No Worry

No danger, this new safe way

NOW there is a new way in woman's personal hygiene which has abolished old-fash-

ioned methods—dangerous and embarrassing. Today 5 million women have adopted it. Won't you, in fairness to yourself, at least find out about it? This new way is Kotex. It is a

super-absorbet sanitary pad made of Cellucotton - a substance

Each Kotex pad is an active deodorant, impregnated with a new secret disinfectant. Kotex is easily disposed of— just like a piece of tissue. Packed in sanitary sealed pack-

ages of twelve—Kotex comes in two sizes: Regular, and Kotex-Super (extra large). Get Katex Deodorized, in the blue box with white stripe, at

An operator does not "listen in" to learn that a line is busy but instead finds out by means of a mechanical test.

The telephone called is not necessarily in use when the line tests "busy". It will do so in any of the following cases:

1. Some one may be using the telephone called.

2. If the number called is on a party line, the other person on the line may be using his tele-

3. You may have called the wrong number and that line is "busy."

4. Someone else may be trying at

that moment to get the same line you are calling.

5. The receiver of the telephone called may be off the hook or held up by something accidentally placed under it.

6. Temporary disarrangement of mechanism at the central office may, on rare occasions, cause a line to signal "busy" when the operator tests it.

Naturally, an operator regrets when a line tests "busy" because it disappoints the subscriber and probably makes it necessary for him to place the call again.
