

### Conventions

Two big conventions in the woman's organization field are scheduled for the next two weeks. This week, Tuesday to Thursday, the federated club women meet at Grand Island for their state convention. From 40 to 50 women will go from Omaha.

Next week, beginning Sunday, the State League of Women Voters will convene in Lincoln for their state convention. They will feature two nationally known women, Miss Julia Lathro, first vice president of the national league, and Miss Grace Abbott, formerly a Nebraska, now chief of the children's bureau, Washington, D. C.

### Eustice-Erickson.

The marriage of Ruth Helen Erickson, daughter of Mr. and Mrs. C. Erickson, Chester, S. D., to Thomas A. Eustice, son of Mr. and Mrs. Charles E. Eustice of this city and grandson of M. A. Brown of the Kearney Hub, was solemnized at 8 o'clock Friday morning in Trinity Episcopal church, Arkansas City, by the Rev. Frederic F. Busch officiating.

Mr. Eustice is a graduate of the Omaha Technical High school. Miss Erickson was a popular visitor this summer.

Mr. and Mrs. Eustice will be at home at the Kinsey apartments, Arkansas City, Kan.

### Press Club Luncheon.

Omaha Women's Press club will meet for luncheon at 12:30 Wednesday at Burgess-Nash tea room. Miss Marie Meeker, who appears at the Orpheum theater this week, will entertain the club with a talk on reading exercises.

A business session will follow.

### Miss Burke Engaged.

The engagement of Bernice Burke, daughter of Mrs. K. E. Burke, to J. Everett Dering of this city was announced at a luncheon given for her mother Saturday afternoon. The wedding will take place November 12. Miss Burke was graduated from Sacred Heart High school.

### Saw College Dances.

The Wig and Roba club of the Creighton University College of Law plans to give a series of nine dances this season at the Blackstone hotel. The first dance will be held Wednesday evening, October 15. Music Masters will play.

### Card Parties.

The Ladies of Ellis will have a card party for members only at the 300s club at 2 p. m. Tuesday. Mrs. Ed Quinn, hostess.

St. Philomena's parish will give a dance and card party next Wednesday evening at 8 in the Burgess-Nash tea rooms. Twenty prizes will be awarded.

Mrs. Margaret Wagner is chairman of the high five committee; Miss Lisetta Smith of the dance committee; and Francis Melia of the orchestra will play.

Malva Shrine Whist club meets Tuesday, October 14, at 2 o'clock, at Masonic temple.

Holy Angela Parish club will give a dance in their hall, Twenty-eighth and Fowler, on Tuesday evening, October 14. This is the first dance of a series to be given by this club.

### Treasurer of Woman's Club

Mrs. Allen Koch HEYN PHOTO

Mrs. Allen Koch is treasurer of the Omaha Woman's club, serving her first year. Last year she was chairman and treasurer of the membership committee. The club opened season October 6. Mrs. Koch has

been a member of the club since its organization 31 years ago. She has been a resident of Omaha for the last 37 years. Leader of a class of 50 young business women and teachers at the First Congregational church, is Mrs. Koch.

### For Miss Klepetko.

A party was given on Wednesday for Miss Irma Klepetko. Those attending were: Misses Ione Donnelly, Ruth Lomax, Eve Molgard, Margaret Hautzner, Carrie Hopper, Anne Aicher, Gertrude Bowman, Agnes Bombeck.

### Miss Allen Weds.

Word has been received here of the marriage of Miss Rose H. Allen of Lincoln, formerly of Omaha, daughter of Charles W. Allen, to George H. Cannon of San Diego, Cal., where they will reside. The marriage took place in June.

### Dr. Conlin Host.

Dr. Frank Conlin entertained the faculty and student members of the Alpha Kappa Kappa fraternity at his home Saturday evening. There were 42 guests.

### Voice and Opera Study

MAUDE FENDER GUTZMER Thursdays Schmoller & Mueller Bldg.

### Noted Educator to Speak

Mrs. Marietta Johnson, director of the Organic school, Fairhope, Ala., will speak at Technical High school auditorium Monday, October 13, 4:15 o'clock.

For the past 17 years Mrs. Johnson has been carrying on an advanced experiment in education. She is verifying the theories set forth by Dr. John Dewey of Columbia university in "Democracy in Education."

Her program is based on the thesis that during the period of life from conception to 14 years of age all training should stress physical and spiritual development. She holds that moral habits are fixed only through exercise in moral situations. Mrs. Johnson's results are an inspiration to teachers and parents who have come in contact with her personally and have learned of her work.

The Omaha school forum, under whose auspices Mrs. Johnson speaks, cordially invites all who are interested to attend.

"Education Is Growth" is Mrs. Johnson's subject.

### Personals

Mrs. J. Stewart White has returned from a summer on the Maine coast.

Mrs. F. R. Millsbaugh of Topeka is the guest of her sister, Mrs. F. H. Davis at the Blackstone.

Mrs. H. S. Weller will leave Monday for St. Louis to visit her daughter, Mrs. Francis Murphy.

Mrs. F. S. McCord of St. Joseph has been the guest of Mrs. W. H. McCord at the Blackstone this week.

Mrs. John A. McShane is at the Blackstone for the winter having returned from New York and a summer abroad.

Mrs. William A. Wolf of Beatrice spent several days in Omaha this week entering her daughter, Abbie, in Brownell Hall.

Mrs. Ralph S. Viall of Chicago, who has been the guest of Miss Evelyn Ledwith for three weeks, left for home Saturday.

Mrs. J. H. Abrahams and daughter, Charlotte, have returned to Omaha after an extended absence. They are making their home at the Blackstone.

Mr. and Mrs. E. A. Wurster will spend the next two weeks at Excelsior Springs, Mo. Mr. and Mrs. Wurster recently moved to Omaha from Milwaukee, and are at home at their new residence, 5101 Davenport street, which they purchased from Mr. and Mrs. W. H. McCord this summer.

### Writes From Africa.

(Continued From Page One.)

the buck, with rather nice horns, one of which I shot later. And then the empa and koodoo, the latter getting as large as horses and with enormous spiral horns. Then there are the sable, or black buck, which get quite large and have great horns which curve back, and the wilder beast which looks more like a buffalo than anything else. There are also quite a few leopards, but no lions or elephants.

### Fails To Get a Sable.

"I had quite a few shots at sable, but was never able to bring one down. The koodoo were very wild and hard to get close to. I found I was not as good a shot as I had imagined, and had to get within about 100 yards to be able to hit anything. I did manage to get two small buck and quite a number of partridges with the shotgun. Got two with one shot once.

"I enjoyed the camp life ever so much. We would generally go swimming in the afternoon in a river about three miles away. It was hardly deep enough to swim in, except in one place, where you could swim on your back for 20 or 25 feet. Sometimes we would go out for the day in the car and take our lunch and hunt all day. The country is generally flat, but sprinkled thickly with flat-topped hills called 'kopjes,' about 200 or 300 feet high generally. They are quite steep sided generally, rising abruptly from the ground, and we would climb one of them to get a better view of the country. It was terribly hot there— even the rock was warm to the hand, and although they said it was only 90 degrees it seemed much hotter because of the poor ventilation. There was a complete ventilating system operating but it was not working very well at this new level.

"Sifted Across Corduroy. We saw all the enormous crushers which reduced the hard gold-bearing rock to a regular powder. This powder is then mixed with water and flows over heavy-ribbed corduroy tables—the gold settling out and catching in the tufts of corduroy. This catches about 60 per cent of the gold and is much more economical than the mercury amalgam process. The remaining 40 per cent of the gold is dissolved out of the sludge by a cyanide process which causes it to be deposited on zinc filings or chips—and the amalgamation process is used to remove this—and they get it all but about 4 per cent of the total gold.

is much more open, like our basketball and soccer. The game was supposed to be made up of the best players in Britain—quite a number of whom I knew—having met them before at an earlier game at Johannesburg. The local Pretoria team, however, beat them all hollow, 7 to 0. I'm afraid the English players had not been keeping the best of training, as the party after the game showed.

### Visits City Deep Mine.

Had to be up early the next morning to visit one of the deepest mines in the world—the City Deep—a gold mine. Johannesburg is situated right in the middle of a gold field about 70 miles long and known as the Rand. Most all the big mines are known as "Deeps"—Dutch, I guess. After going down into the mine, Mr. Adams says:

"At the end of the long passage we came on a new shaft, 30 feet in diameter and lined with concrete blocks. It was a wonderful work—came straight from the surface and went 1,500 feet below where we stood—5,700 feet in all, making it below sea level! They had special permission to take us down to this new lowest working level and we were lowered down in a big bucket to see them drilling and working from a platform suspended a few feet above the bottom. Before they finished they intended going below 6,000 feet. The shaft had already cost more than a million pounds, and everything seemed to be built in so permanently they said the mine was getting richer as they went deeper. The ore was testing about 8 cwt. to the ton. It was terribly hot down there—even the rock was warm to the hand, and although they said it was only 90 degrees it seemed much hotter because of the poor ventilation. There was a complete ventilating system operating but it was not working very well at this new level.

view of the Presbyterian hospital where Bobby made his first call on little Charlotte Chase Cullingham. Dr. Earl Sage, who was among those present when little Bobby Allyn was born, reads the book, a genial patron saint to all the little folk therein.

TITO SCHIPA, noted tenor, who will sing here October 22 for the Tuesday Musical club, has at least one enthusiastic admirer in Omaha who signs himself "L. T. Gullfoyle." In writing the club for 10 tickets, this appreciative man said:

"Schipa is without doubt the most remarkable tenor of the day. His singing is flawless and his interpretations are masterful. His voice has the sweet, lyrical and appealing quality of John McCormack, though to a greater degree. Besides, Schipa has a greater range and is as much at home in music of the dramatic type as of the lyric. The head tones of McCormack are beautiful, but the head tones and fine spun pianissimo notes of Schipa are of a quality and perfection that human ears have not heretofore been privileged to hear."

After this song of praise, the writer added a postscript: "No, I'm not an Italian. Sure, I'm an Irishman."

### Mother Training Class.

A Mother Training class will be organized Monday, October 13, at 7:30 p. m., on the sixth floor of the City Hall. This evening class is being organized to accommodate women who find it impossible to attend the daytime classes. There is no charge and

all women who are interested, are invited to come.

### Wooden Paper Knives.

Painted wooden paper knives come in several sizes and many designs. The lovers of animals will find a head of a dog, a horse, a cat, a bird or some other creature of the jungles among these knives. The lover of quaint peoples will find a selection from Indians to Dutch, from Chinese to characters of the imagination.

A Lenief evening gown has a fluted ruffle for a hem appearing below a heavy band of gold spangles on white georgette crepe.

### MODART CORSETS

### Look in Your Glass

Will your figure keep its loveliness or will you let it spread and sag?

Let our corsetiere fit you with a Modart especially designed for you. See in your glass how it smoothes and gently corrects your figure. Then slip on your smartest frock and see how beautifully it fits over this perfect foundation.

There is a Modart for every figure, in lacing and non-lacing styles and many materials, priced from \$5.00 up. A fitting does not obligate you in any way.

Dont buy new rugs have them renewed the Dresher Way

Few women realize the state of perfection to which Dresher Rug Cleaning Service has attained. Here your rugs are washed through and through; they are dried by steam; they are sized with glue so they will lay perfectly flat without curling; they are re-bound at the edges if necessary and new fringe added.

Never mind how badly worn your rugs may be—call us and let us tell you just how to put them in good condition, ready for many months of additional wear. Every day we clean and repair rugs that owners have thought were ready to discard.

Rugs cost money. Don't discard them until you are absolutely assured by us that they are beyond repair. Phone AT lantic 0345 or MA rket 0050 and let us tell you what we can do for your rugs.

Visit our rug cleaning and re-newing department. You will see that few rugs are really "worn out" but are discarded long before their usefulness is ended.

### STEINWAY THE INSTRUMENT OF THE IMMORTALS

[IGNACE PADEREWSKI AT HIS STEINWAY]

### You need never buy another piano

TO THOSE who wish to know the reason for the supremacy of the Steinway, the bare recital of the truth is utterly convincing. You will find, for instance, that all the major improvements marking the progress of the piano were originated, and were brought to perfection, in the Steinway workshops. You will discover that five years and eleven months of painstaking preparation and workmanship is required to build a Steinway piano. You will find that literally scores of the most famous pianists in the musical world not only use the Steinway on the concert stage, but in their homes; subjecting them, day after day and year after year, to the most strenuous practice.

And afterward, when you are seated at any one of the many Steinway models . . . try the beautiful liquid treble, crystal clear . . . sense the rolling sonority of the bass . . . touch the middle section and set the singing, golden mezzo tones floating. . . Then, if you are a really careful and logical buyer, you become the owner of the Steinway.

Any new Steinway may be purchased with a small cash deposit, and the balance will be extended over a period of three years. \*Used pianos accepted in partial exchange.

Prices \$875.00 and up
