in vs. with fine granulated now quoted \$500c by one local refiner and from 5 to 8.90c by others. At the inside ure a better inquiry is reported. Refined futures nominal.
