

Value of Radio Sets Menaced by Interference

Multiplicity of Wave Lengths Threatens Pastime, Commerce Secretary Declares.

Washington, May 2.—The value and efficiency of the estimated 1,000,000 radio receiving sets in the United States is menaced unless broadcast-ers make a new voluntary agreement to check interference.

This was learned today when Secretary of Commerce Hoover announced that requests of passers-by for a conference with congress to call a radio conference within the next few months.

Broadcasters, manufacturers, scientists, government radio experts and amateurs will be asked to assemble in Washington for a national conference to perfect voluntary regulations and eliminate situations that congressional legislation cannot reach.

Secretary Hoover said that he would await action of congress on radio legislation in order to determine the steps regarded as necessary to save what has become one of the greatest American pastimes.

All Wave Lengths Allotted. Practically all available wave lengths that will serve the average commercial receiving set have been distributed to broadcasters. A rapid increase in the applications for permits to operate broadcasting stations has been noted at the Department of Commerce. Fourteen new stations were recently licensed in New York City alone.

Adding to the interference caused by licensed stations thousands of amateurs throughout the country have gone into the unauthorized broadcasting business and with their station-to-station calls have thoroughly complicated the situation.

On May 1 there were 577 broadcasting stations in operation in the United States, compared to 2 September 3, 1921; 36, January 1, 1922; 570, January 31, 1923, and 534, January 23, 1924. How many unauthorized broadcasters are operating is not known to the Department of Commerce. Estimates on receiving sets are all the way from 2,000,000 to 15,000,000.

Divide Time. Practically all wave lengths between 222 and 600 meters have been assigned. Many large broadcasters are operating on similar wave lengths dividing the broadcasting time. Wave lengths below 222 and over 600 will not serve the average receiving set and those over 600 interfere with marine communication.

Secretary Hoover has asked the United States census bureau to secure radio statistics and the survey is now in progress.

WOAW Program
Saturday, May 3.
8:00 p. m.—Speaker's half hour.

WAAW Program
Saturday, May 3.
8 p. m.: Market gram.

Dull Spotted Teeth Bleached White Quick--Safe Way

To whiten dull, yellowish, stained teeth all you need now do is brush teeth with a few drops of a mild, harmless liquid—then use a special paste—our watch stain remover. This new method is called Bleached White. The liquid softens the stains—the paste only gently removes them, but prevents formation of new stains. Fine for removing green stains from children's teeth. No effort or expense—its mild ingredients are intended to act only on surface stains. Bleached White Combination is the formula used by a group of prominent dentists who used Bleached White on their own teeth for four years with highly beneficial results before offering it to the public. Millions of teeth have been whitened this new safe way.

Skin Charm Indoors and Out

Keeping the complexion smooth, dazzling, perfect—with protective cosmetics

TODAY, the initiated know that proper cosmetics not only enhance the beauty of the face, but form a perfect protection for the skin—preserve that exquisite delicacy that lends charm and piquancy!

Now every woman can add an enhancing touch of color, can emphasize and draw attention to her special gifts of beauty, with a feeling of safety and assurance.

For Saint-Ange cosmetics are free from the slightest trace of harmful ingredients. Blended of rare, exquisite components, they are pure, delicate, safe—as caressing to the skin as the touch of rose petals.

Exquisite, natural tints
WHEN the most beautiful women of France and America were consulted regarding their preferences in cosmetics, they urged with one accord, "Give us safe cosmetics and give us natural tints." Saint-Ange colorings—whether for blonde, brunette or golden-haired—are subtle, delicate shades, approximating the human tints superbly. They lend a beauty indescribably ravissant.

Poudre, Lip-Pencil, Rouge, Cosmétique Indien for eyebrows and lashes—all are blended in shadings. There is no jarring, harsh note—they blend as all coloring in nature does. There is harmony of scent as well—in the exquisite note of Bouquet Exotique that permeates all Saint-Ange cosmetics. These fine, subtle points lift mere prettiness into the exalted realm of exquisite beauty!

Liberal sample of Face Poudre and booklet—free

Send for fascinating 16-page booklet on "The Art of Maquillage." Written originally in French by a master of this subtle art and translated into English, it gives many a new side-light on the art of enhancing your beauty. Sign and mail the corner coupon and you will receive, without charge, this booklet and a liberal introductory sample of exquisite Saint-Ange Face Poudre.

LOOK for Saint-Ange cosmetics in exquisite containers with the graceful Swan in the center—at all select toilet goods counters.
