Why Is It?

WHY is there more argument about coffee than any other item of diet. Coffee has always needed defense—one of the few articles of diet that does.

No doubt exists about the fact that coffee contains caffeine, a drug which doctors prescribe as an emergency stimulant for the heart and nervous system; and many coffee drinkers know from experience that for them, coffee causes nervousness, headache or stomach trouble.

Since so many people, including health authorities, have reason to question coffee drinking, can you afford to risk your health with it—when you can have a safe mealtime drink, such as Postum?

You will like the delicious flavor of Postum. It fills every requirement of a hot drink; and many former coffee drinkers even prefer it to the best coffee.

With Postum as your mealtime beverage, your system free of caffeine, and your sleep sound and restful, you'll realize that Postum has established its genuine value in health and comfort.

Postum for Health

"There's a Reason"

Your grocer sells Postum in two forms: Instant Postum (in tins) prepared instantly in the cup by the addition of boiling water. Postum Cereal (in packages) for those who prefer the flavor brought out by boiling fully 20 minutes. The cost of either form is about one-half cent a cup.
