

### As an Artist Sees Krug Park Pool on a Busy Day

To the artistic eye Krug Park pool resembles a real seashore resort. Here is an artist's conception of the pool, alive with merry throngs of bathers.

### "400" IS POPULAR CHOCOLATE DRINK

A drink that cannot be concocted with such a delightful flavor even in a drink dispensary is "Four Hundred," a chocolate dairy drink made and distributed by Alamito Dairy company, which can be placed in the home refrigerator and served any time, and is one of the new drinks to be introduced at drink dispensaries everywhere. It is made by a patented process, viscolized at a pressure of 3,000 pounds, which delightfully blends the coco oil and butter fat and which is unobtainable in any other method.

### More Auto Parking Space Acquired

The acquisition of an adjoining tract of land just east of the Krug Park business office gives the park the largest auto parking space for its size in the country. Every four persons who come to the park have a motor car, statistics show, and therefore the park is forced to have ample parking space.

A new parking system is being installed in the new parking space, comprising 20 acres of ground which will have four entrances and a loading and unloading terminal.

### HAVE ONE?

The winsome smile of this little miss is no more appealing than her luscious candied apples, served only at Krug Park. At this same stand is sold Krug Park's famous potato chips, which are hand selected, machine peeled and machine sliced.

# Farmers & Merchants Bank

OMAHA, NEBRASKA

*Assets of This Bank, Over \$1,000,000*
