## Prevent tooth decay below the gum-line

As the soil nourishes the tree roots, the gums nour-ish the teeth. And as the tree decays if you bare the roots, so do the teeth decay when gum shrinkage starts in.

This condition - one of the first stages of Pyorrhea -is very common and something that ordinary tooth pastes are powerless to prevent. If not checked promptly it will lead to loss of teeth and serious organic diseases.

If used in time and used consistently twice daily, Forhan's will prevent Pyorrhea or check its progress. It will preserve the gums in their pink, normal healthy condition, safeguard your health and keep your mouth clean, fresh and wholesome.

Forhan's is more than a tooth paste; it checks Pyorrhea. Thousands have found it beneficial for years. For your own sake ask for and get Forhan's For the Gums. At all druggists, 35c and 6oc in tubes.
