Prairie Wagons In vade New York

In campaign to lower taxes, ox and horse-drawn prairie schooners, the kind in which the early settlers made their way over the plains, representing the farmers of the middlewest, paraded on Broadway, New York city.

"Assistant" called in the faller and notified him of the "suicide." A doctor was summoned, who, after careful investigation, stated the girl had been regularly executed. The girl "executioner" confessed she had assisted the suicide and gave all the details of the story, which were confirmed by the two other girls.

Teachers, Clergy, Editors Powerful

Bethany Pastor Says World Needs Educators With Vision.

"The greatest need of the World are educators," said Rev. Albert Kuhn, of the Bethany Presbyterian church, in his sermon Sunday morning.

LISTED CORN DOES BETTER IN WEST

By Associated Press. Lincoln, May 4.—A two-year experiment at the North Platte agricultural experiment station here today listed corn out yields surface planted corn about four bushels per acre, according to a statement from the state agricultural college here today.

With the County Agents

Schuyler—Joseph Kuzel, farmer near here will carry out the corn variety test outlined in the circular from the state college, which lists the varieties and what yields are to be expected.

Seward—The work of organizing boys and girls agricultural and home economics clubs in this county is under way, according to reports from the county agent.

Cattle Brought From Wisconsin Doing Well Here

Many Holsteins Producing 40 Pounds or More of Milk Daily—to Be Tested.

Hebron, Neb., May 4.—Reports coming into the farm bureau office here today indicate that many of the Holstein cows recently brought into the county from Wisconsin by the farmers, through the organization of the farm bureau, are doing well.

Several of the cows produced more than 20 pounds of milk average per day and a few of them went over the 60-pound mark. Butterfat tests are running from 3.5 to 3.7 per cent for the milk.

Two carloads of these cattle were shipped into the county early in the spring. Most of them are grade Holsteins that were bred to freshen soon after arrival or heifers due to freshen next summer or fall.

USE OF NARCOTICS ON WANE, REPORT

Washington, May 4.—Illegal importation, sale and use of narcotic drugs is rapidly declining, according to a detailed report transmitted to the prohibition commissioner by L. G. Nutt, head of the narcotic division of the prohibition unit.

Radio Program

Monday, May 5 (Courtesy of Radio Digest). WRR, Atlanta, 10:30 a. m., piano recital by J. B. Williams; 11:30 a. m., concert by J. B. Williams; 8:30 p. m., musical program.

Guests at Ohio Hotels Have Finger Prints Taken; Closely Scrutinized

Columbus, O., May 4.—When in Ohio, don't be surprised if the hotel clerk presents you with a saucer of lambchop with the request that you leave a fingerprint opposite your name on the register.

If one's conscience is clear neither need he be alarmed if the man behind the desk casually withdraws from the files a photograph which he compares with the features of the newly arrived guest.

The clerk, whose duties may seem so similar to those of a police Berillon operative, merely will work in accordance with a new rule of the Ohio Hotels association, which has organized a protective department for the purpose of driving out the sneak thief, professional gambler and forger.

Under the direction of experienced detectives a miniature police department has been organized with all the adjuncts of a regular law enforcement bureau, including Berillon records, fingerprints, photographs and all other paraphernalia useful in identifying the hotel swindler.

Farmers' Union Notes

Omaha.—Although this is rated as a windy spring—no one would be surprised if the weather is not particularly cooperative, a dairy movement in which Nebraska farmers showed interest.

Clark's.—The Farmers' Union Co-operative association of the place made a net profit of \$2,222 in the first year, according to the report of the directors.

Lakeview, Ia., May 4.—Pending the absence of Dr. G. E. Golden, in charge of tuberculosis testing work among cattle in this part of the state, experiments will be halted.

UPDIKE

a glorious two weeks vacation \$100 to \$120 covers all expenses

THIS includes railway ticket, sleeping car fare and meals en route from Omaha to Denver or Colorado Springs and return, the 150 mile motor tour from Denver to Rocky Mountain National Park and back, and twelve days accommodation at comfortable hotel, inn or camp.

Table with columns for dates (March 20, April 20) and prices for different itineraries (Denver and Briggsville, Rocky Mountain National Park, etc.).

Write for booklet "Colorado Mountain Playgrounds" which gives lists of hotels, inns and camps with the rates of each, and a wealth of pictures and interesting information.

Thayer Farmers Club Together

Five Purchase One Pure-Bred Bull and Share Expenses.

Hubbell, Neb., May 4.—Five farmers here have just completed the stall and pen for their yearling Holstein bull which they own together in the first block of the proposed Thayer County Bull association.

It is hoped that several other blocks will be formed in the county so that the various groups may be able to exchange animals at the end of two years instead of selling them at a sacrifice, states County Extension Agent L. C. Christie, who has been encouraging the dairy industry among the farmers during the last year.

Practically all the cows that will be bred to this bull are entered in the Thayer county cow testing project, which has already been conducted by Mr. Christie for a year.

ANTHRAX BREAKS OUT IN DAKOTAS

Brookings, S. D., May 4.—Five outbreaks of anthrax on South Dakota farms in three counties, reported to state college veterinarians within the last week, have caused state college agricultural and livestock experts to issue a general warning to farmers.

Measure to Limit Radio Energy Received Likely

New York, May 4.—Laws limiting the amount of radio energy which each receiver may draw from the ether soon may be necessary, Maj. E. H. Armstrong declared recently in an address to the Institute of Radio Engineers.

Decline in signal strength, often attributed to "fading" or unfavorable weather conditions, actually is due in most cases to absorption of transmitted energy by thousands of sets tuned in on one broadcasting station, Major Armstrong said.

He gave instances where a station's waves were almost entirely absorbed by aerials located in a given direction. Every set drains a part of the energy transmitted, he said, and legislators may soon have to determine what this amount shall be.

Updike Grain Corporation

How Koutsky Tried to Fool the Taxpayers

In his campaign literature (for which someone is spending thousands of dollars) City Commissioner Koutsky, of South Thirtieth street and Military avenue paving fame, attempts to prove that he once saved the taxpayers \$12,737.70 by rejecting some sewer bids.

Table showing bid amounts for sewer contracts by Danneberg and Briggs vs. Koutsky's own office bids, with columns for bid dates and amounts.

But he NEGLECTED to include the bid Dunneberg & Briggs submitted on March 20, which was for \$37,437.09.

GUARANTEED TRIAL COUPON. Kansas City, Mo.

Lincoln.—The state agricultural college in a bulletin recently issued, suggested that farmers wash the interiors of their buildings, especially that of the dairy barn. Much dirt and filth is removed that is a breeding place for flies and a place for fly eggs to hatch in warm weather, says the bulletin. It suggests,

Wolfe Oil Corporation. An analysis of the oil situation in connection with the above company will be sent on request.

Union Pacific. Write for booklet "Colorado Mountain Playgrounds" which gives lists of hotels, inns and camps with the rates of each, and a wealth of pictures and interesting information.

When you think of GRAIN, CONSIGNMENTS, SERVICE. You think of UPDIKE.
