House Warming a Novel Affair

A novel affair in many respects was the house warming given at the new home of Mr. and Mrs. A. H. Natsstedt at Seventy-fourth and Douglas streets, last night. Mr. and Mrs. Natsstedt have not yet taken occupancy in the new residence. The affair last night was a surprise.

Guests assembled in the house and then phoned the owners that lights were on in their new house. Hastening out to investigate, Mr. and Mrs. Natsstedt entered the home just as the orchestra struck up strains of the Lohengrin wedding march. It was a costume dance. Costumes were provided for the honor guests.

Mrs. Blaine Young and Mrs. Maynard Swartz had charge of plans. The guests included Messrs and Mesdames Young, Swartz, Clark Over, L. M. Your Problems

XYZ: I can't tell you what it would cost a five-member family per year, including clothes, food, telephone bill, coal, electric light, water, etc. I can give you some idea perhaps, but the cost depends upon the scale of the family life, the ages of its members, their location, etc.

Expenses are higher in a city than in smaller places. Very small children can be fed, clothed and schooled for much less than older ones. Some families have good health and save considerable expense that way. Some families enjoy outdoor and inexpensive recreation; others budget only for costly dinners and theater parties.

What is the income of this family? It's rather a good idea to plan to live within the income, you know, and save a little. Every family in the world, unless living from hand to mouth, ought to definitely save something.

Rent in Omaha would run from \$50 to \$75 a month; food for a family of five, from \$15 to \$20 a week; fuel, lights, phone and other incidentals would not be less than \$20 to \$25 a month. Clothes are the most variable expense in a family budget. Young children can be dressed for very little if the mother sews. Groceries, especially if holding positions where their clothes must be presentable, require much more money for clothing.

Allow \$10 for clothes for five people. Add \$25 for recreation, including reading matter, theaters, summer vacation, trips, etc. Another \$25 should be estimated for health, that is insurance, doctors, dentists, etc. Suppose this family saves \$25 a month. The total income in this case would have to be about \$250.

This amount could be cut if necessary, and, needless to say, it could be much increased. I have made no estimate for coal, assuming that if the family pays \$75 a month rent, it has an apartment with fuel included.

Could you be a little more definite about the ages and requirements of this family? If the children are in college, you would have to add the sum for each one, particularly if they are in school away from home.

Current numbers of magazines have articles on this subject.

Bobby: Yes, of course, Bobby, let the boy take you home. That is part of the obligation he assumes when he invites you to go. How shall you thank him? Can't you say very sincerely and simply that you have had a good time, that it was kind of him to invite you? Say what you please, only can.

M. N.: I have looked up the picture in our alcove-grav section for December 16, and am unable to guess the ages of the 10 children of the dancer. I would guess they were arranged according to age, for the reason that they are not arranged according to height.
