The Warford Six Speed, Selective Type, Auxiliary Transmission is sold by practically all Ford Dealers because they recognize it as being as FINE A TRANSMISSION UNIT as it is humanly possible to build in EVERY RESPECT. Thousands of Warfords have been in successful service for two years and now thousands more are being sold every week-

BECAUSE

The Warford is the only SELECTIVE TYPE Auxiliary Transmis-sion for Fords that contains both OVERDRIVE FOR MORE SPEED and UNDERDRIVE FOR MORE POWER in the SAME UNIT. By this we mean when the Warford is installed on either Ford Truck or Pleasure Car that it has six forward speeds-one gear higher than Ford high for greater road speed with less motor speed (reducing vibration, wear and fuel consumption). One gear lower (double power) than Ford low. for emergency pulls. Noting can stop the truck or pleasure car in this gear except loss of traction. Two intermediate speeds be-tween regular Ford high and low, and three reverse speeds. A gear for EVERY condition of road or load. And the Warford is sold with the GUARANTEE of ABSOLUTE SATISFACTION in EVERY RESPECT.

BECAUSE of its known leadership, the Cadillac has been purchased with greater confidence than almost any other automobile.

People have bought this car much as they would buy Government Bondswith unquestioning trust in its value and dependability.

In many instances, they have even dispensed with demonstration rides, taking the position that the Cadillac has been demonstrated and that its very name denotes its quality.

Naturally, the New V-63 has been purchased in this same manner-with the same implicit confidence in Cadillac performance based on its reputation.

But almost immediately, the New V-63 owner discovers this striking truththat fine and efficient as have been past Cadillac types, and enviable as has been

their reputation, they nevertheless afforded him no adequate criterion of the quality of this new car.

The New V-63 simply cannot be compared with previous Cadillacssplendid as was their performance-

And certainly not with any other automobile, either foreign or American.

The New V-63 is extraordinarily different-must be judged by new standards-higher than have ever before been associated with a motor car.

This difference is in vital phases of performance. It is due chiefly to Cadillac's new harmonized and balanced 90° V- . Type eight cylinder engine, and can be realized only by riding in the car.

Consequently, even though you have taken for granted the surpassing quality of Cadillac performance - Drive the New V-63.

Every Convenience for Year Round Use

The owner of a Fordor Sedan enjoys complete driving comfort at all times of the year and in all kinds of weather.

In summer with cowl ventilator open wide and the six large side-windows lowered, the Fordor Sedan is as cool and airy as an open car.

And for travel in rainy weather or over dusty roads, it embodies every essential provision for the comfort of passengers.

At its present low price, the Fordor Sedan offers remarkable value as a sensible car for year round use.
