Real Prices for Farm Products Take Strength Out of La Follette Fight for Nebraska.

By W. M. MAUPIN. The dawn of a new prosperity that

as come to Nebraska will be the determining factor in the voting for president and for governor. This is the outstanding fact in the political days before election.

tion of Europe, and particularly the Wyoming revival of conditions in Germany, as pointed out by Alanson B. Houghton, United States ambassador to Berlin, during his address in Omaha last Mr. Houghton explained the desire of the German people for the success of the Dawes plan. He explained the determining part taken in this work by President Coolidge. He outlined the hopelessness that would return to Germany in the event there should be an inteterminate election in the United States. He pictured the consequence should the selection of the new president be thrown into congress, where there would be so much doubt and delay as to put in danger the entire plan for the restoration of sound economic conditions

The strength of the Dawes plan ap-Mr. Dawes himself has been modest with respect to it. Contrary to the usual appeal of a politician bragging about his "record," Dawes has taken backing of all those who hope for better things in Europe, the German Everett Colby, clashman people, now struggling to their feet under the dawn of returning better times, would "be pushed back into the pit," with the probability that would be chaos in Europe and the decline of the whole of that continent to the condition of red Russia.

Ready Money Now. Thus it is that Nebraska will vote with its hopes, when it casts its ballots for president and for governor. The hope that has come with the dawn of a new prosperity in Nebraska and the middle west and the hope that has come to Europe with the dawn of better times in Germany.

The new prosperity that is dawning for all the people of Nebraska is a real prosperity. The prices of all farm products have been going up. Business in the cities and towns is reflecting the better conditions. It is estimated that the rise in the price of wheat and corn alone will give to Nebraska farmers an increase of more than \$100,000,000.

prices have enabled the farmers to get ready money with the sale of only a portion of their crops. There are millions of bushels of wheat still en the farms. Much of this has been threshed and is being held for still higher prices. Much of it, however, has not yet been threshed. All of this is proof of the fact that the pressure upon the farmers for immediate cash has been met and with only a portion of the crop.

corn crop in Nebraska, which will bring the highest price in years, has not yet been gathered. If the farmers can hold onto a considerable part of their wheat crop, it is certain they will be able to use good business management in selling their corn. It will be sold direct, if that promises the best return. It will be sold on the hoof," if that seems to be best. It would appear at this time that there will be much feeding on the farms of Nebraska this

New York, Oct. 26.-The League of Nations Nonpartisan association accounted today that the results of a recently conducted canvass of United Switch to Coolidge Now states senators indicated that "only 11 republican senators could be counted upon to support their party's platform favoring American membership in the world court."

They were listed as Senators Mc Lean of Connecticut, Edge of New situation as we view it now, eight Jersey, McKinley of Illinois, Cummins of Iowa, Capper of Kansas, Hale Another determining factor is the of Maine, Couzens of Michigan, Willis better understanding of the working of Ohio, Stanfield of Oregon, Elkins of the Dawes plan for the rehabilita- of West Virginia and Warren of

> Senator Frazier of North Dakota was reported by the association to have replied that he "will not vote for it (American membership in the world court) as now advocated." Two indexed as supporters of the Pepper plan were Senators Pepper and Reed of Pennsylvania.

The replies of nine other republican senators were characterized as noncommittal, while the remaining 25 "did not answer" the letter of inquiry, through which means the association's canvass was conducted. Contrasting the attitude of repub lican senators with that of democratic, the report chronicles that "all the 19 democratic senators who replied to the inquiry answered in the affirma Of 24 of those who failed to peal is stronger for the reason that reply, three were stated to have been seriously ill and two were in Europe

One Overcome in Rush of Occupants of Structure to Safety-Two Floors Gutted.

Fire swirling around the elevator shaft and mushrooming over the fourth floor gutted the two top floors of the four-story Lyric building, Nineteenth and Farnam streets, late Sunday afternoon. For an hour and a half fire companies brought to the scene by a "three alarm" fought the stubborn blaze in the roof and walls of the fourth floor. At 5:40 firemen were withdrawn from the building and the fire oxcially declared out. By that time thousands, attracted by the clouds of black smoke that poured from the roof of the building, were pressing against fire liens drawn on

Farnam and Douglas streets.
