Furnish Your Home on Our Convenient Terms

The "Better Homes" movement finds this institution in the vanguard! For years we have been making a sincere attempt to educate home-makers what to use and what not to use to make their homes more attractive, livable and abreast of modern standards. We have concentrated particularly on the requirements of those who live in apartments and small houses, endeavoring as best we can to create an effect of spaciousness by simply adding just the items, a mirror, a table, etc., resulting in the addition of charm to any room which it ordinarily would not possess—and at a nominal expenditure.
