You May Have Pretty teeth already-and yet not know it

Make this unique test. Remove the dingy film that's clouding your teeth. Beneath it, you will find, to your own surprise, those white and glistening teeth that you envy in others.

STRANGELY enough, thou-sands of people who go through life wishing and hoping for glistening teeth already have them, without ever realising that

This is the reason given: Run your tongue across your teeth, and you will feel a film. A film which absorbs discolorations and hides the natural color of your teeth.

Remove it and your teeth take on a new beauty. Maybe you have really beautiful teeth without realizing it.

Film is charged too with most tooth troubles. It clings to teeth, gets into crevices and stays. Germs breed in it. And they, with tartar, are the chief cause of

So, besides loss of tooth beauty, film is a serious danger to healthy teeth. You must remove and con-

stantly combat it. It is ever present, ever forming.

Old-time dentifrices were unable to combat it successfully. And tooth troubles were a serious problem.

Now modern science has discovered a new way. A new-type tooth paste called Pepsodent that acts to curdle film, then harm-lessly to remove it. No soap or chalk, no harsh grit dangerous to enamel.
